Forrest Mims' Science Experiments Forrest M. Mims III, 2016-08-03 Forrest M Mims is a revered contributor to Make magazine where his popular columns about science related topics and projects for Makers are evergreen treasures. Collected together here for the first time these columns range from such simple projects as building an LED tracker for hand launched night rockets to such challenging builds as transforming strings of data into unique musical compositions. A variety of photography and imaging projects are featured including an ultra sensitive twilight photometer that measures the elevation of layers of dust, smoke and smog from around 3,000 feet to the top of the stratosphere at 31 miles. Most of the projects can be done with a collection of simple electronic components such as LEDs, transistors, resistors and batteries. To inspire and motivate readers the book also includes profiles of such famous Makers as President Thomas Jefferson and Microsoft co-founder Paul Allen.

Make: Technology on Your Time Volume 31 Mark Frauenfelder, 2012-07-18 Why are so many kids and adults like you bored by science? Simple: you've had no real contact with it. You might read about incredibly expensive scientific projects but your hands-on experience is probably limited to the same tired experiments like baking soda and vinegar volcanoes. Not any longer. Make Magazine's Punk Science issue, volume 31, shows you how you can become a real cutting edge amateur scientist. Find out how high school and college students can get an introduction to modern biology research through affordable biotech labs provided by Otyp, a small Michigan based biotechnology company. And learn how a cooperative network of schools and research groups called PEER enables students to learn science by working on real projects with people in the field including the DECA Distributed Electronic Cosmic Ray Observatory that uses Android phones to generate a real time cosmic ray flux map of a large area. This issue also shows you how to create these fascinating projects on your own: RoboRoach: Surgically modify a cockroach with a wireless electronic circuit so that you can control it to turn left or right by micro stimulating its antenna nerves; Lord Kelvin's Thunderstorm: a little known classic science experiment that generates high voltage lightning sparks by dripping water through metal rings; An automatic Ball Toy Launcher for Dogs that will keep your pet entertained and exercised while you're away; A True Mirror which shows what you look like to other people. Pick up a copy of Make today and get involved with real science.
