Youngjin.com, 2006-08-28 The Accelerated series was developed to fill a void in the market. Many books are either too broad in scope and try to cover too much ground or they are so narrow in scope they focus only on a particular area of the software's functionality. Neither is a good solution for the beginner market. The objective of the Accelerated series is to reduce the time it takes for a beginner to learn, internalize and apply book knowledge to practical projects. Every chapter is divided into three sections: concepts, foundation exercises and professional tutorials. Concepts covers basic need to know principles and theories. Step by step foundation exercises reinforce the concepts. More advanced tutorials then expand the learning. In the exercise and tutorial sections there are sidebars containing notes and tips. Notes explain concepts in more detail than in the first section while tips dish out useful shortcuts and time saving tricks. In addition before and after screenshots are consistently provided right at the beginning of every hands on exercise to give readers a clear idea of what can be achieved.
