Liability for Pure Economic Loss in Europe, 200? **Comparative Law in Eastern and Central Europe** Aleksander W. Bauknecht, Branisław Sitek, Jakub J. Szczerbowski, 2014-07-24 Comparative law is a research methodology which has been increasingly fashionable in recent decades as comparisons between common law and civil law have dominated the law studies landscape There are many methods of comparative law in use including comparison of legal rules comparison of cases and comparison of legal theories Each of these methods has strong proponents and opponents Dogmatic comparisons of rules are criticized for not giving the whole picture of law in action but praised for being the first and the only truly legal step in comparative research Case based comparisons are praised for enabling us to compare the true understanding of rules by courts yet the critics of this method point out that only the higher courts decisions are subject to comparison and most cases do not reach this stage Finally comparisons of legal theories are praised for enabling us to know the spirit of the laws

yet opponents would argue that many countries sharing the same theory would draw opposite conclusions from it This book is a result of the attempted and successful introduction of comparative law into the region of Eastern and Central Europe The subject has induced interest beyond expectations This volume opens with a chapter on the unification of law both from the perspective of institutional unification by such supra state organizations spontaneous and institutionalized unifications between two or more legal systems and the methods of choosing the right rules in the unification process Chapters two and three follow the classical division of private and public law as proposed by the brilliant Roman lawyer Ulpian Overall the chapters in this book offer an interesting and engaging commentary on the current topics discussed by academics in Eastern and Central Europe

The Interaction of Contract Law and Tort and Property Law in Europe Christian von Bar, Ulrich Drobnig, 2009-04-27 Against the background of the creation of an EU wide frame of reference for private law relevant to the Common Market this study which was requested by the EU Commission analyses the dovetailing between contract and tort law on the one hand and between contract and property law on the other The study examines the legal orders of almost all the Member States of the EU illustrates the differences between contractual and non contractual liability and evaluates the different systems of the transfer of property of movable and immovable securities as well as trust law The study comes to the conclusion that the intensive considerations on the creation of a model law in the area of European private law do not allow these thoughts to be limited to contract law Such a limitation to the scope of the regarding of this area would probably cause more problems than it would solve or at any rate not do justice to the needs of the Common Market

Tort Law in Greece Eugenia Dacoronia, 2023-04-20 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides ready access to how the legal dimension of prevention against harm and loss allocation is treated in Greece

This traditional branch of law not only tackles questions which concern every lawyer whatever his legal expertise but also concerns each person's most fundamental rights on a worldwide scale. Following a general introduction that probes the distinction between tort and crime and the relationship between tort and contract, the monograph describes how the concepts of fault and unlawfulness and of duty of care and negligence are dealt with in both the legislature and the courts. The book then proceeds to cover specific cases of liability such as professional liability, liability of public bodies, abuse of rights, injury to reputation and privacy, vicarious liability, liability of parents and teachers, liability for handicapped persons, product liability, environmental liability, and liability connected with road and traffic accidents. Principles of causation, grounds of justification, limitations on recovery, assessment of damages and compensation, and the role of private insurance and social security are all closely considered. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for lawyers in Greece. Academics and researchers will also welcome this very useful guide and will appreciate its value not only as a contribution to comparative law but also as a stimulus to harmonization of the rules on tort.

French Civil Liability in Comparative Perspective Jean-Sébastien Borghetti, Simon Whittaker, 2019-12-26. The French law of torts or of extra contractual liability is widely seen as exceptional. For long it was based on a mere five articles of the Civil Code of 1804, but on this foundation the courts and legal scholars have constructed liabilities for fault and strict liability of an extraordinary breadth and significance. While the rest of the general law of obligations, including contract in the Civil Code, was reformed in 2016 by executive ordinance, this area was left aside, being the subject in 2017 of a proposal by the French Government for the legislative reform of the law of civil liability, a new legislative category to include both contractual and extra contractual liability. This work considers important aspects of this developing area of French law in a series of essays by French lawyers and comparative lawyers working in French law and other civil law systems. In doing so, it provides insight into the doctrinal thinking and judgments of French lawyers as well as the possible directions in which this area of the law may be developed in the future.

Managing Environmental Risks through Insurance Katarzyna Malinowska, Dorota Maśniak, 2024-04-08. This book identifies the role of insurance in a comprehensive system for managing environmental risks at the local, regional, and global level. National and international legal instruments regulating environmental protection, especially aspects like pollution, are not precisely reflected in insurance concepts intended to cover environmental risks. As such, there is a need to identify environmental risks and to propose a taxonomy of environmental risks for various types of insurance coverage. The authors refer to the issues of liability in environmental protection, the scope of insurance coverage, and comment on specific issues the importance of which has been noticed by the legislator or insurance practice. The book examines these issues horizontally and vertically from various standpoints, focusing on insurance as a means of managing environmental risks. In this regard, it mainly concentrates on 1. identifying and analyzing environmental risks and methods for managing them via private and public instruments and 2.

insuring these risks The book is intended for all those interested in the field of insurance and environmental risk regimes including lawyers academics and legal professionals **European Contract Law** Bénédicte Fauvarque-Cosson, Denis Mazeaud, 2009-04-27 The Association Henri Capitant des Amis de la Culture Juridique Française and the Société de législation comparée joined the academic network on European Contract Law in 2005 to work on the elaboration of a common terminology and on guiding principles as well as to propose a revised version of the Principles of European Contract Law PECL The results of this work were sent to the European Commission and have already been published in French The English translation is now being published by Sellier & LePailleur This work could contribute to the wider European project The part on the guiding principles could be a component of the CFR in the form of black letter model rules or recitals The part on terminology is in itself useful for the elaboration of the final various linguistic versions of the CFR It finds its place within the materials which will accompany the model rules Last but by no means least the revised version of the PECL should be considered by the European institutions as an alternative set of model rules on contract law
