Public Realm Exploring The City's Quintessential Social Territory:

The Public Realm Lyn H. Lofland, A great number of children and adolescents face a world of violence and isolation. The contributors to this book describe in detail an innovative intervention and prevention method pair therapy that is designed to address these issues by helping children develop healthy interpersonal relationships. *The Public Realm* Lyn H. Lofland, 2017 This book is about the public realm defined as a particular kind of social territory that is found almost exclusively in large settlements. This particular form of social psychological space comes into being whenever a piece of actual physical space is dominated by relationships between and among persons who are strangers to one another as often occurs in urban bars, buses, plazas, parks, coffee houses, streets and so forth. More specifically, the book is about the social life that occurs in such social psychological spaces, the normative patterns and principles that shape it, the relationships that characterize it, the aesthetic and interactional pleasures that enliven it, and the forces—anti-urbanism, privatism, post-war planning and architecture—that threaten it. The data upon which the book's analysis is based are diverse: direct observation, interviews, contemporary photographs, historic etchings, prints, and photographs, and historical maps, histories of specific urban public spaces or spatial types, and the relevant scholarly literature from sociology, environmental psychology, geography, history, anthropology, and architecture and urban planning and design. Its central argument is that while the existing body of accomplished work in the social sciences can be reinterpreted to make it relevant to an understanding of the public realm, this quintessential feature of city life deserves much more; it deserves to be the object of direct scholarly interest in its own right. Choice noted that The author's writing style is unusually accessible and the often fascinating narrative is generously supported by well-chosen photos. Provided by publisher. ***The SAGE Handbook of Grounded Theory* Antony Bryant, Kathy Charmaz, 2010-01-21** Grounded Theory is by far the most widely used research method across a wide range of disciplines and subject areas including social sciences, nursing, and healthcare, medical sociology, information systems, psychology, and anthropology. This handbook gives a comprehensive overview of the theory and practice of Grounded Theory, taking into account the many attempts to revise and refine Glaser and Strauss' original formulation and the debates that have followed. Antony Bryant, Kathy Charmaz bring together leading researchers and practitioners of the method from the US, the UK, Australia, and Europe to represent all the major standpoints within Grounded Theory, demonstrating the richness of the approach. The contributions cover a wide range of perspectives on the method, covering its features and ramifications, its intricacies in use, its demands on the skills and capabilities of the researcher, and its position in the domain of research methods. ***The SAGE Handbook of Grounded Theory* is an indispensable reference source for academics and researchers across many disciplines who want to develop their understanding of the Grounded Theory method.** ***Creating the Unequal City* Talja Blokland, Carlotta Giustozzi, Daniela Krüger, Hannah Schilling, 2016-04-14** Cities can be seen as geographical imaginaries; places have meanings attributed so that they are perceived, represented, and interpreted in a

particular way We may therefore speak of cityness rather than the city the city is always in the making It cannot be grasped as a fixed structure in which people find their lives and is never stable through agents designing courses of interactions with geographical imaginations This theoretical perspective on cities is currently reshaping the field of urban studies requiring new forms of theory comparisons and methods Meanwhile mainstream urban studies approaches neighbourhoods as fixed social spatial units producing effects on groups of residents Yet they have not convincingly shown empirically that the neighbourhood is an entity generating effects rather than being the statistical aggregate where effects can be measured This book challenges this common understanding and argues for an approach that sees neighbourhood effects as the outcome of processes of marginalisation and exclusion that find spatial expressions in the city elsewhere It does so through a comparative study of an unusual kind Sub Saharan Africans second generation Turkish and Lebanese girls and alcohol and drug consumers some of them homeless arguably some of the most disadvantaged categories in the German capital Berlin in inner city neighbourhoods and middle class families in owner occupied housing This book analyses urban inequalities through the lens of the city in the making where neighbourhood comes to play a role at some times in some practices and at some moments but is not the point of departure Sustainable Built Environment Deepak Bajaj,Thayaparan

Gajendran,Sanjay Patil,2024-02-22 This book presents the select proceedings of International Conference on Sustainable Built Environment ICSBE 2023 It discusses the issues of sustainability and resilience in all types of building projects construction projects operational building and infrastructure projects within urban regions of the world The key themes covered in this book are sustainable urban planning sustainable construction real estate housing net zero built environment climate change policy legal framework climate finance technology and innovation toward decarbonization of the built environment This book is useful for researchers and professionals working in the fields of construction management built environment and allied fields **Captured by the City** Blagovesta Momchedjikova,2013-12-05 Captured by the City

volume provides readers interested in urban history with a collection of essays on the evolution of public space in that paradigmatic western city which is Rome Scholars specialized in different historical periods contributed chapters in order to find common themes which weave their way through one of the most complex urban histories of western civilization Divided into five chronological sections Antiquity Middle Ages Renaissance Baroque Modern and Contemporary the volume opens with the issue of how public space was defined in classical Roman law and how ancient city managers organized the maintenance of these spaces before moving on to explore how this legacy was redefined and reinterpreted during the Middle

Agnes The third group of essays examines how the imposition of papal order on feuding families during the Renaissance helped introduce a new urban plan which could satisfy both functional and symbolic needs The fourth section shows how modern Rome continued to express strong interest in the control and management of public space the definition of which was necessarily selective in this vastly extensive city The collection ends with an essay on the contemporary debate for revitalizing Rome's eastern periphery Through this long term chronological approach the volume offers a truly unique insight into the urban development of one of Europe's most important cities and concludes with a discussion of the challenges public space faces today after having served for so many centuries as a driving force in urban history Mystery of Graffiti Kerun Li, 2025-07-11

Cities as Multiple Landscapes Christina Antenhofer, Günter Bischof, Robert L. Dupont, Ulrich Leitner, 2016-10-13 Im Zentrum dieses Buches stehen Geschichte Materialität Mikrolandschaften und Atmosphäre der Partnerstädte Innsbruck und New Orleans Dabei setzen sich die Autorinnen und Autoren auf das Konzept der multiplen Landschaften Netspaces Katharine S. Willis, 2017-05-15 The focus of this book is on understanding and explaining the way that our increasingly networked world impacts on the legibility of cities that is how we experience and inhabit urban space It reflects on the nature of the spatial effects of the networked and mediated world from mobile phones and satnavs to data centres and wifi nodes and discusses how these change the very nature of urban space It proposes that netspaces are

the spaces that emerge at the interchange between the built world and the space of the network It aims to be a timely volume for both architectural urban design and media practitioners in understanding and working with the fundamental changes in built space due to the ubiquity of networks and media This book argues that there needs to be a much better understanding of how networks affect the way we inhabit urban space The volume defines five characteristics of netspaces and defines in detail the way that the spatial form of the city is affected by changing practices of networked world It draws on theoretical approaches and contextualises the discussion with empirical case studies to illustrate the changes taking place in urban space This readable and engaging text will be a valuable resource for architects urban designers planners and sociologists for understanding how of networks and media are creating significant changes to urban space and the resulting implications for the design of cities **Urban waterfronts and cultural heritage** Dimitra Babalis,Tim G.

Townshend,2018-03-07 Approaches to urban waterfront conservation have been much debated in recent decades Early schemes focused on leisure and commercial exploitation more recently greater attention has been paid to environmental and ecological conditions historic preservation and human well being But how do we balance these competing interests and yet ensure sustainable change preserve identity and yet allow for new development And how do we involve local people This book aims to provide some answers to these important questions The book is divided into three parts Part One is an overview for regeneration and awareness of historic waterfronts Part Two argues for the sustainable reuse of important sites to preserve their special identity Part Three shows the importance of introducing young researchers to the complexities of designing waterfronts for sustainable lifestyles **Wiring the Streets, Surfing the Square** Timothy Jachna,2021-03-18
