Pulmonary and Antiallergic Drugs John P. Devlin, 1985 This outlines the current state of the art in the development of pulmonary and antiallergic drugs and discusses practical applications It reviews the advances made in our understanding of the pathophysiology and biochemical mechanisms of asthma and allergic rhinitis over the past 15 years The book critically evaluates the in vivo pharmacological models of allergy the significance of species variation and the potentials they hold for future development

**Respiratory Disease** Anne E. Tattersfield, Martin W. McNicol, 2012-12-06 Respiratory Disease the latest volume in the Treatment in Clinical Medicine series is in two parts the first reviews the background to each of the main respiratory diseases with particular emphasis on management and treatment The second reviews the main drugs used in respiratory practice in more detail and combines a pharmacological appraisal with a more personal assessment of their role and value in treatment Practical aspects of management are emphasised Where uncertainty exists the authors have described their own practice The book aims to fill the gap which exists between textbooks of respiratory medicine where there is often insufficient space to cover treatment in detail and pharmacological textbooks which are not concerned with practical management problems It is intended for respiratory physicians general physicians and senior medical students and will provide useful background information for researchers entering the field

Mast Cells, Mediators and Disease Stephen T. Holgate, 2012-12-06 In 1879 Paul Ehrlich first described the mast cell as a tissue fixed cell containing many granules which when stained with basic dyes such as toluidine blue changed the colour spectrum of the dye in a process called metachromasia Since this early description pathologists physicians and pharmacologists have been fascinated by this cell on account of its central involvement in human allergic diseases Approximately four decades after Ehrlich's first description of the mast cell Prausnitz and Kiistner reported their pioneer experiment demonstrating that the immediate skin wheal response to allergen could be passively transferred with serum They named the antigen specific serum factor reagin A further four and one half decades had to pass before the connection between the mast cell and reagin could be made with the identification of reagin as an immunoglobulin E by Johansson and Ishizaka and its unique property to bind with high affinity to specific receptors on mast cells and basophils Meanwhile in the 1920s Coca published a series of papers in which he described the clinical features of acute allergic responses and first used the term atopy This together with the fundamental pharmacological studies of Sir Henry Dale in identifying histamine as one mediator of the acute anaphylactic reaction provided the second approach which eventually linked the mast cell to allergic tissue reactions Indeed it was Best working in Dale's group who first showed that histamine was a chemical stored in mast cells

addresses all systems of the body and their related common conditions with clear accessible directions outlining how a practitioner can understand health from a naturopathic perspective and apply naturopathic medicines to treat patients individually. These treatments include herbal medicine, nutritional medicine, and lifestyle recommendations. All chapters are structured by system and then by condition so readers are easily able to navigate the content by chapter and heading structure. The content is designed for naturopathic practitioners and students both undergraduate and postgraduate levels and for medical and allied health professionals with an interest in integrative naturopathic medicine. Detailed coverage of naturopathic treatments provides readers with a solid understanding of the major therapeutic modalities used within naturopathic medicine. Each system is reviewed from both naturopathic and mainstream medical perspectives to correlate the variations and synergies of treatment. Only clinically efficacious and evidence-based treatments have been included. Information is rigorously researched, over 7500 references from both traditional texts and recent research papers. The content skilfully bridges traditional practice and EBM to support confident practitioners within the current health care system.
