pose a serious threat to the capacity of human populations to maintain themselves in a sustainable environment In this important book Pablo Servigne and Rapha l Stevens confront these issues head on They examine the scientific evidence and show how its findings often presented in a detached and abstract way are connected to people s ordinary experiences joining the dots as it were between the Anthropocene and our everyday lives In so doing they provide a valuable guide that will help everyone make sense of the new and potentially catastrophic situation in which we now find ourselves Today utopia has changed sides it is the utopians who believe that everything can continue as before while realists put their energy into making a transition and building local resilience Collapse is the horizon of our generation But collapse is not the end it s the beginning of our future We will reinvent new ways of living in the world and being attentive to ourselves to other human beings and to all our fellow creatures
