Radical And Working Class Politics:

Respectable Radical F. M. Leventhal, 1971 *The Dynamics of Working-class Politics* Michael Savage, 1987 In an important contribution to a perennial debate Dr Savage argues that over concentration on national labour movements has ignored the variety of local political strategies developed by working class movements these variations show that working class politics develops on the basis of different types of solidarity rooted in various forms of local social structure Such mutations are not a recent development testifying to the decline of class politics but have been an enduring feature of capitalist societies In a detailed case study of Preston Lancashire Dr Savage shows how the strategies and strengths of the various political parties changed between 1880 and 1940 as workplace solidarities gave way to neighbourhood based ones and as changing gender relations in the textile industry facilitated the organisation of women Its sophisticated use of sociological theory and detailed empirical analysis distinguish *The Dynamics of Working Class Politics* as one of the more important essays in historical sociology published in past years

Social Inequality and Class Radicalism in France and Britain Duncan Gallie, 1984-01-26 This book first published in 1983 examines in depth the nature and sources of class radicalism in France and Britain and takes issue with some of the major theories of class consciousness and class action. Drawing on data both from detailed case studies and from wider national surveys, it shows that the conflict of class interests within capitalist societies can lead to sharply diverging attitudes to class inequality. It argues that the explanation of such differences cannot be found in some general law of the evolution of social conflict in capitalist society. It must be sought in the profound institutional differences that exist between the two societies. In particular, the study argues for a reassessment of the importance of the experience of war and of the way in which the business and political elite handled the social crises generated by war in accounting for the long-term structural divergence of capitalist societies.

Currents of Radicalism Eugenio F. Biagini, Alastair J. Reid, 1991-06-28 Those who were originally called radicals and afterwards reformers are called Chartists. Declared Thomas Duncombe before Parliament in 1842 a comment which can be adapted for a later period and as a description of this collection of papers those who were originally called Chartists were afterwards called Liberal and Labour activists. In other words the central argument of this book is that there was a substantial continuity in popular radicalism throughout the nineteenth and into the twentieth century. The papers stress both the popular elements in Gladstonian Liberalism and the radical liberal elements in the early Labour party. The first part of the book focuses on the continuity of popular attitudes across the commonly assumed mid-century divide with studies of significant personalities and movements as well as a local case study. The second part examines the strong links between Gladstonian Liberalism and the working classes, looking in particular at labour law, taxation and the Irish crisis. The final part assesses the impact of radical traditions on early Labour politics in Parliament, the unions and local government. The same attitudes towards liberty, the rule of law and local democracy are highlighted throughout and new questions are therefore posed about the major transitions in the popular politics of the period.

Explorations in Cultural History T. G. Ashplant, Gerry Smyth, 2001-03-20 History is an invention in the present as much as a representation and interpretation of the past. This has opened up innovative approaches to the research and writing of history and it is the two ideas central to this theme that culture is historically conditioned and history culturally conditioned that this book explores. Both theoretical

and practical in its approach this volume explains the development of cultural history and its impact on current teaching Part One examines the ways in which conceptions of historical meaning have been challenged via developments in a range of disciplines including literary and linguistic theory history sociology anthropology media and cultural studies Part Two looks at four case studies drawn from America and Britain the Vietnam Veterans Memorial the music of the Beatles the social documentary of George Orwell and the political polemics of nineteenth century British radical women

Politics and the Irish Working Class, 1830-1945 Donal Ó Drisceoil, F. The Origins of Collective Decision Making Andy Blunden, 2016-04-08 In The Origins of Collective Decision Making Andy Blunden identifies three paradigms of collective decision making Counsel Majority and Consensus discovers their origins in traditional medieval and modern times and traces their evolution over centuries up to the present The study reveals that these three paradigms have an ethical foundation deeply rooted in historical experiences The narrative takes the reader into the very moments when individual leaders and organisers made the crucial developments in white heat of critical moments in history such as the English Revolution of the 1640s the Chartist Movement of the 1840s and the early Civil Rights Movement of the 1960s This history provides a valuable resource for resolving current social movement conflict over decision making

Nationalism and the State John Breuilly, 1994-02 Since its publication this important study has become established as a central work on the vast and contested subject of modern nationalism Placing historical evidence within a general theoretical framework John Breuilly argues that nationalism should be understood as a form of politics that arises in opposition to the modern state In this updated and revised edition he extends his analysis to the most recent developments in central Europe and the former Soviet Union He also addresses the current debates over the meaning of nationalism and their implications for his position Breuilly challenges the conventional view that nationalism emerges from a sense of cultural identity Rather he shows how elites social groups and foreign governments use nationalist appeals to mobilize popular support against the state Nationalism then is a means of creating a sense of identity This provocative argument is supported with a wide ranging analysis of pertinent examples national opposition in early modern Europe the unification movement in Germany Italy and Poland separatism under the Hapsburg and Ottoman empires fascism in Germany Italy and Romania post war anti colonialism and the nationalist resurgence following the breakdown of Soviet power Still the most comprehensive and systematic historical
