Public service content Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2007-11-15 In March 2006 the Government published its White Paper on the BBC A public service for all the BBC in the digital age Cm 6763 ISBN 9780101676328 which set out the framework for the BBC's role as a public service broadcaster over the next ten years Given the concerns that have been raised over the future sustainability of the current public service broadcasting

system the Committee's report examines a range of issues including the prospects for maintaining plurality in public service broadcasting in the digital age the practicality of continuing to impose public service obligations on commercial broadcasters the viability of existing funding models for ITV Channel 4 and Five and the case for public funding of broadcasters in addition to the BBC Amongst its findings although the Committee notes its overall confidence in the viability of most types of public service content it recognises that some content is already coming under pressure and that this is likely to increase over time The report argues that the BBC should not be left as the only supplier of public service content in any area of programming as the maintenance of plurality is an important public policy objective Public funding using licence fee income or general taxation should be made available to all broadcasters on a contestable basis to bring the benefits of competition to the provision of public service content that the market might not otherwise provide such as UK produced children's programming or regional programming

Public Policy and Economic Competition in Japan Michael L. Article 81 EC and Public Policy Christopher Townley, 2009-09-22 This book discusses the role of public policy in Article 81 of the EC Treaty The Commission and recently the Court of First Instance have said that the sole objective of Article 81 EC is consumer welfare Many competition lawyers and economists support this view Writing in a crisp plain style Townley demonstrates that public policy considerations are still relevant in that provision He also examines how and where they are currently considered and then suggests why how and where this might be changed The book explains how some of the most complex competition law cases can be understood and offers a framework for those fighting or deciding such cases in the future As such it will be of interest to European competition lawyers both academics and practitioners furnishing them with a framework for hard cases

as well as students seeking a deeper understanding of how the European competition rules work and how they interact both with European Union and Member State public policy goals It will also help competition economists by revealing the mechanisms through which public policy considerations impact upon the consumer welfare test in European law

[A Framework for European Competition Law](#) Christopher Townley, 2018-11-29 This book asks whether the current push to increase uniformity in substantive and procedural competition policy and enforcement in Europe as well as in related institutional structures is desirable It focuses on European Union EU competition policy and enforcement related to Articles 101 and 102 TFEU and the merger rules, the equivalent rules in the Member States and the relationships between these different legal orders Uniformity has many benefits yet the advantages of diversity are also legion, enabling more policy experimentation and innovation and improving the ability to accommodate national preferences Contrary to the overwhelming view of academics, practitioners and regulators in this area, the book argues that uniformity is insufficient and examines ways of achieving a better mix of uniformity and diversity the EU's motto is United in Diversity To achieve this better mix, the book offers a new framework for European competition law: Coordinated Diversity Finally, this book discusses whether Coordinated Diversity fits with the current legal order in the EU as well as the EU constitutional settlement more generally and suggests some ways that it might be made compatible with this order with relative ease The book's impact could be significant, changing the results in individual cases, the way cases are argued and what information is relevant More importantly, it builds the theoretical foundations for fundamentally altering the way in which the EU and the Member States' competition authorities interact

allowing space for disagreement and uncertainty The aim is to improve the efficiency and effectiveness of competition policy making and enforcement in Europe It should also increase the legitimacy in this field rebalancing towards the Member States Coordinated Diversity provides a new way of seeing the EU that better blends difference when this is demanded with uniformity and its benefits as necessary A timely and ambitious work this book will be read with interest by all practitioners and academics interested in EU competition law as well as the related fields of political science and economics

Complexity and the Art of Public Policy David Colander, Roland Kupers, 2016-02-16 How ideas in complexity can be used to develop more effective public policy Complexity science made possible by modern analytical and computational advances is changing the way we think about social systems and social theory Unfortunately economists policy models have not kept up and are stuck in either a market fundamentalist or government control narrative While these standard narratives are useful in some cases they are damaging in others directing thinking away from creative innovative policy solutions Complexity and the Art of Public Policy outlines a new more flexible policy narrative which envisions society as a complex evolving system that is uncontrollable but can be influenced David Colander and Roland Kupers describe how economists and society became locked into the current policy framework and lay out fresh alternatives for framing policy questions Offering original solutions to stubborn problems the complexity narrative builds on broader philosophical traditions such as those in the work of John Stuart Mill to suggest initiatives that the authors call activist laissez faire policies Colander and Kupers develop innovative bottom up solutions that through new institutional structures such as for benefit corporations channel individuals social instincts into solving societal problems making profits a tool for change rather than a goal They argue that a central role for government in this complexity framework is to foster an ecostructure within which diverse forms of social entrepreneurship can emerge and blossom *The Economics and Regulation of Digital Markets* Frank Fagan, James Langenfeld, 2023-12-11 Presenting new findings and perspectives from leading international scholars on three critical areas of developing government policies Digital markets and their regulation the divergence of expert and public views on European democracy and the effects of firing notification procedures on wage growth [Policy Framework on Sound Public Governance Baseline Features of Governments that Work Well](#) OECD, 2020-12-22 The interconnected challenges of our times call for a coherent and multidimensional approach to public governance The OECD Policy Framework on Sound Public Governance provides governments at all levels with an integrated diagnostic guidance and benchmarking tool that aims to improve the quality of public governance an objective that takes on immediate strategic importance for governments as they strive to manage the COVID 19 crisis and plan for a sustainable and inclusive recovery *EU Sports Law and Breakaway Leagues in Football* Katarina Pijetlovic, 2015-02-02 Katarina Pijetlovic is the first author to address the issue of breakaway leagues in football and their treatment under EU law In this book she guides the reader through EU sports law the specificities of the sporting industry and the problems and power struggles in European football governance in the context of

the breakaway threats by elite clubs In order to analyse the legality of UEFA clauses that restrict the formation of such breakaway structures the author first provides a progressive interpretation of the applicable EU sports law and an in depth analytical review of EU sports cases decided under internal market and competition provisions including a novel perspective on the UEFA home grown rule and the Bosman case Thereafter she sets out an original theory of convergence between TFEU provisions on competition and the internal market in the light of sporting exceptions Finally in applying the legal principles thus outlined Katarina Pijetlovic explores the legality of the restrictive UEFA clauses and the case for the formation of alternative leagues in European football under EU sports law A number of surprising outcomes emerge from this analytical process Conversely she also tests the largely neglected issue of the legality of forming a breakaway league by the European elite football clubs The systematic way in which the reader is guided through EU sports law and the legal issues under consideration makes the book accessible for EU lawyers as well as non EU sports lawyers on both an academic and a practitioner s level Katarina Pijetlovic holds licentiate and doctoral degrees in EU sports law from the University of Helsinki The book appears in the ASSER International Sports Law Series under the editorship of Dr David McArdle Prof Ben Van Rompuy and Marco van der Harst LL M

Global Competition David Gerber, 2012-01-26 Global competition now shapes economies and societies in ways unimaginable only a few years ago and competition or antitrust law is a key component of the legal framework for global competition These laws are intended to protect competition from distortion and restraint and on the national level they reflect the relationships between markets their participants and those affected by them The current legal framework for the global economy is provided however by national laws and institutions This means that those few governments that have sufficient power to apply their laws to conduct outside their own territory provide the norms of global competition This has long meant that the US and more recently the EU structure global competition but China and other countries are increasingly using their economic and political leverage to apply their own competition laws to global markets The result is increasing uncertainty costs and conflicts that burden global economic development This book examines competition law on the global level and reveals its often complex and little understood dynamics It focuses on the interactions between national and international legal regimes that are central to these dynamics and a key to understanding them Part I examines the evolution of the current global system the factors that have shaped it how it operates today and recent efforts to alter that system e g by including competition law in the WTO Part II focuses on national competition law systems revealing how national laws and experiences shape global competition law dynamics and how global factors in turn shape national laws and experiences It examines the central roles of US and European law and experience and it also pays close attention to countries such as China that are playing increasingly important roles in the global competition law arena Part III analyzes current strategies for improving the legal framework for global competition and identifies the factors that may contribute to a system that more effectively supports global economic and political development This analysis also

suggests a pathway for moving toward that goal
