The Urban Public Sector and Urban Crime Daryl A. Hellman, 1980 Urban Crime Prevention Miguel

Saraiva, 2022-10-28 This book provides an original cross thematic and wide scope review of crime prevention processes in urban areas that are explicitly based on the cooperation between different scientific and professional fields. Focusing primarily on environmental and community based crime prevention this book compiles a peer reviewed collection of papers and prospective essays that explore how and to what extent multi disciplinaryity can be used as a cornerstone for achieving safer cities. Relying on the input from specialists, researchers, decision makers and practitioners from around the world it covers the various stages from theory to implementation by discussing theoretical stances, interpreting policy and planning guidelines, uncovering unique educational experiences and narrating insights and lessons learned from innovative research and practice. Hence it provides vivid discussions and invaluable insights into processes of partnership building, planning and management oriented towards establishing successful mechanisms for preventing crime and reducing feelings of insecurity in urban areas.

Urban Crime and Social Disorganization in China Haiyan Xiong, 2015-10-19 The book selects Guangzhou which has the highest crime rate in China as a research site to study patterns of crime and social disorganization. It combines methods of content analyses with ethnographic fieldwork. The research first selected 1422 crime cases reported by the influential Southern Metropolis Daily in 2013 to identify the general crime distribution pattern. The findings suggest that both spatial and demographic density distribution of criminal cases in Guangzhou show a gradient circle pattern from city center to suburb. Focusing on three selected typical communities the thesis finds important patterns of crime and social disorganization that are very different from Western research. These findings are organized according to major correlates of social disorganization including unemployment, marriage and family, residential stability, ethnic heterogeneity, social equality, social capital, social control, social isolation and social exclusion, community cohesion, trust and fear, traditions, morals and beliefs, language. These findings extend and elaborate Social Disorganization Theory in urban China. This book can be used as a textbook for college and Ph D students majoring in law and sociology as well as a reference book for professionals in related fields. Although academic this book is written in such a way that it will also appeal to a general audience.

Inequality, Crime and Public Policy integrates and interprets the vast corpus of existing research on social class, slums and crime and presents its own findings on these matters. It explores two major questions. First, do policies designed to redistribute wealth and power within capitalist societies have effects upon crime? Second, do policies created to overcome the

residential segregation of social classes have effects on crime The book provides a brilliantly comprehensive and systematic review of the empirical evidence to support or refute the classic theories of Engles Bonger Merton Cloward and Ohlin Cohen Miller Shaw and McKay amongst many others Braithwaite confronts these theories with evidence of the extent and nature of white collar crime and a consideration of the way law enhancement and law enforcement might serve class interest

Fear of Crime Greta W. Salem,Dan A. Lewis,2016-04-30 Mass incarceration and lower crime rates have not made city dwellers feel safe Programs designed to deal with this problem focus on increased police protection In this study Lewis and Salem question the validity of these assumptions and the effectiveness of this approach Their five year investigation challenged theories that focused only on the psychological responses to victimization and failed to take into account the social and political environments within which such fears are created From a social control perspective which informs their research and analysis the authors examined the fear of crime in ten neighborhoods in Chicago San Francisco and Philadelphia which represent the range of communities typically found in urban areas The authors contend that fear of crime

is not related to exposure or knowledge about criminal events alone but also stems from residents concerns about changes in their neighborhoods Many people they argue are afraid of crime because they believe that they have lost control over their local communities Their conclusions remain as valid as when this book was first published in 1986 Lewis and Salem consider ways to restore the control that community residents feel they have lost and consider the possibilities for a more equitable distribution of security in urban areas Urban Politics, Crime Rates, and Police Strength Thomas Dain Stucky,2005 Stucky criminal justice Indiana Purdue U at Indianapolis analyzes the relationship between politics crime and police employment expenditures and arrests Using political resource theory he examines how resources are managed and provides an institutional resource perspective about crime and politics while discussing social disorganization **Governmental**

Planning Nancy Brooks,Kieran Donaghy,Gerrit-Jan Knaap,2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a

discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics Crime Philip Bean,2003
