Orientalism and the Operatic World Nicholas Tarling, 2015-04-23 Western opera is a globalized and globalizing phenomenon and affords us a unique opportunity for exploring the concept of orientalism the subject of literary scholar Edward Said's modern classic on the topic Nicholas Tarling's Orientalism and the Operatic World places opera in the context of its steady globalization over the past two centuries In this important survey Tarling first considers how the Orient appears on the operatic stage in Britain France Germany Russia and the United States before exploring individual operas according to the region of the Orient in which the work is set Throughout Tarling offers key insights into such notable operas as George Frideric Handel's Berenice Giuseppe Verdi's Aida Giacomo Puccini's Madama Butterfly Pietro Mascagni's Iris and others Orientalism and the Operatic World argues that any close study of the history of Western opera in the end fails to support the notion propounded by Said that Westerners inevitably stereotyped dehumanized and ultimately sought only to dominate the East through art Instead Tarling argues that opera is a humanizing art one that emphasizes what humanity has in common by epic depictions of passion through the vehicle of song Orientalism and the Operatic World is not merely for opera buffs or even first time listeners It should also interest historians of both the East and West scholars of international relations and cultural theorists
