Congress. Senate. Judiciary, 1969 **Power Moves** Kyle Shelton, 2018-01-10

Since World War II Houston has become a burgeoning internationally connected metropolis and a sprawling car dependent city. In 1950 it possessed only one highway the Gulf Freeway which ran between Houston and Galveston. Today Houston and Harris County have more than 1 200 miles of highways and a third major loop is under construction nearly thirty miles out from the historic core. Highways have driven every aspect of Houston's postwar development from the physical layout of the city to the political process that has transformed both the transportation network and the balance of power between governing elites and ordinary citizens. *Power Moves* examines debates around the planning, construction and use of highway and public transportation systems in Houston. Kyle Shelton shows how Houstonians helped shape the city's growth by attending city council meetings, writing letters to the highway commission and protesting the destruction of homes to make way for freeways which happened in both affluent and low income neighborhoods. He demonstrates that these assertions of what he terms infrastructural citizenship opened up the transportation decision making process to meaningful input from the public and gave many previously marginalized citizens a more powerful voice in civic affairs. *Power Moves* also reveals the long lasting results of choosing highway and auto based infrastructure over other transit options and the resulting challenges that Houstonians currently face as they grapple with how best to move forward from the consequences and opportunities created by past choices.

The Newspaper Preservation Act United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Antitrust and Monopoly, 1969 *Newspaper Preservation Act* United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Antitrust and Monopoly, 1969. Considers S 1520 to exempt from the antitrust laws certain combinations and arrangements necessary for the survival of failing newspapers.

Electricity Pricing in Transition Ahmad Faruqui, Kelly Eakin, 2002-09-30. *Electricity Pricing in Transition* is written to address the new issues facing utilities, retailers, regulators and customers in the changing electricity market. It is organized into five sections. Section I deals with the new restructured organization that has emerged from yesterday's vertically integrated regulated monopoly company. Section II deals with issues in competitive pricing. Section III reviews the role of demand response and product design in today's chaotic marketplace. Given the single importance of California's energy crisis and the fact that it will be studied for years to come, Section IV is devoted to studying the lessons learned from this crisis. The final section of the book deals with markets and regulations. This book will provide practitioners with guidance on how to avoid the major pitfalls in pricing electricity while the market is in transition by drawing upon the insights and lessons learned from the experience of others that are documented in this book.
