Darwinian Feminism and Early Science Fiction Patrick B Sharp, 2018-03-28 Darwinian Feminism in Early Science Fiction provides the first detailed scholarly examination of women's SF in the early magazine period before the Second World War Tracing the tradition of women's SF back to the 1600s the author demonstrates how women such as Margaret Cavendish and Mary Shelley drew critical attention to the colonial mindset of scientific masculinity which was attached to scientific institutions that excluded women In the late

nineteenth century Charles Darwin's theory of sexual selection provided an impetus for a number of first wave feminists to imagine Amazonian worlds where women control their own bodies relationships and destinies Patrick B Sharp traces how these feminist visions of scientific femininity Amazonian power and evolutionary progress proved influential on many women publishing in the SF magazines of the late 1920s and early 1930s and presents a compelling picture of the emergence to prominence of feminist SF in the early twentieth century before vanishing until the 1960s Science-fiction Everett Franklin Bleiler, Richard Bleiler, 1998 *Complementing Science Fiction The Early Years* which surveys science fiction published in book form from its beginnings through 1930 the present volume covers all the science fiction printed in the genre magazines *Amazing Astounding* and *Wonder* along with offshoots and minor magazines from 1926 through 1936 This is the first time this historically important literary phenomenon which stands behind the enormous modern development of science fiction has been studied thoroughly and accurately The heart of the book is a series of descriptions of all 1 835 stories published during this period plus bibliographic information Supplementing this are many useful features detailed histories of each of the magazines an issue by issue roster of contents a technical analysis of the art work brief authors biographies poetry and letter indexes a theme and motif index of approximately 30 000 entries and general indexes *Science Fiction The Gernsback Years* is not only indispensable for reference librarians collectors readers and scholars interested in science fiction it is also of importance to the study of popular culture during the Great Depression in the United States Most of its data which are largely based on rare and almost unobtainable sources are not available elsewhere *Science Fiction and Fantasy Research Index*, 1985 **Sisters of Tomorrow** Lisa Yaszek, Patrick B. Sharp, 2016-06-07 Anthology of stories essays poems and illustrations by the women of early science fiction For nearly half a century feminist scholars writers and fans have successfully challenged the notion that science fiction is all about boys and their toys pointing to authors such as Mary Shelley Clare Winger Harris and Judith Merrill as proof that women have always been part of the genre Continuing this tradition *Sisters of Tomorrow The First Women of Science Fiction* offers readers a comprehensive selection of works by genre luminaries including author C L Moore artist Margaret Brundage and others who were well known in their day including poet Julia Boynton Green science journalist L Taylor Hansen and editor Mary Gnaedinger Providing insightful commentary and context this anthology documents how women in the early twentieth century contributed to the pulp magazine community and showcases the content they produced including short stories editorial work illustrations poetry and science journalism Yaszek and Sharp's critical annotation and author biographies link women's work in the early science fiction community to larger patterns of feminine literary and cultural production in turn of the twentieth century America In a concluding essay the award winning author Kathleen Ann Goonan considers such work in relation to the history of women in science and engineering and to the contemporary science fiction community itself *World Wrecker* Richard W.
