Arner, 2013-03-12 Asia s demand for second generation financial institutions and markets needs to be met in order for the region s further development to be sustained This book provides a compelling fact based assessment of current practices and regulations in Asia s financial institutions and markets and carefully documents the exciting opportunities and challenges that lie ahead in the region s financial systems This book differs in design from typical treatments of financial institutions and markets because its focus is on Asia rather than using the US model in terms of market configurations or products as a benchmark and it takes a contemporary and forward looking view of financial markets Examples of practice from Asia are used to illustrate major accepted themes in finance and financial regulation To the extent that Asia s main economies share characteristics that are distinct for example in the relationship between government and the banking sector or in aspects of corporate governance the book will discuss the consequences for market
