Really Practical Guides Primary Geography:

The Really Practical Guide to Primary Geography Marcia Foley, Jan Janikoun, 1996 Substantially revised to incorporate the contents of the 1995 Revised Order and its major implications for geography teaching Includes two brand new chapters on the growing early years sector and OFSTED inspections A whole range of different ways to organise the geography curriculum is discussed with examples The resources sections have been updated and expanded **The Really Practical Guide to Primary Geography** Marcia Foley, Jan Janikoun, 1992 **The Really Practical Guide to Primary Science** Carol Holland, John Rowan, 1996 A guide to teaching science in primary schools Its topics include understanding the National Curriculum and developing an effective scheme of work and this second edition has been revised to take account of National Curriculum developments **The Really Practical Guide to Primary English** Diana Bentley, 1999 This book contains clear chapter objectives suggestions for further reading on each topic and a glossary explaining key terms that the new or trainee teacher will need to understand The authors have all taught English in the primary setting are experienced teacher trainers and respected practitioners in their own specialist fields Coordinating Geography Across the Primary School John Halocha, 2005-08-05 Specifically designed for busy teachers who have responsibility for co ordinating a subject area within their primary school Each volume in the series provides a wealth of tips case studies and photocopiable material

Continuum Guide to Geography Education Graham Butt, 2000-12-26 A reference guide to geography education Entries arranged alphabetically cover government legislation and reports famous geography educators resources research findings movements trends debates and issues organizations and key concepts An analytical index helps the reader to choose paths through the book connecting entries **The Primary Teacher's Guide To The New National Curriculum** Kate Ashcroft, Professor Kate Ashcroft, David Palacio, 2002-09-11 This guide gives an overview of the curriculum arrangements which took effect in August 1995 The book outlines the main changes to the original National Curriculum and gives examples of ways to teach the new curriculum together with enquiry tasks to take the teacher forward It also covers each of the subjects of the revised National Curriculum locating them within a context of whole curriculum planning Looking at issues of differentiation the book explores those additional elements of the curriculum such as cross curricular themes and drama that primary schools will wish to cover **Effective Teaching in Schools** Chris Kyriacou, 1997 This book is structured in three parts firstly putting into context the wealth of research on what makes for effective teaching then building on the foundation by looking at specific aspects of good classroom practice and finally looking at ways of reflecting on experience to improve classroom practice **Teaching Humanities in Primary Schools** Pat Hoodless, Elaine McCreery, Paul Bowen, Sue Bermingham, 2009-09-10 This book supports primary trainees in their learning and teaching approach to the core humanities subjects geography history and religion It promotes an integrated approach to these subject areas and encourages trainees to reflect on the links between subjects across the curriculum from the Early Years Foundation Stage through to Key Stage 2

This edition has been updated to incorporate the revised Professional Standards for the Award of QTS and addresses key initiatives such as Excellence and Enjoyment Every Child Matters and the Primary National Strategy for Literacy and Mathematics

EBOOK: Enhancing Primary Science: Developing Effective Cross-Curricular Links Lois Kelly, Di Stead, 2013-02-16

How can other subjects in the primary curriculum enhance the teaching and learning of primary science? The key argument in the book is that children's learning is enriched through both discrete subject teaching and cross-curricular approaches to the curriculum and that children become more effective learners when they make links between the different subjects. This book gives helpful insights into why making effective cross-curricular links enriches science and discusses when and how to make effective and authentic links between science and other subjects. Each chapter tackles a particular subject and considers how it can enhance science learning through a variety of approaches and a wealth of ideas for the classroom. Written in a clear, accessible and informative style, this book includes contributions from a range of expert practitioners. Provides a good balance between theory and practice. Includes practical advice and tasks to help develop your confidence and skill in cross-curricular teaching. Is illustrated with examples of pupils' voice. This book is ideal for students, teachers and schools who wish to adopt a cross-curricular approach to teaching and enhance their primary science curriculum. Contributors: Alison Brade, Mark Hamill, Sharon Harris, Shelagh Hendry, Alison Hermon, Pat Hughes, Arthur Kelly, Liz Lawrence and Cliff Porter. Let this book take you by the hand and guide you skilfully past the pitfalls of cross-curricular teaching in primary science whilst enjoying the celebration of creative and effective links between science and other subjects. It is full of practical suggestions for cross-curricular work but it never loses sight of the need for clear learning goals. Rooted in the principles of collaborative learning, this book inspires and informs. Anne Goldsworthy, Independent Science Consultant. This important book explores a practical framework for cross-curricular teaching of science through a closely referenced theoretical rationale. There are a range of open-ended tasks that illustrate the rich learning opportunities that can be planned for when expert subject knowledge combines with a pedagogy for enquiry. This is an essential read for all teachers inspired to tailor the curriculum to the needs and interests of their children. Alison Peacock, Headteacher of The Wroxham School and Transformative Learning Alliance Network Leader for the Cambridge Primary Review. I enjoyed this book sharing insights into cross-curricular approaches to primary science. The authors have successfully demonstrated how they have put theory into practice. There are many useful activities clearly outlined for use in the classroom based on the authors' own experiences. The reader will gain sound knowledge and understanding of how and why cross-curricular approaches can enhance primary science through worked examples. My particular favourite was the History of Bread. I will certainly recommend this book to my students. Kathy Schofield, Senior Lecturer for Primary Science, Manchester Metropolitan University, UK. These ideas have given me the confidence that cross-curricular approaches can enrich scientific provision rather than dilute it. Primary School Teacher.
