Private Higher Education Alma Maldonado-Maldonado, Yingxia Cao, Hong Zhu, Daniel C. Levy, Philip G. Altbach, 2006-08-01 This research project has been supported by the Ford Foundation, the Lynch School of Education at Boston College, and the Program of Research on Private Higher Education at the University at Albany.

A World of Private Higher Education Daniel C. Levy, 2024-05-13 A World of Private Higher Education is the definitive treatment of a sector accounting for a third of the world's 200 million higher education enrolment, yet remaining largely unknown even to scholars of higher education and widely mischaracterized when it is considered by stakeholders or the general public. Beyond the eye-popping numbers, several inter-related thematic findings regarding the Private and the Public underscore the subject matter's importance. First, private-public differences are significant; it matters that so many students are in a sector that not long ago was only marginal in much of the world. Second, private higher education (PHE) itself is increasingly diverse, with significant and private-public differences. Third, the overlaying of the first two realities yields increasing diversity in private-public higher education distinctions. Especially for its pioneering mapping of PHE globally, regionally, and nationally, the book draws on the pioneering dataset of the pioneering scholarly program for research on PHE: Program for Research on Private Higher Education. Unprecedented in geographical scope, the dataset is unprecedented in longitudinal coverage, too, dating back to 2000. Empirical methods allow for extensive analysis, and theoretical analysis draws on key private-public concepts embedded in literatures on privatization, nonprofit studies, and policy models. For the major challenge of penetrating inside the increasingly diverse private sector of higher education, Levy revises his heralded and widely employed PHE typology.

Higher Education, Public Good and Markets Jandhyala B. G. Tilak, 2017-10-16 This book critically examines some of the major trends in the development of higher education. It

demonstrates how in the context of liberalisation globalisation and marketisation the crisis in higher education has assumed different dimensions in all advanced and emerging societies The author shows how the state tends to slowly withdraw from the responsibility of higher education including in the arena of policy making or simply adopts a policy of laissez faire of non involvement which helps in the rapid unbridled growth of private sector in higher education The notion of higher education as a public good is under serious contestation in current times The book argues for the need to resurrect the compelling nature of higher education along with its several implications for public policy and planning while providing a broad portrayal of global developments comparative perspectives and key lessons The volume will be of interest to scholars and researchers of education political science public policy and administration governance development studies economics and those working in the higher education sectors think tanks policymakers as well as NGOs

Higher Education and the State in Latin America Daniel C. Levy, 1986-03 Latin America higher education has undergone an astonishing transformation in recent years highlighted by the private sector's growth from 3 to 34 percent of the region's total enrollment In this provocative work Daniel Levy examines the sources characteristics and consequences of the development and considers the privatization of higher education within the broader context of state society relationships Levy shows how specific national circumstances cause variations and identifies three basic private public patterns one in which the private and public sectors are relatively similar and those in which one sector or the other is dominant These patterns are analyzed in depth in case studies of Chile Mexico and Brazil For each sector Levy investigates origins and growth and then who pays who rules and whose interests are served In addition to providing a wealth of information Levy offers incisive analyses of the nature of public and private institutions Finally he explores the implications of his findings for concepts such as autonomy corporatism and privatization His multifaceted study is a major contribution to the literature on Latin American studies comparative politics and higher education

Emerging Dynamics in the Provision of Private Higher Education in Africa Wondwosen Tamrat, Damtew Teferra, 2024-05-29 This edited book examines the private higher education PHE sector in African countries Reports suggest that private institutions across the continent outnumber their public counterparts yet there has been little scholarly investigation into this emerging phenomenon The book therefore seeks to document map and analyse key trends and contemporary themes in the PHE sector as well as chart historical developments policy and regulatory frameworks As a whole it provides the reader with in depth knowledge rich perspectives and robust analyses from leading authorities in the field Contributions from all sub regions combine thematic issues with shaping discourse on the topic and the discussions are undertaken in the context of global perspectives The book will be of interest to academics researchers postgraduate students policy makers analysts and development partners interested in African higher education and PHE in particular

Property Ownership and Private Higher Education in China Spring Su, 2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide ranging

spectrum of socio economic and political demands under the country's flourishing market economy and its wholesale pursuit of decentralization This book explores the issue of property ownership an area which is regarded as an essential element in the attraction into the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country's existing institutions The focus throughout this book is primarily on the legal economic managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities A feasibility analysis and discussion is also provided on for profit universities and their potential market niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for profit in disguise It is argued in this book that such quasi profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action Finally it is clear that in the transition from the rule of the people to the rule of law legislation practices and compliance do not always go hand in hand in China thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice This book concludes

Towards the Private Funding of Higher Education David Palfreyman, Ted Tapper, Scott Thomas, 2017-11-08 An almost universal driving force for contemporary change in universities is the shifting view of higher education as more of a private than a public good *Towards the Private Funding of Higher Education* presents a contemporary global picture of this move towards the privatisation of higher education and examines how these shifts in ideology and funding priorities have significant policy implications The resulting developments such as the imposition and escalation of student tuition fees and the emergence of online providers of higher education emerge out of a combination of economic political and ideological pressures further enhanced by technological changes By using multiple international and regional examples to analyse the various pressures for privatisation this book examines the different forms privatisation has taken whilst offering an analytical interpretation of why the privatisation drive emerged why it has been resisted in some instances and what forms it is likely to assume in the future *Towards the Private Funding of Higher Education* illustrates and challenges the emergence of a new relationship between the university government and society It is an essential read for higher education professors university managers and higher education policy makers across the world

Private Higher Education and the Labor Market in China Yingxia Cao, 2008 *Private Higher Education and the Labor Market in China* focuses on Chinese private higher education institutions and investigates their institutional management efforts in linking private higher education to the labor market The dissertation firstly describes and analyzes how these mostly demand absorbing institutions include elements

aimed at meeting labor market demands in their mission statements and how they improve student employability and bridge graduates and employers through job oriented fields of study provision educational delivery career services as well as networking and partnerships It then examines graduate surveys on initial employment outcomes about employment status starting salary job and education match and job satisfaction while exploring the associations of these outcomes with managed institutional efforts Finally it builds a conceptual model with two dimensions that illustrates institutional variations in management efforts and initial graduate employment outcomes This dissertation concludes that many of the demand absorbing Chinese private higher education institutions have managed serious efforts in linking private higher education to the labor market and some of them are even semi elite in their job oriented institutional efforts and initial employment outcomes

Private Higher Education in Post-Communist Europe S. Slantcheva,D. Theory and Method in Higher Education Research Malcolm Tight,Jeroen Huisman,2015-09-29 Theory and Method in Higher Education contains contributions to international debates regarding the application and development of theory and methodology in researching higher education

Higher Education, Stratification, and Workforce Development Sheila Slaughter,Barrett Jay Taylor,2015-11-17 This work analyses how political economic shifts contribute to competition within higher education systems in the US EU and Canada The authors highlight competition for prestige and public and private subsidies exploring the consequences of these processes through theoretical and empirical analyses Accordingly the work highlights topics that will be of interest to a wide range of audiences Concepts addressed include stratification privatization of formerly public subsidies preference for high tech academic fields and the vocationalization of the curriculum i e Science Technology Engineering and Mathematics STEM fields selected professions and business rather than the liberal arts or the Humboldtian vision of the university Across national contexts and analytic methods authors analyze the growth of national policies that see universities as a sub set of economic development casting universities as corporate research laboratories and education as central to job creation Throughout the volume the authors make the case that national and regional approaches to politics and markets result in different experiences of consequences of academic capitalism While these shifts serve the interests of some institutions others find themselves struggling to meet ever greater expectations with stagnant or shrinking resource bases

The Development of Higher Education Research in Europe Barbara M. Kehm,Christine Musselin,2013-10-30 Though the book is a contribution to celebrate the 25th anniversary of the Consortium of Higher Education Researchers CHER it is not just about the history of the organisation as such The contributions provide an account of the emergence of higher education as a field of study and research in Europe its institutionalisation and its relationships to higher education policy and practice Furthermore higher education research in Europe is contrasted to and contextualised by

the example of higher education research and scholarship in Australia The book is useful as an account about the emergence and development of higher education research as a field of study and research in Europe It will be an interesting and insightful read for all scholars and young researchers wanting to know about higher education research but also for scholars in fields like history of science disciplinary differentiation institutionalisation of fields of knowledge and research **State**

and Market in Higher Education Reforms Hans G. Schuetze, Germán Álvarez Mendiola, Diane Conrad, 2012-09-05

Universities have never been static Even so it is fair to say they have experienced a most radical transformation in the past twenty years During this period the role and responsibility of the state generally have been broadly limited while allowing market forces private ownership and control more influence But even where the state is still the main provider or funder it relies increasingly on market mechanisms for example contractual relations between state and institutions competition among providers for resources and external assessment of outputs which means the results or impact of what universities do in particular teaching and research The new terminology speaks of price and competition inputs and outputs resources cost and benefits demand and supply provider and customer consumers and investors quality control and accountability Education and post secondary education especially are increasingly seen as matters for markets Formal post secondary education becomes a service commercialized and traded across national borders This volume on changing relationship between state and market contains besides an introductory analytic overview of the issues accounts from different countries regions and thematic perspectives Chapter authors describe and analyze government reforms and other developments that have directly or indirectly affected this relationship Although the geographical focus is on North America especially Mexico South East Asia and Europe the phenomenon is not limited to these regions and countries but worldwide **Resources in**
