Radical Revisionism gathers important recent writings on Australian art. These writings are "revisionist" insofar as they seek to bring a series of previously peripheral perspectives to the study of the art of the post-1960s: post-colonialism, the overturning of the legal doctrine of terra nullius. *Radical Revisionism* asks: what is the proper role for art history? Is it merely to chronicle the truth of the past, or is it actively to intervene in the system it records? These questions obviously bear a relationship to the "history wars" that raged throughout the 1990s in Australia. The anthology concludes by asking whether there can in fact be a history of "Australia" in which white and Indigenous artists come together. It proposes that the 21st century will be characterized by a certain "unAustralian" history of Australian art.

Radical Revisionism:

Status and the Challenge of Rising Powers Steven Ward, 2017-11-16 The rise of China and other great powers raises important questions about the persistence and stability of the liberal international order This book provides a new perspective on these questions by offering a novel theory of revisionist challenges to international order It argues that rising powers sometimes seem to face the condition of status immobility which activates social psychological and domestic political forces that push them toward lashing out in protest against status quo rules norms and institutions Ward shows that status immobility theory illuminates important but often overlooked dynamics that contributed to the most significant revisionist challenges in modern history The book highlights the importance of status in world politics and further advances a new understanding of this important concept's role in foreign policy This book will be of interest to researchers in international politics and security especially those interested in great power politics status power transitions revisionism and order

The Realism-Antirealism Debate in the Age of Alternative Logics Shahid Rahman, Giuseppe Primiero, Mathieu Marion, 2011-09-22 The relation between logic and knowledge has been at the heart of a lively debate since the 1960s On the one hand the epistemic approaches based their formal arguments in the mathematics of Brouwer and intuitionistic logic Following Michael Dummett they started to call themselves antirealists Others persisted with the formal background of the Frege Tarski tradition where Cantorian set theory is linked via model theory to classical logic Jaakko Hintikka tried to unify both traditions by means of what is now known as explicit epistemic logic Under this view epistemic contents are introduced into the object language as operators yielding propositions from propositions rather than as metalogical constraints on the notion of inference The Realism Antirealism debate has thus had three players classical logicians intuitionists and explicit epistemic logicians The editors of the present volume believe that in the age of Alternative Logics where manifold developments in logic happen at a breathtaking pace this debate should be revisited Contributors to this volume happily took on this challenge and responded with new approaches to the debate from both the explicit and the implicit epistemic point of view

The European Radical Left Giorgos Charalambous, 2021-12-20 Is today's left really new How has the European radical left evolved Giorgos Charalambous answers these questions by looking at three moments of rapid political change the late 1960s to late 1970s the turn of the millennium and post 2008 He challenges the conventional understanding of a new left drawing out continuities with earlier movements and parties Charalambous examines the Long 68 symbolised by the May uprisings in France which saw the rise of new left forces and the widespread criticism by younger radical activists of traditional communist and socialist parties He puts this side by side with the turn of the millennium when the Global Justice Movement rose to prominence and changed the face of the international left and also the period after the financial crash of 2008 and the rise of anti austerity politics which initiated the most recent wave of new left parties such as Podemos in Spain and Syriza in Greece With a unique two level perspective Charalambous approaches the left through both social movements

and party politics looking at identities rhetoric and organisation and bringing a fresh new approach to radical history as well as assessing challenges for both activists and scholars

Jabotinsky and the Revisionist Movement 1925-1948 Yaacov Shavit, 2013-10-11 First published in 1988 The focus of this title the nature and character of the Israeli political Right gained intensive interest immediately after the Israeli elections of 1977 The author discusses this shift of political power from the Left to the Right as a profound political upheaval and discusses this alongside the prior Labour hegemony of the Yishuv This book is separated into four parts The territory and organisation of the right The intellectual foundation of the right Ideology programme and political methods and Contradictory images

REAL - Yearbook of Research in English and American Literature, Volume 38 Laura Bieger, Johannes Völz, 2024-04-29 Celebrating the 80th birthday of Winfried Fluck this volume of REAL gathers leading US American and European literary scholars from English and American Studies to engage some of his classic essays covering topics that range from the aesthetics of early American literature to the history of our digital present and from the Americanization of literary studies to the search for American democratic culture Each of the volume s twelve dialogues consists of a republished essay by Fluck and a response by one his interlocutors written specifically for this occasion Contributors include field defining scholars long time companions and colleagues whose intellectual trajectory has been impacted by Fluck s incisive metacriticism and his reception oriented approach to literary and cultural history The twelve dialogues reassess debates that have shaped literary studies in the late twentieth century and they inquire into the paradigmatic shifts that are currently reorganizing the field

Shaping the History of Education? Jeroen Dekker, Frank Simon, 2018-02-05 In 1961 the Centre for the Study of the History of Education at Ghent University Belgium published the first issue of the multilingual journal Paedagogica Historica International Journal of the History of Education This book celebrates its fiftieth volume In fourteen contributions written by different generations of historians of education it demonstrates that in an era where the history of education at university level is at risk both the journal and the discipline are pulsing and alive and kicking Was the journal a trendsetter or a follower and which position did it take with respect to the International Standing Conference for the History of Education These are questions addressed in the first section of this book In the second section a number of articles show national and transnational developments of the history of education In their diversity they make clear how the national and the transnational together characterize the discipline They show why journals in this domain should stimulate the development of broader concepts and theories in order to put national and regional cases in a broader scientific context and to make them attractive for international readership In the last section authors turn their minds to the future of the history of education They write about the shaping of new trends and about moving beyond borders focusing on among other things the challenge of neurosciences and of digital humanities This book was originally published as a special issue of Paedagogica Historica

Cosmopolitan dystopia Philip Cunliffe, 2020-01-31 Cosmopolitan Dystopia shows that rather than populists or authoritarian great powers it is cosmopolitan liberals who have done the most to subvert

the liberal international order Cosmopolitan Dystopia explains how liberal cosmopolitanism has led us to treat new humanitarian crises as unprecedented demands for military action thereby trapping us in a loop of endless war Attempts to normalize humanitarian emergency through the doctrine of the responsibility to protect has made for a paternalist understanding of state power that undercuts the representative functions of state sovereignty The legacy of liberal intervention is a cosmopolitan dystopia of permanent war insurrection by cosmopolitan jihadis and a new authoritarian vision of sovereignty in which states are responsible for their peoples rather than responsible to them This book will be of vital interest to scholars and students of international relations IR theory and human rights **Routledge Library Editions:**

Plato Various,2021-12-02 Plato is perhaps the best known and most widely studied of all the ancient Greek philosophers A pupil of Socrates and teacher of Aristotle his ideas have inspired and influenced scholars of nearly every era His famous series of dialogues have become a standard part of the western philosophical canon from the Euthyphro and Gorgias of his early period the Republic Phaedrus and Symposium of his middle period to the Theaetetus and Laws of his late period The Routledge Library Edition makes available in a single set an outstanding range of scholarship devoted to Plato s philosophical work Routledge Library Editions Plato makes available in a single set an outstanding range of scholarship devoted to Plato s philosophical work The 21 volumes provide detailed analysis of his writings and philosophical ideas From the classic works of Francis Cornford G C Field and A E Taylor to more recent approaches and interpretations this set provides libraries and scholars with a century of outstanding scholarship on this key philosopher **Unity and Development in Plato's**

Metaphysics (RLE: Plato) William J. Prior,2012-09-10 Focussing on two metaphysical doctrines of central importance to Plato s thought the Theory of Forms and the doctrine of Being and Becoming he suggests a continuous progress can be traced through Plato s works *War on Terror* Stipe Buzar,Jean-François Caron,2024-04-01 Looking back at the War on

Terror and its policies actions and the violence that followed this book analyzes the resulting changes in international power structures and the relationship between citizens and their representatives It defines our shortcomings in opposing this type of violence by demonstrating how the notion of legitimate violence has been broadened The impact of the War on Terror on the public view of Liberalism is explored as well as its effects on the role of state authorities in our lives Thus this book

names the lessons we ought to learn from the actions taken against terrorist organizations New Frontiers in Truth Fabio Bacchini,Massimo Dell'Utri,2015-01-12 Although philosophers have been concerned with truth since at least the age of Plato the last thirty years have witnessed a veritable explosion of the philosophical debate on this topic The touchpaper which lit the fuse for this was undoubtedly the Deflationist Renaissance half a century after the seminal work of F P Ramsey due in the Seventies both to the Quinean disquotational interpretation of the Tarskian truth definitions and to the development of the prosentential theory of truth by D Grover J Kamp and N Belnap and from the second half of the Eighties onwards to the forceful defences of deflationary conceptions provided by H Field and P Horwich The philosophical struggle on deflationism

has been thought provoking by arguing on the merits and shortcomings of such a conception philosophers have come to broaden and deepen the discussion on truth beyond the boundaries of deflationism The varieties of problems tackled by the essays in this book highlight how the land of Truth is still far from having been totally explored and how in this intellectual endeavour real progresses can be achieved

The Oxford Handbook of Friedrich Schleiermacher Andrew Dole, Shelli M. Poe, Kevin M. Vander Schel, 2024 This Handbook presents authoritative interpretations of Schleiermacher's work from both German and English speaking scholars Topics covered include Schleiermacher's historical and intellectual context the structure and content of Schleiermacher's theology and philosophy and the reception of his thought

Lack of Character John M. Doris, 2002-08-15 This book is a provocative contribution to contemporary ethical theory challenging foundational conceptions of character that date back to Aristotle John Doris draws on behavioral science especially social psychology to argue that we misattribute the causes of behavior to personality traits and other fixed aspects of character rather than to the situational context More often than not it is the situation not the nature of the personality that really counts The author elaborates the philosophical consequences of this research for a whole array of ethical theories and shows that once rid of the misleading conception of motivation moral psychology can support more robust ethical theories and more humane ethical practices

Michael Dummett Bernhard Weiss, 2014-12-18 Michael Dummett's approach to the metaphysical issue of realism through the philosophy of language his challenge to realism and his philosophy of language itself are central topics in contemporary analytic philosophy and have influenced the work of other major figures such as Quine Putnam and Davidson This book offers an accessible and systematic presentation of the main elements of Dummett's philosophy This book's overarching theme is Dummett's discussion of realism his characterization of realism his attack on realism and his invention and exploration of the anti realist position This book begins by examining Dummett's views on language Only against that setting can one fully appreciate his conception of the realism issue With this in place Weiss returns to Dummett's views on the nature of meaning and understanding to unfold his challenge to realism Weiss devotes the remainder of this book to examining the anti realist position He discusses anti realist theories of meaning and then investigates anti realism's revisionary consequences Finally he engages with Dummett's discussion of two difficult challenges for the anti realist the past and mathematics

Retrying Galileo, 1633-1992 Maurice A. Finocchiaro, 2007-10-17 This is must reading for historians of science and a delight for the interested public From his access to many primary sources in the Vatican Library and from his broad knowledge of the history of the 17th century Finocchiaro acquaints readers in an interesting manner with the historical facts of Galileo's trial its aftermath and its repercussions Unlike many other works which present predetermined and at times prejudiced judgments this work provides exhaustive evidence to allow readers to develop their own informed opinion on the subject George V Coyne Director Vatican Astronomical Observatory The tragic condemnation of Galileo by the Roman Catholic Church in 1633 has become the single most potent symbol of authoritarian opposition to new ideas

Pioneering in its scope Finocchiaro's book provides a fascinating account of how the trial and its cultural significance have been freshly reconstructed by scholars and polemicists down the ages. With a philosopher's eye for fine distinctions the author has written an exciting commentary on the successive appearance of new primary sources and their exploitation for apologetic and secular purposes. John Hedley Brooke, author of *Science and Religion: Some Historical Perspectives*. If good history begins with good facts then *Retrying Galileo* should be the starting point for all future discussions of the post-trial phase of the Galileo affair. Maurice Finocchiaro's myth-busting documentary history is not only a repository of little-known sources but a pleasure to read as well. Ronald L. Numbers, co-editor of *When Christianity and Science Meet*. *Retrying Galileo* tells the less well-known half of the Galileo affair: its long and complex history after 1633. Finocchiaro has performed an invaluable service in writing a book that explores how the trial and condemnation of Galileo has been received, debated, and reinterpreted for over three and a half centuries. We are not yet done with this contentious story. Paula E. Findlen. Ubaldo Pierotti, Professor of Italian History and Director of the Science, Technology, and Society Program, Stanford University.

Encyclopedia of Historians and Historical Writing Kelly Boyd, 2019-10-09. The *Encyclopedia of Historians and Historical Writing* contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama. Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day, including individuals from related disciplines like Jürgen Habermas and Clifford Geertz, whose theoretical contributions have informed historical debate. Additionally, the *Encyclopedia* includes some 200 essays treating the development of national, regional, and topical historiographies from the Ancient Near East to the history of sexuality. In addition to the Western tradition, it includes substantial assessments of African, Asian, and Latin American historians and debates on gender and subaltern studies.

The Qur'an in Christian-Muslim Dialogue Corrie Block, 2013-10-08. Offering an analysis of Christian-Muslim dialogue across four centuries, this book highlights those voices of ecumenical tone which have more often used the Qur'an for drawing the two faiths together rather than pushing them apart, and amplifies the voice of the Qur'an itself. Finding that there is tremendous ecumenical ground between Christianity and Islam in the voices of their own scholars, this book ranges from a period of declining ecumenism during the first three centuries of Islam to a period of resurging ecumenism during the most recent century until now. Among the ecumenical voices in the Christian-Muslim dialogue, this book points out that the Qur'an itself is possibly the strongest of those voices. These findings are cause for and evidence of hope for the Christian-Muslim relationship that although agreement may never be reached, dialogue has led at times to very real mutual understanding and appreciation of the religious other. Providing a tool for those pursuing understanding and mutual appreciation between the Islamic and Christian faiths, this book will be of interest to scholars and students of Islam, the Qur'an, and the history of Christian-Muslim relations.

Living Room Wars Ien Ang, 1996. *Living Room Wars* brings together Ien Ang's recent writings on media audiences to ask what it means to live in a

world saturated by media Italy and Its Eastern Border, 1866-2016 Marina Cattaruzza, 2016-10-04 This is the first scholarly work in Modern European History which elucidates consistently how border issues affect the history of nations and states in the 19th and 20th centuries The book rethinks the Italian history of the last 150 years from the perspective of its eastern periphery and of the profound impact that events on the border had on the core of the country

Self-Determination and History in the Third World David C. Gordon, 2015-03-08 In their struggle for self determination the newly independent countries of the Third World are reestablishing links with their precolonial pasts and determining their present identities and future possibilities To demonstrate this David Gordon brings together interprets and synthesizes the thought of contemporary Arab historiographers Originally published in 1971 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
