Punishment And Civilization Penal Tolerance And Intolerance In Modern Society:

Punishment and Civilization, 2002 Punishment and civilization examines how a framework of punishment that suited the values and standards of the civilized world came to be set in place from around 1800 to the late 20th century **The SAGE Handbook of Punishment and Society** Jonathan Simon, Richard Sparks, 2012-09-18 The project of interpreting contemporary forms of punishment means exploring the social political economic and historical conditions in the society in which those forms arise The SAGE Handbook of Punishment and Society draws together this disparate and expansive field of punishment and society into one compelling new volume Headed by two of the leading scholars in the field Jonathan Simon and Richard Sparks have crafted a comprehensive and definitive resource that illuminates some of the key themes in this complex area from historical and prospective issues to penal trends and related contributions through theory literature and philosophy Incorporating a stellar and international line up of contributors the book addresses issues such as capital punishment the civilising process gender diversity inequality power human rights and neoliberalism This engaging vibrantly written collection will be captivating reading for academics and researchers in criminology penology criminal justice sociology cultural studies philosophy and politics Norbert Elias and Empirical Research T. Landini, F. Dépelteau, 2014-07-17 Norbert Elias has been recognized as one of the key social scientists of the 20th century at least in sociology political science and history This book will address Norbert Elias's approach to empirical research the use of his work in empirical research and compare him with other theorists **Placing the Border in Everyday Life** Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations within and beyond the state's territory Nevertheless it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done Similarly border work is more likely to be done by particular people than others This book investigates the diffusion of bordering narratives and practices by asking who borders and how Placing the Border in Everyday Life complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done By combining a new theorization of border work beyond the state with rich empirical case studies this book makes a ground breaking contribution to the study of borders and the state in the era of globalization **Empires and Boundaries** Harald Fischer-Tiné, Susanne Gehrman, 2008-11-19 Empires and Boundaries Rethinking Race Class and Gender in Colonial Settings is an exciting collection of original essays exploring the meaning and existence of conflicting and coexisting hierarchies in colonial settings With investigations into the colonial past of a diversity of regions including South Asia South East Asia and Africa the dozen notable international scholars collected here offer a truly interdisciplinary approach to

understanding the structures and workings of power in British French Dutch German and Italian colonial contexts Integrating a historical approach with perspectives and theoretical tools specific to disciplines such as social anthropology literary and film studies and gender studies Empires and Boundaries Rethinking Race Class and Gender in Colonial Settings is a striking and ambitious contribution to the scholarship of imperialism and post colonialism and an essential read for anyone interested in the revolution being undergone in these fields of study

The Preventive Turn in Criminal Law Henrique Carvalho, 2017-04-28 This book presents a theoretical examination of the rise and expansion of preventive criminal offences that has gained momentum in Anglo American criminal justice since the late twentieth century It shows how recent transformations in criminal law and justice are intrinsically related to and embedded in the way liberal society and liberal law have been imagined developed and conditioned by their social political and historical contexts The book starts by identifying a tension within contemporary criminal law between the importance given

to the expression of individual autonomy and responsibility and the perceived need for prevention as a condition for the security of autonomy and the promotion of welfare The book then traces this tension back to an intrinsic ambivalence within the modern conception of individual liberty which is both repressed and preserved by liberal conceptions of responsibility and punishment It finds that it is this tension that ultimately grounds the rise of preventive criminal offences in recent times The Preventive Turn in Criminal Law engages with the main contemporary literature on criminal law prevention risk security and criminalisation by deploying a theoretical perspective from both classical and contemporary works of social and political theory including the works of Hobbes Locke Hegel and Bentham It does so in order to reveal that the pervasiveness of prevention in twenty first century criminal law not only represents the consequence of new and unprecedented features of contemporary politics and society but also embeds long established features of the liberal legal and political tradition

Pain and Retribution David Wilson, 2014-03-15 Today the Tower of London is a tourist site home only to the crown jewels but not long ago the imposing structure held traitors political prisoners and more often on their way to the chopping block Even outside of this famous building prisons have changed radically since the Norman Conquest in 1066 In the first book on the history of prisons in Britain former prison governor and professor of criminology David Wilson offers unrivaled insight into the penal system in England Scotland and Wales charting the rise and fall of forms of punishments that take place behind their walls Pain and Retribution explores prisons as an institution and examines how they are designed organized and managed Wilson reveals that prisons have to satisfy the demands of three interested parties the public from politicians and media commentators to everyday citizens the prison staff and the prisoners themselves He shows how prevailing concerns and issues of the times allow one faction or another to have more power at varying points in history and he considers how prisons are unable to satisfy all three at the same time leading to the system being seen as a failure despite rising numbers of prisoners and growing funds invested in keeping them incarcerated With intriguing comparisons between the prisons of New York City and Britain and searching questions about the purposes of the current penal system Pain and Retribution provides unparalleled access to prison landings staffs and the people behind the locked doors *Decolonising Criminology* Harry Blagg, Thalia Anthony, 2019-11-23 This book undertakes an exploratory exercise in decolonizing criminology through engaging postcolonial and postdisciplinary perspectives and methodologies Through its historical and political analysis and place based case studies it challenges criminological inquiry by installing colonial structures of power at the centre of the contemporary criminological debate This work unseats the Western nation state as the singular point of departure for comparative criminological and socio legal research Decolonising Criminology argues that postcolonial and postdisciplinary critique can open up new pathways for criminological investigation It builds on recent debates in criminology from outside of the Anglosphere The authors deploy a number of heuristic devices perspectives and theories generally ignored by criminologists of the Global North and engage perspectives concerned with articulating new decolonised epistemologies of

the Global South This book disputes the view that colonisation is a thing of the past and provides lessons for the Global North

Serious Offenders Barry S. Godfrey, David J. Cox, Stephen Farrall, 2010 *Serious Offenders A Historical Study of Habitual Criminals* examines the persistent offending careers of men and women operating in northwest England between the 1840s and 1940s The book focuses on a group of serious and persistent offenders who as well as offending in the region had lengthy offending careers spanning several decades in various other locations These were highly mobile persistent serious offenders who appear not to have been so closely bound in to the processes and structures which aided desistance from offending for the vast majority of the petty offenders The authors discuss questions such as Why did some people remain minor offenders whilst others developed into serious offenders What were the triggers which propelled previously minor offenders towards persistent serious criminality What part did changes in criminal legislation play in these processes They conclude by drawing on the lessons to be learnt for today's debates about the regulation and surveillance of serious habitual offenders

Peculiar Institution David Garland, 2011-02-01 The U S death penalty is a peculiar institution and a uniquely American one Despite its comprehensive abolition elsewhere in the Western world capital punishment continues in dozens of American states a fact that is frequently discussed but rarely understood The same puzzlement surrounds the peculiar form that American capital punishment now takes with its uneven application its seemingly endless delays and the uncertainty of its ever being carried out in individual cases none of which seem conducive to effective crime control or criminal justice In a brilliantly provocative study David Garland explains this tenacity and shows how death penalty practice has come to bear the distinctive hallmarks of America's political institutions and cultural conflicts America's radical federalism and local democracy as well as its legacy of violence and racism account for our divergence from the rest of the West Whereas the elites of other nations were able to impose nationwide abolition from above despite public objections American elites are unable and unwilling to end a punishment that has the support of local majorities and a storied place in popular culture In the course of hundreds of decisions federal courts sought to rationalize and civilize an institution that too often resembled a lynching producing layers of legal process but also delays and reversals Yet the Supreme Court insists that the issue is to be decided by local political actors and public opinion So the death penalty continues to respond to popular will enhancing the power of criminal justice professionals providing drama for the media and bringing pleasure to a public audience who consumes its chilling tales Garland brings a new clarity to our understanding of this peculiar institution and a new challenge to supporters and opponents alike

[Police Courts in Nineteenth-Century Scotland, 2-volume set](#) David G. Barrie, Susan Broomhall, 2022-07-30 Taking the form of two companion volumes *Police Courts in Nineteenth Century Scotland* represents the first major investigation into the administration experience impact and representation of summary justice in Scottish towns c 1800 to 1892 Each volume explores diverse but complementary themes relating to judicial practices relationships experiences and discourses through the lens of the same subject matter the police court Volume 1 subtitled *Magistrates*

Media and the Masses provides an institutional social and cultural history of the establishment development and practice of police courts. It explores their rise, purpose and internal workings and how justice was administered and experienced by those who attended them in a variety of roles. Special attention is given to examining how courtroom discourse was represented in print culture, the role of the media in providing a discursive commentary on summary justice and the ways in which magistrates and the police engaged in a law and order dialogue with the press. Throughout, consideration is given to uncovering the relationship between magistrates, the courts, the police and the wider community and to charting the implications of the rise of summary justice and the police man state for the urban masses as evidenced through prosecution, conviction and punishment patterns.

Volume 2, subtitled *Boundaries, Behaviours and Bodies*, examines through themed case studies how these civic and judicial institutions shaped conceptual, spatial, temporal and commercial boundaries by regulating every day activities, pastimes and cultures. As with Volume 1, *Boundaries, Behaviours and Bodies* is attentive to the relationship between magistrates, the police, the media and the wider community, but here the main focus of analysis is on the role and impact of the police courts through their practice on cultural ideas, social behaviours and environments in the nineteenth century city.

Transnational Penal Cultures Vivien Miller, James Campbell, 2014-11-13 Focusing on three key stages of the criminal justice process discipline punishment and desistance and incorporating case studies from Asia the Americas Europe Africa and Australia the thirteen chapters in this collection are based on exciting new research that explores the evolution and adaptation of criminal justice and penal systems largely from the early nineteenth century to the present They range across the disciplinary boundaries of History Criminology Law and Penology Journeying into and unlocking different national and international penal archives and drawing on diverse analytical approaches the chapters forge new connections between historical and contemporary issues in crime prisons policing and penal cultures and challenge traditional Western democratic historiographies of crime and punishment and categorisations of offenders police and ex offenders The individual chapters provide new perspectives on race gender class urban space surveillance policing prisonisation and defiance and will be essential reading for academics and students engaged in the study of criminal justice law police transportation slavery offenders and desistance from crime Crime in England 1880-1945 Barry Godfrey, 2013-10-30 This book is an ambitious attempt to map the main changes in the criminal justice system in the Victorian period through to the twentieth century Chapters include an examination of the growth and experience of imprisonment policing and probation services the recording of crime in official statistics and in public memory and the possibilities of research created by new electronic and on line sources an exploration of time space and place on crime and the growth internationalisation and science led approach of crime control methods in this period Unusually the book presents these issues in a way which illustrates the sources of data that informs modern crime history and discusses how criminologists and historians produce theories of crime history Consequently there are a series of interesting and lively debates of a thematic nature which will engage historians

criminologists and research methods specialists as well as the undergraduates and school students that like the author are fascinated by crime history *The Anthem Companion to Norbert Elias* Stephen Mennell, Alex Law, 2023-08-08 The book presents an authoritative assessment of Norbert Elias 1897 1990 It recognizes Elias as one of the major contributors to the development of sociological tradition in the past century and charts the continuing relevance of his conception of sociology for contemporary society Only toward the end of his career as an academic did Elias s work begin to attract the attention of English speaking sociologists historians and scholars of cultural studies The book provides an authoritative and broad representation of Elias s oeuvre and work inspired by it While Elias is best known for his major study of *The Civilizing Process* the reach and subtle depths of Elias s conception of process sociology has been cemented more recently by the English language publication of Elias s collected work of 18 volumes The baton of process sociology is being passed on to further generations of sociologists Chapters from leading contributors outline the nature of the sociological practice of Elias and address fundamental questions of historical sociology democratization gender racialization processes and embodiment Later chapters highlight the contribution of process sociology for understanding developments in nation state and global sociology criminology art and education **The Arts of Imprisonment** Leonidas K. Cheliotis, 2016-12-05 The arts spanning the visual design performing media musical and literary genres constitute an alternative lens through which to understand state sanctioned punishment and its place in public consciousness Perhaps this is especially so in the case of imprisonment its nature its functions and the ways in which these register in public perceptions and desires have historically and to some extent inherently been intertwined with the arts But the products of this intertwinement have by no means been constant or uniform Indeed just as exploring imprisonment and its public meanings through the lens of the arts may reveal hitherto obscured instances of social control within or outside prisons so too it may uncover a rich and possibly inspirational archive of resistance to them This edited collection sheds light both on state use of the arts for the purposes of controlling prisoners and the broader public and the use made of the arts by prisoners and portions of the broader public as tools of resistance to penal states The book also includes a number of chapters that address arts in prisons programmes making distinctive contributions to the literature on their philosophy formation operation effectiveness and research evaluation as well as taking care to explore the politics surrounding and underpinning these multiple themes
