Latin American Development and Public Policy Stuart S. Nagel,2016-07-27 This book analyzes various important aspects of methodology and substance regarding economic social and political policy in Latin America directed toward achieving more effective efficient and equitable societal institutions The chapters are authored by experts from within Latin America and also from Latin America research institutes elsewhere The book combines practical policy significance with insightful causal and prescriptive generalizations The emphasis is on the role of governmental decision making and the important but secondary role of the marketplace social groups and engineering *World Development Report 2020* World Bank,2019-11-27 Global value chains GVCs powered the rapid expansion of international trade after 1990 Countries import not only for domestic consumption but also to export and transactions typically involve long term firm to firm relationships rather than anonymous spot market transactions Trade and the rise of GVCs enabled an unprecedented convergence poor countries grew faster and began to catch up with richer countries More than 1 billion people escaped poverty as a result Since the Great Recession the growth of trade has been sluggish and the expansion of GVCs has slowed down At the same time potentially serious threats have emerged to the model of labor intensive trade led growth New labor saving technologies could draw production closer to the consumer and reduce demand for labor And trade conflict among large countries could lead to a retrenchment of supply chains or a segmentation of GVCs The World Development Report WDR 2020 Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs It concludes that technological change is at this stage more a boon than a curse GVCs can continue to boost growth create better jobs and reduce poverty provided that developing countries implement deeper reforms and industrial countries pursue open predictable policies **Internal Migration Systems in the Developing World** Robert N. Thomas,John Melton Hunter,1980 **The Urban Caribbean** Alejandro Portes,Carlos Dore y Cabral,Patricia Landolt,1997-06-03 A study of urbanization in five countries Costa Rica Haiti Guatemala the Dominican Republic and Jamaica during the 1980s and 1990s when the region s economy shifted from one heavily dependent on imports to one directed more to producing exports The Urban Caribbean studies urbanization in five countries Costa Rica Haiti Guatemala the Dominican Republic and Jamaica

during the 1980s and 1990s when the region's economy shifted from one heavily dependent on imports to one directed more to producing exports. This shift caused producers and entrepreneurs to rely more on microenterprises, thus challenging the informal economy networks of the central cities. Sociologist Alejandro Portes and the other contributors use rich in-depth data to examine both qualitative and quantitative changes in these five countries. Their research method allows them to make generalizations applicable to all five economies while retaining the concreteness of the similarities and differences that make each country unique. This volume is an incentive to other collaborative efforts to chart the paths taken by the countries of Latin America and the Caribbean as they seek to accommodate to the new global political and economic context. The message of the volume is a convincing one. Because of similarities in the trends affecting countries of the region and policy debates, each country can benefit from the experiences of the others. However, the differences in political structure and in the nature of citizenship mean that social and economic policy debates must take into account the national context from the Foreword by Bryan Roberts, University of Texas at Austin.

Caribbean Studies, 1973 **Current Perspectives in Latin American Urban Research** Alejandro Portes, Harley L. Cuadrado-Roura, Patricio Aroca, 2014-01-07

This contributed volume is the first book in English to offer a current and critical vision of regional problems and policies in the countries of Latin America. The book is in three main parts: a general overview of regional processes and trends in Latin America as a whole; country-level coverage of seven individual countries; and comparative analyses of common major problems such as migration, education, labor, poverty, decentralization, exports, and foreign direct investments. Written by renowned academics and experts from the region, the book seeks to provide a better understanding of regional challenges and trends, regional disparities that exist in many Latin American countries, and the increasing importance of metropolitan areas.

Beginning with volume 41, 1979, the University of Texas Press became the publisher of the *Handbook of Latin American Studies*, the most comprehensive annual bibliography in the field. Compiled by the Hispanic Division of the Library of Congress and annotated by a corps of more than 130 specialists in various disciplines, the *Handbook* alternates from year to year between social sciences and humanities. The *Handbook* annotates works on Mexico, Central America, the Caribbean, and the Guianas, Spanish South America, and Brazil, as well as materials covering Latin America as a whole. Most of the subsections are preceded by introductory essays that serve as biannual evaluations of the literature and research under way in specialized areas. The *Handbook of Latin American Studies* is the oldest continuing reference work in the field. Katherine D. McCann is acting editor for this volume. The subject categories for Volume 57 are as follows: Electronic Resources for the Social Sciences; Anthropology; Economics; Geography; Government and Politics; International Relations; Sociology. *Research Guide to Costa*
