

What are the types of pumps and their uses.

Types of pumps.

The type of pump, as well as how it is selected depends primarily on the purpose of its use, the use of pumps depends mainly on the type of liquid to be pumped, the desired distance to move the liquid, and the amount you need to obtain a certain time frame, however

it is not easy to determine the type of pump according to its use For a specific purpose only, pumps can be categorized into two types that operate in very different ways and generally summarize most pump design.
