## **Portraying The Self:**

**Portraying the Self** Michael Kenneally, 1988-01-01 Irish Literary Studies Series No 26      **The Self in Social Psychology** Roy F. Baumeister, 1999 This reader presents a collection of articles on the study of the self in social psychology The readings are in thematic sections covering topics such as self knowledge self esteem self regulation self presentation and the self and culture      Portraying the Other in International Relations Sybille Reinke de Buitrago, 2012-04-25 Portraying the other in international relations significantly shapes interaction among actors in the international field consequently colouring views of the other and legitimating behaviour toward the other This edited volume presents current analyses by international scholars on othering processes and self other constructions within international relations attempting to fill a gap in the debate on this fascinating topic and its socio political implications Othering is illustrated in three thematic sections I Othering in interstate and interregional relations II Othering in the policy field of terrorism and counterterrorism and III Possible transformations of othering Contributions discuss othering from diverse angles and with different conceptual approaches illustrating the multiple forms othering can take They show how othering can be studied and its dynamics and consequences critically analysed and more comprehensively understood but also the limits to these attempts Various motivations for engaging in othering are elaborated The images ways of representations and stylistic means that are applied are exposed and their internal logic as well as effects on thinking and behaviour in the international arena examined Furthermore possibilities for modifying othering processes that is how negative self other constructions may be transformed with the goal of enabling the peaceful existence of different groups are presented      **The Subjective Self** Harwood Fisher, 2001-01-01 For all their strides in understanding how we create and think about cultures psychologists linguists and logicians have had difficulty explaining how we conceive our selves how the self can in fact be both the object and the subjective originator of its surroundings Harwood Fisher s purpose in this far reaching interdisciplinary book is to depict the subjective self in its true complex duality In *The Subjective Self* Fisher argues that the key to depicting both aspects of the self simultaneously and thus modeling it more holistically than before is to visualize the self in a logical space From an origin point inside this space the self tries out metaphors and launches categories to logically order what it wants sees and encounters This is a creative cognitive process metaphoric framing by which the self invents new forms and depicts new organizations of its experiences impressions and information It is also a generative linguistic process bracketing by which the self can step outside its own expressed thoughts gain new levels of awareness re position itself as an agent responsible for its ideas and statements and in short empower its own identity The framing sets in motion versatile mental categories forms that are projected into mental space where they become objectified The bracketing sets in motion the logical bounds of the I stabilizing the individual s identity and giving thrust to the subjective self s dynamic causal role In elaborating this theory Fisher extends the ideas of Kurt Lewin Jean Piaget and C S Peirce among others By drawing on each of these thinkers he is

able to bring their common themes of perspective and construction together in his portrait of the self as a creative iconic space **Drama Teachers' Association of California. Bulletin**, 1929 **Bulletin of the Drama Teachers' Association of California**, 1929

Garbowski, Jan Hudzik, Jan Kłos, 2009-05-27 Charles Taylor is currently one the most renowned and influential contemporary philosophers He is also widely quoted and discussed both in the social sciences and humanities Taylor earns this attention through his remarkable capacity for presenting his conceptions in the broadest possible intellectual and cultural context His philosophical intuition is fundamentally antinaturalistic and tends toward developing broad syntheses without a trace of systematizing thinking or any anarchic postmodernist methodology His thought unites the past with the present while culture is treated as a broad mosaic of discourses Religion art science philosophy politics and ethics are all fields through which the

Canadian philosopher deftly moves about in his search for their hidden structures and deepest sense Taylor's philosophical output is prodigious Recently as his monumental study *A Secular Age* 2007 indicates he has been concentrating much of his attention on the problem of secularization The selection of contributions in the current volume proffer a penetrating cross section of Taylor's thought They are derived from a conference held in October 2008 in Lublin Poland Although some of the articles are focused on a reconstruction of the philosopher's concepts most either engage in a polemic with elements of his thought or find inspiration in it for their own reflections The contributions are grouped in four parts 1 philosophy and the modern self 2 the problem of secularization 3 between liberalism and communitarianism and 4 language literature and culture

In this closely reasoned study John J Conder has created a new and more vital understanding of naturalism in American literature Moving from the Hobbesian dilemma between causation and free will down through Bergson s concept of dual selves Conder defines a view of determinism so rich in possibilities that it can serve as the inspiration of literary works of astonishing variety and unite them in a single though developing naturalistic tradition in American letters At the heart of this book beyond its philosophic discussion is Conder s reading of key works in the naturalistic canon beginning with Stephen Crane s *The Open Boat* and *The Blue Hotel* The special character of determinism in Crane is Conder holds the source of his complexity and striking originality He finds a stricter determinism in Norris s *McTeague* In Dreiser however the naturalistic tradition develops toward a fusion of determinism and freedom in a single work and this fusion in a different guise operates in Dos Passos s view of self in *Manhattan Transfer* With Steinbeck s *The Grapes of Wrath* the uniting of determinism and freedom finds its fullest realization in the concept of dual selves one determined one free In Faulkner s *The Sound and the Fury* and *Absalom Absalom* the concept of the dual self appears in its most complex form The developments in the work of Steinbeck and Faulkner Conder believes bring the classic phase of American literary naturalism to a close *Naturalism in American Fiction* illuminates a group of major literary works and revives a theoretic consideration of naturalism It thus makes a fundamental contribution to American studies
