Reality TV Susan Murray, Laurie Ouellette, 2009 Survivor The Bachelor Extreme Makeover Big Brother Joe Millionaire American Idol The Osbournes It is virtually impossible to turn on a television without coming across some sort of reality programming Yet while this genre has rapidly moved from the fringes of television culture to its lucrative core critical attention has not kept pace Beginning by unearthing its historical roots in early reality shows like Candid Camera and wending its way through An American Family Cops and The Real World to the most recent crop of reality programs Reality TV is the first book to address the

How Real Is Reality TV? David S. Escoffery, 2014-12-03 American viewers are attracted to what they see as the non scripted unpredictable freshness of reality television But although the episodes may not be scripted the shows are constructed within a deliberately designed framework reflecting

societal values The political economic and personal issues of reality TV are in many ways simply an exaggerated version of everyday life allowing us to identify perhaps more closely than we care to admit with the characters onscreen With 16 essays from scholars around the world this volume discusses the notion of representation in reality television It explores how both audiences and producers negotiate the gulf between representations and truth in reality shows such as Survivor The Apprentice Big Brother The Nanny American Idol Extreme Makeover Joe Millionaire and The Amazing Race Various identity categories and character types found in these shows are discussed and the accuracy of their television portrayal examined Dealing with the concept of reality audience reception gender roles minority portrayal and power issues the book provides an in depth look at what we see or think we see in reality TV Instructors considering this book for use in a course may request an examination copy here *Reality TV* Jon Kraszewski, 2017-02-24 From early first wave programs such as Candid Camera An American Family and The Real World to the shows on our television screens and portable devices today reality television consistently takes us to cities such as New York Los Angeles and Boston to imagine the place of urbanity in American culture and society Jon Kraszewski offers the first extended account of this phenomenon as he makes the politics of urban space the center of his history and theory of reality television Kraszewski situates reality television in a larger economic transformation that started in the 1980s when America went from an industrial economy when cities were home to all classes to its post industrial economy as cities became key points in a web of global financing expelling all economic classes except the elite and the poor Reality television in the industrial era reworked social relationships based on class race and gender for liberatory purposes which resulted in an egalitarian ethos in the genre However reality television of the post industrial era attempts to convince viewers that cities still serve their interests even though most viewers find city life today economically untenable Each chapter uses a key theoretical concept from spatial theory such as power geometries diasporic nostalgia orientalism the imagination of social expulsions and the relationship between the country and the city to illuminate the way reality television engages this larger transformation of urban space in America **The Bizarre World of Reality**

Television Stuart Lenig, 2017-10-12 How do reality television programs shape our view of the world and what we perceive as real and normal This book explores the bizarre and highly controversial world of reality television including its early history wide variety of subject matter and social implications In recent decades reality television shows ranging from Keeping up with the Kardashians to Duck Dynasty have become increasingly popular Why are these unscripted programs irresistible to millions of viewers And what does the nearly universal success of reality shows say about American culture This book covers more than 100 major and influential reality programs past and present discussing the origins and past of reality programming the contemporary social and economic conditions that led to the rise of reality shows and the ways in which the most successful shows achieve popularity with both male and female demographics or appeal to specific targeted niche audiences The text addresses reality TV within five easy to identify content categories competition shows relationship love

interest shows real people or alternative lifestyle and culture shows transformation shows and international programming By examining modern reality television a topic of great interest for a wide variety of readers this book also discusses cultural and social norms in the United States including materialism unrealistic beauty ideals gender roles and stereotypes in society dynamics of personal relationships teenage lifestyles and issues and the branding of people for financial gain and wider viewership

Trans-Reality Television Sofie Van Bauwel,Nico Carpentier,2012-07-10 Trans Reality Television The Transgression of Reality Genre Politics and Audience offers an overview of contributions which engage with the phenomenon of reality television as a tool to reflect on societal and mediated transformations and transgressions While some contributors delve deep into the theoretical issues others approach the topic at hand through empirical studies of specific reality television formats and programs The chapters in this volume are divided into four sections all of which deal with how we see the fluid social at work in reality television through the trans real trans politics trans genre and trans audience The first section stresses the concept of the trans real These chapters go into the complexity of the construction of reality in reality television The second section which deals with the concept of trans politics offers a diversity of perspectives on the articulation and re articulation of politics and the political In the third section trans genre the chapters analyze how the modern conceptualizations of genre and format are transcended Finally the last set of chapters articulate the concept of trans audiences using case studies of particular audiences and a study of reality celebrities Trans Reality Television concludes by returning to the sense and nonsense of the use of these post concepts
