Physical Eloquence and the Biology of Writing Robert Ochsner,1990-01-01 As a statement about literacy this book recommends an approach to teaching writing that stresses the neurological foundations of written English mastered almost like a foreign language Physical eloquence refers to neurological processes of hand eye and ear that every writer must control in order to generate and simultaneously to interpret a written text Biology of writing refers to innate or otherwise untaught abilities that all people have for acquiring prose and which are not enhanced by formal learning Ochsner promotes a realistic writing curriculum that stresses subconscious processes in the biology of the writing process rather than planned rehearsed and formally practiced activities for learning to write He concludes that successful literacy instruction depends on a teacher s willingness to take into account the supremacy of popular culture and the ascendancy of its spoken idiom
