

WHAT IS REALISM?

Realism is an artistic and literary movement that emerged in the 19th century. It sought to represent reality truthfully and accurately, focusing on everyday life and ordinary people.

Realism rejected idealized depictions of the world and emphasized observation and direct experience. The movement aimed to portray society and human experience without romanticism or exaggeration, and often dealt with themes such as social injustice, poverty, and working-class life.

Realism had a significant impact on literature, painting, and other art forms, and remains an influential approach to storytelling and representation today.

Realism In Our Time:

Relativity In Our Time Mendel Sachs, 2018-10-08 Relativity In our Time is a book concerning the relevance of Einstein's theory to human relations in contemporary times. It is physics and it is philosophy. It is a discussion about one of the greatest of all pillars of 20th century thought and science. Based on a seminar course for a mixture of science and humanities students, the approach and narrative style leads the reader towards the frontier of thinking in this far-reaching subject. Sachs deals with the whole spread of relativity starting from the early history of Galileo and Faraday; he arrives at the foundation of the special theory. There is a logical transition to the general theory while the last part of the book covers the mind-testing realms of unified field theory, Mach's principle and cosmology. The book begins with atomistic deterministic classical physics and goes on towards a view of continuous fields of matter and a clearer view of spacetime. The reader is led into Einstein's extension of this theory towards a unified force field; consequently, the authors address the issue of the validity of linear mathematics compared with the realism of a non-linear universe. Such arguments today are leading towards a new paradigm in science: a study and description of nonlinear natural systems, especially far from equilibrium systems, their energetics and dynamics. This book should be of value to postgraduates, undergraduates, secondary students and professionals in physics and philosophy and anyone with an interest in science subjects. *Realism in Our Time* György Lukács, 1971 **The**

Restructuring of Capitalism in Our Time William K. Tabb, 2012 Actions taken by the United States and other countries during the Great Recession focused on restoring the viability of major financial institutions while guaranteeing debt and stimulating growth. Once the markets stabilized, the United States enacted regulatory reforms that ultimately left basic economic structures unchanged. At the same time, the political class pursued austerity measures to curb the growing national debt. Drawing on the economic theories of Keynes and Minsky and applying them to the modern evolution of American banking and finance, William K. Tabb offers a chilling prediction about future crises and the structural factors inhibiting true reform. Tabb follows the rise of banking practices and financial motives in America over the past thirty years and the simultaneous growth of a shadow industry of hedge funds, private equity firms and financial innovations such as derivatives. He marks the shift from an American economy based primarily on the production of goods and nonfinancial services to one characterized by financialization, then shows how these developments, perspectives and approaches not only contributed to the recent financial crisis but also prevented the enactment of effective regulatory reform. He incisively analyzes the damage that increasing unsustainable debt and excessive risk-taking has done to our financial system and expands his critique to a discussion of world systems and globalization. Revealing the willful blind spots of mainstream finance theory, Tabb moves beyond an economic model reliant on debt expansion and dangerous levels of leverage, proposing instead a social structure of accumulation that places economic justice over profit and more practically institutes an inclusive sustainable model for growth. *Calvino and the Age of Neorealism*, 1990-08 Italo Calvino's reputation as one of the great writers of our century

rests chiefly on his allegorical fables and fantastic narratives whose inventiveness irreverence and elegant style are universally admired In this study the author focuses on Calvino s first novel *The Path to the Nest of Spiders* 1947 because in it she discerns a critical point of origin for Calvino s entire ethics of writing She shows how in *The Path* he challenges the poetics of objectivity of the Italian neorealists movement and offers a complex and ironic representation of the anti Fascist armed resistance in Italy Situating Calvino s early work in its historical and cultural context the author reassesses Italian neorealism in terms of the theories and critical debates about realism of such critics as Lukacs Sartre Brecht Adorno and Barthes She analyzes neorealism s narrative practices and cultural and political implications while setting neorealism in the context of the resistance and the postwar Reconstruction in Italy and giving readings of major neorealist texts novels by Pavese and Vittorini films by Rossellini Visconti and others as well as relatively obscure minor ones The heart of the book consists of readings of *The Path* from four different but intersecting critical perspectives formalist narratological sociohistorical psychoanalytic and Bakhtinian The readings assess the importance of Calvino s beginnings for the body of his work and incorporate relevant references to his later fiction and critical essays Out of these multiple readings the ironic estrangement of the real through the act of writing itself emerges as his key narratological strategy

Themes in Geographic Thought (Routledge Revivals) Milton Harvey,Brian Holly,2014-03-18 Themes in Geographic Thought first published in 1981 explores in breadth and depth the interrelationships among the history of Geography geographic thought and methodology specifically focusing on the interactions between geographical research and various contemporary philosophical schools positivism pragmatism functionalism phenomenology existentialism idealism realism and Marxism An attempt is made to synthesise Geography s historically rich tradition with the current diversity in approaches to the discipline based on the belief that geographic thought at any point in time is a manifestation of the mutual influence between the prevailing philosophical viewpoints and the major methodological approaches in vogue Each chapter presents an overview of the concrete ideas of a particular school of philosophy and stresses its relevance and impact on various aspects of Geography Realizing Capital Anna Kornbluh,2014-01-20 During a tumultuous period when financial speculation began rapidly to outpace industrial production and consumption Victorian financial journalists commonly explained the instability of finance by criticizing its inherent artifice drawing persistent attention to what they called fictitious capital In a shift that naturalized this artifice this critique of fictitious capital virtually disappeared by the 1860s replaced by notions of fickle investor psychology and mental equilibrium encapsulated in the fascinating metaphor of psychic

economy In close rhetorical readings of financial journalism political economy and the works of Dickens Eliot and Trollope Kornbluh examines the psychological framing of economics one of the nineteenth century s most enduring legacies reminding us that the current dominant paradigm for understanding financial crisis has a history of its own She shows how novels illuminate this displacement and ironize ideological metaphors linking psychology and economics thus demonstrating literature s unique facility for evaluating ideas in process Inheritors of this novelistic project Marx and Freud each advance a critique of psychic economy that refuses to naturalize capitalism

Unworldliness in Twentieth Century German Thought Stéphane Symons, 2024-12-12 What happens when the world around us feels fragmented How can a person continue to respond positively to their environment when it seems to have lost its internal coherence These questions lie at the heart of this innovative interpretation of some of the most influential German philosophers of the twentieth century The key figures in this study are the young Georg Lukács 1885 1971 Ernst Jünger 1895 1998 Ernst Bloch 1885 1977 Theodor Adorno 1903 1969 Max Kommerell 1902 1944 and Siegfried Kracauer 1889 1966 By establishing an intellectual dialogue among these otherwise diverse thinkers this study identifies a common interest the question whether an unworldly fragmented universe can nonetheless elicit a creative response from individuals Together these authors offer an alternative to what is considered the dominant trend in twentieth century German philosophy the phenomenological emphasis on humans lived interactions with a shared and unified lifeworld Special attention is given to six distinct interpretations of Miguel de Cervantes s novel Don Quixote and the unworldly actions of its main character *Unworldliness in Twentieth Century German Thought* will appeal to researchers and advanced students interested in twentieth century continental philosophy German intellectual history critical theory and literature and philosophy

Henry Fielding In Our Time J. A. Downie, 2020-11-09 Henry Fielding In Our Time publishes many of the

papers presented at the international conference held at the University of London 19-21 April 2007 to commemorate the tercentenary of his birth. Written by established scholars including the acknowledged doyen of Fielding scholars Martin C Battestin of the University of Virginia as well as younger scholars who successfully bring their recent research to bear on neglected areas of Fielding's life and works, the essays offer a cross section of current approaches to Fielding and his writings from his ballad operas, poetry and political journalism via Joseph Andrews, Tom Jones and Amelia to the novels for which he is still best known, to the social pamphlets written during his years at Bow Street as magistrate for Westminster and Middlesex. The collection should appeal both to undergraduate and postgraduate students as well as academics and general readers interested in the eighteenth century in general and Fielding's contribution to the emergence and development of the novel form in particular.

It includes the groundbreaking essays Notes on Camp and Against Interpretation as well as her impassioned discussions of Sartre, Camus, Simone Weil, Godard, Beckett, Levi Strauss, science fiction, movies, psychoanalysis and contemporary religious thought. Leaving Springfield John Alberti, 2004. Since its first appearance as a series of cartoon vignettes in 1987 and its debut as a weekly program in 1990, The Simpsons has had multiple, even contradictory media identities. Although the show has featured biting political and social satire which often proves fatal to mass public acceptance, The Simpsons entered fully into the mainstream, consistently earning high ratings from audiences and critics alike. Leaving Springfield addresses the success of The Simpsons as a corporate manufactured show that openly and self-reflexively parodies the very consumer capitalism it simultaneously promotes. By exploring such topics as the impact of the show's satire on its diverse viewing public and the position of The Simpsons in sitcom and television animation history, the commentators develop insights into the ways parody intermixes with mass media to critique post-modern society. In spite of the longevity and high cultural profile of the show, The Simpsons has so far attracted only scattered academic attention. Leaving Springfield will be of importance to both scholars of media and fans of the show interested in the function of satire in popular culture in general and television in particular.
