Purism And Language:

The Politics of Language Purism Björn H. Jernudd, Michael J. Shapiro, 2011-07-11 No detailed description available for The Politics of Language Purism **Linguistic Purism** Olivia Walsh, 2016-08-25 This book represents the first in depth comparative investigation of linguistic purism in modern French It investigates the relative prevalence of purist ideology in France and Quebec Both experience influence from English and have similar language legislation but they differ in their social political and economic history Three different levels of society are examined official group and individual allowing a comparison of the voice from above and the voice from below This is a key element in recent discussions of language planning but is rarely provided in studies of French The study is also the first to apply to empirical data Thomas s widely cited theoretical framework for describing linguistic purism 1991 and has evaluated and refined this enhancing the theoretical underpinnings of the field The book will be of interest not only to French scholars and sociolinguists but also to scholars of language planning language policy and language ideologies in all languages Linguistic Purism George Thomas, 1991 Language Planning and National Identity in Croatia K. Langston, A. Peti-Stantic, 2014-09-09 Following the collapse of the former Yugoslavia Croatian was declared to be a separate language distinct from Serbian and linguistic issues became highly politicized This book examines the changing status and norms of the Croatian language and its relationship to Croatian national identity focusing on the period after Croatian independence Encyclopedia of Bilingualism and Bilingual Education Colin Baker, Sylvia Prys Jones, 1998 This encyclopedia is divided into three sections individual bilingualism bilingualism in society and bilingual education It includes many pictures graphs maps and diagrams The book concludes with a comprehensive bibliography on bilingualism **Language Ideology, Policy and Planning in Peru** Serafín M. Coronel-Molina, 2015-09-14 This book explores the role of language academies in preserving and revitalizing minority or endangered languages The author studies the controversial High Academy of the Quechua Language HAQL in Peru the efficacy of which has been questioned by some experts The book delves into the positions attitudes ideologies and practices of the HAQL and the role it has played in language policy and planning in the Andean region The author uses ethnographic fieldwork to support what was previously only anecdotal evidence from individuals viewing the Academy from the outside This book would appeal to anyone studying the sociolinguistics of the Quechua language as well as to those studying broader issues of Indigenous language policy and planning maintenance and revitalization **Language Choices** Martin Pütz, 1997-02-13 This volume is about various aspects of the theory and application of language contact and language conflict phenomena seen from an interdisciplinary perspective The focus is on the linguistic social psychological and educational issues conditions constraints and consequences involved in the status and use of languages in multilingual settings The book is divided into four sections dealing with the following areas Theoretical issues This section addresses key issues such as the nature of the concepts of language maintenance language loyalty and language identity language shift language loss and

language death It includes the search for models of the often contradictory theoretical issues involved in language contact Language policy and language planning This section examines the various language policies carried out by official agencies and focuses on the two basic options available to a multilingual nation assimilation or pluralism Attitudes towards languages The section is geared towards research into determinants of language attitudes the methods for the measurements of attitudes as well as the relationship between language policy and attitude change Codeswitching and language choice The linguistic social psychological and anthropological implications of using two different codes will be examined from different perspectives Relevant research topics include the situational uses of code switching linguistic and social constraints on codeswitching and code switching vs borrowing A further research paradigm deals with the search for relativized constraints resulting from the interaction of universal principles and aspects particular to each codeswitching situation *The Rhetoric of Topics and Forms* Gianna Zocco, 2021-01-18 The fourth volume of the collected papers of the ICLA congress The Many Languages of Comparative Literature includes articles that study thematic and formal elements of literary texts Although the question of prioritizing either the level of content or that of form has often provoked controversies most contributions here treat them as internally connected While theoretical considerations inform many of the readings the main interest of most articles can be described as rhetorical in the widest sense given that the ancient discipline of rhetoric did not only include the study of rhetorical figures and tropes such as metaphor irony or satire but also that of *topoi* which were originally viewed as the places where certain arguments could be found but later came to represent the arguments or intellectual themes themselves Another feature shared by most of the articles is the tendency of undeclared thematology which not only reflects the persistence of the charge of positivism but also shows that most scholars prefer to locate themselves within more specific often interdisciplinary fields of literary study In this sense this volume does not only prove the ongoing relevance of traditional fields such as rhetoric and thematology but provides contributions to currently flourishing research areas among them literary multilingualism literature and emotions and ecocriticism Language Contact, German and Slovenian Donald F. Reindl, 2008 The Politics of Language Oppression in Tibet Gerald Roche, 2024-11-15 In The Politics of Language Oppression in Tibet Gerald Roche sheds light on a global crisis of linguistic diversity that will see at least half of the world's languages disappear this century Roche explores the erosion of linguistic diversity through a study of a community on the northeastern Tibetan Plateau in the People's Republic of China Manegacha is but one of the sixty minority languages in Tibet and is spoken by about 8 000 people who are otherwise mostly indistinguishable from the Tibetan communities surrounding them Recently many in these communities have switched to speaking Tibetan and Manegacha faces an uncertain future The author uses the Manegacha case to show how linguistic diversity across Tibet is collapsing under assimilatory state policies He looks at how global advocacy networks inadequately acknowledge this issue highlighting the complex politics of language in an inter connected world The Politics of Language Oppression in Tibet broadens our understanding of Tibet and China the

crisis of global linguistic diversity and the radical changes needed to address this crisis **Language Policy in Britain and France** Dennis Ernest Ager, 1995-02-01 Examines the making of language policy and language policy itself in Britain and France looking at how disciplines such as sociolinguistics and the analysis of the political process help in studying language policy and policymaking Details stages methods and outcomes of the policymaking process and compares policies in the two countries with case studies on areas including the Welsh Language Act of 1993 and language policy for immigrants
