Punishment And Social Structure:

Punishment and Social Structure Otto Kirchheimer, 2017-09-29 Why are certain methods of punishment adopted or rejected in a given social situation To what extent is the development of penal methods determined by basic social relations The answers to these questions are complex and go well beyond the thesis that institutionalized punishment is simply for the protection of society While today s punishment of offenders often incorporates aspects of psychology psychiatry and sociology at one time there was a more pronounced difference in criminal punishment based on class and economics Punishment and Social Structure originated from an article written by Georg Rusche in 1933 entitled Labor Market and Penal Sanction Thoughts on the Sociology of Criminal Justice Originally published in Germany by the Frankfurt Institute of Social Research this article became the germ of a theory of criminology that laid the groundwork for all subsequent research in this area Rusche and Kirchheimer look at crime from an historical perspective and correlate methods of punishment with both temporal cultural values and economic conditions The authors classify the history of crime into three primary eras the early Middle Ages in which penance and fines were the predominant modes of punishment the later Middle Ages in which harsh corporal punishment and capital punishment moved to the forefront and the seventeenth century in which the prison system was more fully developed They also discuss more recent forms of penal practice most notably under the constraints of a fascist state The majority of the book was translated from German into English and then reshaped by Rusche s co author Otto Kirchheimer with whom Rusche actually had little discussion While the main body of Punishment and Social Structure are Rusche s ideas Kirchheimer was responsible for bringing the book more up to date to include the Nazi and fascist era Punishment and Social Structure is a pioneering work that sets a paradigm for the study of crime and punishment

Punishment and Social Structure Georg Rusche, Otto Kirchheimer, Dario Melossi, 2003-01-01 Why are certain methods of punishment adopted or rejected in a given social situation To what extent is the development of penal methods determined by basic social relations The answers to these questions are complex and go well beyond the thesis that institutionalized punishment is simply for the protection of society While today s punishment of offenders often incorporates aspects of psychology psychiatry and sociology at one time there was a more pronounced difference in criminal punishment based on class and economics Punishment and Social Structure originated from an article written by Georg Rusche in 1933 entitled Labor Market and Penal Sanction Thoughts on the Sociology of Criminal Justice Originally published in Germany by the Frankfurt Institute of Social Research this article became the germ of a theory of criminology that laid the groundwork for all subsequent research in this area Rusche and Kirchheimer look at crime from an historical perspective and correlate methods of punishment with both temporal cultural values and economic conditions The authors classify the history of crime into three primary eras the early Middle Ages in which penance and fines were the predominant modes of punishment the later Middle Ages in which harsh corporal punishment and capital punishment moved to the forefront and the seventeenth century

in which the prison system was more fully developed They also discuss more recent forms of penal practice most notably under the constraints of a fascist state The majority of the book was translated from German into English and then reshaped by Rusche's co-author Otto Kirchheimer with whom Rusche actually had little discussion While the main body of *Punishment and Social Structure* are Rusche's ideas Kirchheimer was responsible for bringing the book more up to date to include the Nazi and fascist era *Punishment and Social Structure* is a pioneering work that sets a paradigm for the study of crime and punishment

from the mundane and narrow contours within which they are so often discussed and relocates them at the forefront of public policy This book will become a landmark study Andrew Rutherford Legal Studies This is a superbly intelligent study Its comprehensive coverage makes it a genuine review of the field Its scholarship and incisiveness of judgment will make it a constant reference work for the initiated and its concluding theoretical synthesis will make it a challenge and inspiration for those undertaking research and writing on the subject As a state of the art account it is unlikely to be bettered for many a year Rod Morgan British Journal of Criminology Winner of both the Outstanding Scholarship Award of the Crime and Delinquency Division of the Society for the Study of Social Problems and the Distinguished Scholar Award from the American Sociological Association s Crime Law and Deviance Section *Punishment and Social Structure* Dario Melossi,1989

rates of incarceration in relation to the transformations of neoliberal capitalism Bringing together leading researchers from diverse geographical contexts this book reframes the theoretical field of the political economy of punishment analysing penalty within the current economic situation and connecting contemporary penal changes with political and cultural processes It challenges the traditional and common sense understanding of imprisonment as exclusion and posits a more promising concept of imprisonment as a differential or subordinate form of inclusion This groundbreaking book will be a key text for scholars who are working in the field of punishment and society as well as reaching a broader audience within law sociology economics criminology and criminal justice studies

The Capacity to Punish Henry N. Pontell, 1985-02-22 This book examines the relationship between crime demographic characteristics criminal justice resources court processing and final sanctioning outcomes at the court level in the U S in the context of deterrence theory It concludes that current criminal justice practices especially the extremely low probability of certain and severe punishment make the deterrent effect of punishment minimal under the current system of criminal justice Court caseloads influenced particularly by the degree of inequality in the population appear to be pushing down the formal penalty structures and hence the probability of sanction The inability of courts to produce severe and certain sanctions is also linked to the overfunding of police relative to other criminal justice agencies especially the office of the prosecutor Putting more cops on the beat might actually lead to further erosion of the deterrent effect of punishment as more violators are pushed through the revolving door of the courts

Radical and Marxist Theories of Crime Paul B. Stretesky, 2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level explanations of criminal behavior radical and Marxist criminology emphasizes power inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and criminal justice processes reinforce power structures and contribute to class control
