Public Sector Decentralization:

Public Sector Reform in Developing and Transitional Countries Christopher Rees, Farhad Hossain, 2013-09-13 Over recent decades decentralization has emerged as a key Public Sector Reform strategy in a wide variety of international contexts Yet despite its emergence as a ubiquitous activity that cuts across disciplinary lines in international development decentralization is understood and applied in many different ways by parties acting from contrary perspectives This book offers a fascinating insight into theory and practice surrounding decentralization activities in the Public Sectors of developing and transitional countries In drawing on the expertise of established scholars the book explores the contexts achievements progress and challenges of decentralization and local governance Notably the contributions contained in this book are genuinely international in nature the chapters explore aspects of decentralization and local governance in contexts as diverse as Ghana Hong Kong India Indonesia Kazakhstan Morocco Tanzania Uganda and Viet Nam In summary by examining the subject of decentralization with reference to specific developing and transitional Public Sector contexts in which it has been practiced this book offers an excellent contribution towards a better understanding of the theory and practice of decentralization and local governance in international settings This book was published as a special double issue of the International Journal of Public Administration

Public Sector Decentralization Jerry M. Silverman, 1992-01-01 This paper is addressed to a broad audience of development professionals who are interested in both the substance of decentralisation issues and their impact on economic development The paper summarises experience with alternative decentralisation arrangements and suggests a new analytical framework for assessing the impact of such arrangements on the performance of economic development programmes and projects Consideration of alternative forms of decentralisation reveals the need to clarify and establish priorities among economic and political objectives The potential for conflict among multiple objectives and the need to assess decentralisation policies in terms of acceptable trade offs among those objectives summarises the importance of this paper

Managing Public Services Richard Common, Norman Flynn, Elizabeth Mellon, 2016-06-06 Managing Public Services Competition and Decentralization is intended for public sector managers to help them assess their situation and assist them to think creatively about different approaches for the future The book begins on the general principle that business is good and bureaucracy is bad This topic is followed by detailed studies of organizations whether these are in a competitive environment victims of market rhetoric or in another competitive spectrum Public sector managers are then encouraged to analyze their own organizations so appropriate actions can be applied into their situation The extent to which competition is happening is explained and if competition does not work well then the concept of decentralization may be adopted To what extent decentralization can then be used to increase the motivation and commitment of their employees is explained The authors believe that new ways and methods of working will follow But any successes of these changes have to be measured by an

important gauge the impact upon the recipients of the new and improved services In any undertaking failures are bound to happen and the authors suggest that public sector managers should be more tolerant Finally the book notes that to achieve delivery of quality service whether these are for customers or clients an important approach to managerial action is the design towards a good experience Public administrators heads and CEOs of public institutions and private firms professors and students in public administration policymakers and sociologists will find this book valuable **Rethinking**

So,Michael Woolcock,Leah April,Caroline Hughes,2018-08-31 Reforming public sector organizations their structures policies processes and practices is notoriously difficult in rich and poor countries alike Even in the most favorable of circumstances the scale and complexity of the tasks to be undertaken are enormous requiring levels of coordination and collaboration that may be without precedent for those involved Entirely new skills may need to be acquired by tens of thousands of people Compounding these logistical challenges is the pervasive reality that circumstances often are not favorable to large scale reform Whether a country is rich or poor the choice is not whether but how to reform the public sector how optimal design characteristics robust political support and enhanced organizational capability to implement and adapt will be forged over time This edited volume helps address the how question It brings together reform experiences in public financial management and the public sector more broadly from eight country cases in East Asia Cambodia Indonesia Lao People s Democratic Republic Malaysia Myanmar Papua New Guinea Thailand and Vietnam These countries are at different stages of reform most of the reform efforts would qualify as successes while some had mixed outcomes and others could be considered failures The focus of each chapter is less on formally demonstrating success or not of specific reform but on documenting how reformers maneuvered within different country contexts to achieve specific outcomes Despite the great difficulty in reforming the public sector decision makers can draw renewed energy and inspiration learning from those countries sectors and subnational spaces where substantive not merely cosmetic change has been achieved and they can identify what pitfalls to avoid **Decentralization Or Fiscal Autonomy?** Serdar Yilmaz,Jean-Philippe Meloche,2004 **Effects of Increasing the**

Level of Decentralization on a Public Sector Service Organization Bruce F. St. Denis,1990 **Decentralization and Public Sector Efficiency** Akhmad Syakir Kurnia,2013 Theoretical literature claims that improved efficiency is considered as the main outcome expected from a decentralized system of public service provision Hence analysing public sector efficiency

provides the de facto measure of the ability of decentralized local government in internalizing the benefits of fiscal and political decentralization. However, the outcome of decentralization does not always fit with the theoretical claims. First, there are always externalities arising from spillovers between localities that should be taken into account and set against improved accountability. Second, decentralization may paradoxically diminish accountability in a situation where local governments enjoy a degree of cohesiveness with central government. Cohesiveness of interest groups at the local level is high and local voter ignorance is also high. Third, lack of democratic institutions and norms that essentially complement electoral democratization have been an obstruction to improved accountability. This happens particularly in young democratized countries. This book investigates public sector efficiency in the decentralized Indonesia within its political and institutional arrangements.

Fiscal Decentralization Reforms Michal Plaček, František Ochmana, Milan Jan Půček, Juraj Nemec, 2020-05-05. This book examines the impacts of fiscal decentralization reforms on the efficiency of local governments in Central and Eastern European CEE countries. By offering a comparative perspective and by applying econometric methods and regression models, it analyses various reform trajectories and their effects on individual CEE countries. Furthermore, the book discusses input and output indicators for evaluating the efficiency of municipalities. Readers will learn about the common features of these countries, the impact of path dependence, and future prospects for decentralization reforms. In closing, the book discusses modern management and administration methods, opportunities for cooperation between municipalities, co-creative service delivery, and other measures that could improve the efficiency of public service provision.

Rahemtulla, Rainer Rohdewohld, 2022-10-12. Since its adoption in 2015, the 2030 Agenda on Sustainable Development has shaped not only international development cooperation but also the design of national trajectories for social and economic development. In tandem with other global agendas adopted that year, such as the Paris Agreement on Climate Change and UN Habitat's New Urban Agenda, it remains the global and regional blueprint for sustainable development despite the COVID-19 pandemic. The term 'localizing the Sustainable Development Goals' (SDGs) has been used to capture the importance of subnational governments for achieving national SDG agendas. However, there is little deeper analysis of the required nexus between fiscal, political, and legal arrangements for SNGs, their involvement in national policy arenas which discuss and decide on national SDG strategies, and the need for locally disaggregated data systems on the one hand and effective SDG localization strategies on the other hand. It is this aspect which the present publication explores in greater detail by using country examples and conceptual analyses. The text will be

This volume investigates the missing link the complicated realities of the relations between governance and development through case studies of ASEAN countries Its main objective is to explore a theoretical framework to overcoming the limitations of mainstream approaches by employing case studies on decentralization crisis management corporate governance and foreign aid management of both public and private entities From the beginning of the 1990s onwards the international aid community has increasingly stressed that good governance together with democracy and protection of basic human rights is indispensable for sustainable economic development The terms however are complex broad and arguable They largely refer to discipline of government institutions and the capacity of the public sector While a wide variety of empirical studies has been done on the relations between good governance and development it is still unclear how the
