Punitive Measures:

People Resourcing Stephen Taylor, 2005 *People Resourcing* is the leading textbook for students taking the CIPD People Resourcing module. The text provides a highly practical and accessible text for students taking modules in this area. All the main elements of people resourcing are examined in detail. There is a particular focus on human resource planning, recruitment, advertising, performance management, dismissal and redundancy, and retirement. A wide range of examples drawn from different sectors and occupational groups illustrate the core concepts. The author is one of the CIPD's national examiners for Leadership and Management and has a wide range of experience as an examiner and lecturer in the Human Resource Management area. **Transforming penal institutions from punitive to reform centers** WOSUKIRA

VICTOR, 2024-06-11 This book *Transforming Penal Institutions From Punitive to Reform Centers* delves into the critical shift needed in our approach to criminal justice. Moving away from punitive measures towards rehabilitation and reintegration, this book explores the multifaceted aspects of reforming penal institutions to create spaces that foster growth, healing, and societal reintegration.

Disciplinary Measures from the Metrical Psalms to Milton Kenneth J.E. Graham, 2016-02-26 *Disciplinary Measures from the Metrical Psalms to Milton* studies the relationship between English poetry and church discipline in four carefully chosen bodies of poetry written between the Reformation and the death of John Milton. Its primary goal is to fill a gap in the field of Protestant poetics which has never produced a study focused on the way in which poetry participates in and reflects on the post-Reformation English Church's attempts to govern conduct. Its secondary goal is to revise the understandings of discipline which social theorists and historians have offered and which literary critics have largely accepted. It argues that knowledge of the early modern culture of discipline illuminates some important poetic traditions and some major English poets, and it shows that this poetry in turn throws light on verbal and affective aspects of the disciplinary process that prove difficult to access through other sources, challenging assumptions about the means of social control, the structures of authority, and the practical implications of doctrinal change. More specifically, *Disciplinary Measures* argues that while poetry can help us to understand the oppressive potential of church discipline, it can also help us to recover a more positive sense of discipline as a spiritual cure.

Crimes of Punishment Theodore L. Dorpat, 2007 This groundbreaking book by an award-winning psychoanalyst and forensic psychiatrist presents a comprehensive exploration of a timely but often taboo topic: the failure of punishment to deter crime and violence, an issue that affects us both individually and as a culture. Written at the culmination of the author's fifty-year career as a psychoanalyst, forensic psychologist, and scholar, this wide-ranging work identifies the origins of violence and investigates the surprising consequences of punishment from a multitude of perspectives. In his treatment of the topic, Dr. Dorpat utilizes scientific research, ethical reasoning, and his vast clinical experience and insight. He also suggests the benefits of new and emerging humane alternatives to the revenge punishment model currently entrenched in our society, such as restorative justice. In contrast to most contemporary measures

these new approaches while still imprisoning dangerous individuals effectively stress reparation and forms of sanctioning other than incarceration When restitution replaces revenge everyone benefits Crimes of Punishment examines four key interrelated social methods of punishment These are 1 the corporal punishment of children 2 the incarceration of adults in prisons 3 capital punishment the death penalty and 4 emotional verbal abuse As he elucidates and analyzes each of these forms of punishment Dr Dorpat clearly and logically makes the case that punishment is not only ineffectual but that it also engenders more of what it ostensibly aims to stop violence and misbehavior Both children and adults who are subjected to punishment tend to become more violent individuals In covering the full scope of our contemporary justice system Dr Dorpat brings to the forefront those who are often overlooked or dismissed the victims of crime His concluding chapters present and clarify the psychological wounds and needs of these individuals and demonstrate how restorative justice is effective in attending to victims in an ethical and healing manner In a humane and ethically evolved society restitution replaces punishment Market Comparison Crimes of Punishment is unique in that it covers not just one but four different types of punishment the corporal punishment of children the incarceration of adults the death penalty and verbal emotional abuse Two earlier books written by psychiatrists expose the terrible conditions in America's prisons They are The Crime of Punishment New York Viking 1968 by Karl Menninger and Prison Madness by Terry Kupers San Francisco Jossey Bass 1999 This book differs in two important ways from the books written by Menninger and Kupers First The Crimes of Punishment covers other kinds of punishment while those authors deal only with the punishment of incarceration Secondly the reforms they recommend are merely piecemeal modifications of the present criminal justice systems whereas Dr Dorpat argues for a radical change that includes the abolition of today's punitive prison Retributive Justice system and the establishment of a new and different system namely Restorative justice a system that has been developed over the past decade in Australia and New Zealand The Crimes of Punishment differs from Menninger's book in covering the many changes that have occurred in prisons since 1968 In several short chapters on restorative justice the book also explores this exciting new approach and serves as an informed introduction to a new important and effective moral approach to the treatment of criminals

Remedies in International Human Rights Law Dinah Shelton, 2000 This is the first comprehensive treatment of the topic of remedies for human rights violations and reviews the jurisprudence of international tribunals on these violations It also provides a theoretical framework and a practical guide for lawyers judges and academics interested in human rights law

In Our Best Interest Jason Hanna, 2018-09-21 When if ever is it permissible to intervene in a person's affairs for his or her own good This in essence is the moral problem of paternalism Many consider paternalism morally objectionable In this book Jason Hanna argues boldly for an alternative pro paternalist view that intervention is permissible so long as it serves the best interest of the person subject to it without thereby wronging others To Hanna the moral debate over paternalism is most fundamentally a debate about the weight and relevance of a certain kind of reason or rationale for intervention In arguing

that paternalistic rationales provide valid and weighty reasons Hanna considers the objections that paternalism is disrespectful that it wrongly imposes values on people that it violates individual rights and that it is likely to be misapplied or abused He argues that each of these objections fails to demonstrate that there is anything distinctively problematic about paternalism Moreover he attempts to situate pro paternalism within a popular rights based moral theory Hanna shows that popular alternatives to pro paternalism confront serious problems of their own especially insofar as they attempt to distinguish permissible intervention on behalf of incompetent persons from impermissible intervention on behalf of competent adults Although the book's central aim is to defend a moral view it suggests how this view can be fruitfully applied in a number of real world contexts

Preventive Justice Andrew Ashworth, Lucia Zedner, 2014-03-27 This book arises from a three year study of Preventive Justice directed by Professor Andrew Ashworth and Professor Lucia Zedner at the University of Oxford The study seeks to develop an account of the principles and values that should guide and limit the state's use of preventive techniques that involve coercion against the individual States today are increasingly using criminal law or criminal law like tools to try to prevent or reduce the risk of anticipated future harm Such measures include criminalizing conduct at an early stage in order to allow authorities to intervene incapacitating suspected future wrongdoers and imposing extended sentences or indefinite on past wrongdoers on the basis of their predicted future conduct all in the name of public protection and security The chief justification for the state's use of coercion is protecting the public from harm Although the rationales and justifications of state punishment have been explored extensively the scope limits and principles of preventive justice have attracted little doctrinal or conceptual analysis This book reassesses the foundations for the range of coercive measures that states now take in the name of prevention and public protection focussing particularly on coercive measures involving deprivation of liberty It examines whether these measures are justified whether they distort the proper boundaries between criminal and civil law or whether they signal a larger change in the architecture of security In so doing it sets out to establish a framework for what we call

Preventive Justice **Restorative Justice** Heather Strang, John Braithwaite, 2017-09-19 The astonishing development of restorative justice practice over the past decade has inspired creative new thinking about the philosophy of punishment and principles of justice Many of the questions raised in this book such as the relationship between restorative and retributive justice and the values and processes which should guide restorative practice are the subject of intense debates With contributions from many of the most distinguished scholars in the field this book analyzes the gap between philosophy and practice and the need for practice to be more informed by philosophy This volume is a milestone in the development of those underlying principles which will direct the progress of restorative justice in the future **Theories of Punishment** Barrett Williams, ChatGPT, 2025-08-26 Unlock the complexities of justice with Theories of Punishment a compelling exploration of how societies respond to crime This comprehensive eBook delves into the philosophical and practical realms of punitive systems providing a nuanced understanding of the forces that shape justice around the globe Begin with an enlightening historical overview that sets the stage for an in depth analysis of the major theories of punishment Discover the moral foundations of Retribution where justice seeks balance and addresses wrongdoing in its classical and modern interpretations Dive into the logic behind Deterrence and explore how the fear of consequences is used to prevent crime alongside an evaluation of its effectiveness Explore Rehabilitation as a transformative perspective where crime is viewed through the lens of social reform rather than mere retribution This book examines historic shifts and contemporary practices that illuminate how societies aim to reintegrate offenders The examination of America s justice system reveals the integration of these theories into law the balance they strike and the pivotal cases that have shaped legal precedents Journey through a cross cultural examination of punitive practices from Western approaches to global traditions offering insights into how various cultures address justice Delve into Restorative Justice as an alternative focusing on healing and reconciliation Theories of Punishment does not shy away from the controversies and ethical debates that embroil the justice system today Discover the impact of technology on surveillance and deterrence the psychological dimensions of punishment and the future innovations that promise to reshape our understanding of justice This eBook serves as a thought provoking guide for anyone interested in the philosophies that underpin our legal systems Whether you re a legal scholar or simply curious about justice Theories of Punishment provides the keys to understanding the dynamics shaping our world today **Objectivity and the Rule of Law** Matthew Kramer, 2007-06-11 What is objectivity What is the rule of law Are the operations of legal systems objective If so in what ways and to what degrees are they objective Does anything of importance depend on the objectivity of law These are some of the principal questions addressed by Matthew H Kramer in this lucid and wide ranging study that introduces readers to vital areas of philosophical enquiry As Kramer shows objectivity and the rule of law are complicated phenomena each comprising a number of distinct though overlapping dimensions Although the connections between objectivity and the rule of law are intimate they are also densely multi faceted **Fear of Crime and Punitiveness** Helmut Kury, 2013 As a subject

area of inquiry and research fear of crime and punitiveness have played an increasingly important role in criminology Since the early 1990s and emanating largely from within the United States there has been a growing body of research as well as increased attention given to the subject by the media and policy makers In part triggered by the fact that the United States has the highest imprisonment rate approx 780 100 000 in 2012 in the Western world and still has the death penalty in most states increasing attention has been paid to the impact of peoples perceptions of crime their fear of possible victimization and their sense of punitivity towards offenders And although the body of literature on fear of crime and punitivity has been growing there still remain many regions and countries of the world where there is a dearth of such research This collection includes several of the countries where such research represents the first of its kind The reader will be provided a broad overview of the subject and presented with varied observations about fear of crime and punitivity from different parts of the world As the project represents a novel and exploratory venture into the subject area the collective content provided in this collection will hopefully also serve to advance future research and inform sentencing policy and initiatives to address fear of crime This volume includes seven comparable reports in which the contributors used a common standardized survey to collect data on fear of crime and punitivity among post secondary students The countries represent a cross section of different legal political and cultural systems The countries also vary in their degree of criminal justice development and in terms of the rights of victims In each of the contributions the authors provide an overview of their country before discussing the results of the survey they administered The articles are prepared in a manner that allow varying degrees of comparison as well as recommendations for the future direction of this relatively new area of international inquiry Cover Gentle Measures in the Management and Training of the Young Jacob Abbott,1871 *Gentle Measures in the management and training of the young ... The Injustice of Punishment Bruce N. Waller, 2017-10-19 The Injustice of Punishment emphasizes that we can never make sense of moral responsibility while also acknowledging that punishment is sometimes unavoidable Recognizing both the injustice and the necessity of punishment is painful but also beneficial It motivates us to find effective means of minimizing both the use and severity of punishment and encourages deeper inquiry into the causes of destructive behavior and how to change those causes in order to reduce the need for punishment There is an emerging alternative to the comfortable but destructive system of moral responsibility and just deserts That alternative is not the creation of philosophers but of sociologists criminologists psychologists and workplace engineers it was developed tested and employed in factories prisons hospitals and other settings and it is writ large in the practices of cultures that minimize belief in individual moral responsibility The alternative marks a promising path to less punishment less coercive control deeper common commitment and more genuine freedom
