Shah, 2008-06-20 The design of a federal system to

deal with growth stabilization and regional and local development issues is the primary concern of this volume edited by Anwar Shah. The book provides analytical tools to address issues arising from globalization, localization and regional integration. It discusses tax harmonization issues associated with subnational value added tax administration. It provides a framework for fiscal discipline in a federal system. Lessons from international experiences from policies to deal with lagging regions are drawn. The book empirically examines the effect of fiscal decentralization on the overall size of the public sector. Finally, it draws lessons from industrial countries' experiences on local governance. This important new series represents a response to several independent evaluations in recent years that have argued that development practitioners and policy makers dealing with public sector reforms in developing countries and indeed anyone with a concern for effective public governance could benefit from a synthesis of newer perspectives on public sector reforms. This series distills current wisdom and presents tools of analysis for improving the efficiency, equity and efficacy of the public sector. Leading public policy experts and practitioners have contributed to the series.

Unusual Suspects Gilles Paquet, 2022-08-10. *Unusual Suspects: Essays on Social Learning* looks into the forces at work that have undermined critical thinking and sound intellectual inquiry in the world of public affairs in Canada. It has fostered reductive perspectives and destructive blockages to collaborative governance to emerge and have succeeded in blinding observers to the real sources of the present Canadian malaise, blocking the road to imaginative repairs. Part I deals frontally with the twilight of critical thinking that has led to a dramatic weakening of the critical examination of issues and the process of inquiry that has been significantly weakened by ever narrower perspectives. Part II focuses on two mental prisons: the obsessive and reductive insistence on a quantophrenic twist only that which can be quantified counts, and the failure by crucial partners to live up to the requirements of their burden of office in circumstances when disloyalty considerably enfeebles the possibility of effective collaborative governance and the chance for organizations to succeed. Part III suggests that it is not impossible to get rid of the blinders preventing the adoption of more synoptic approaches and the exploration of more imaginative designs to repair our organizations and institutions. Ways to deal with the challenges facing the Canadian socio-economy are hinted at, and the work of a successful social architect showcased. The conclusion makes the case for an approach that is both synoptic and guided by reasonableness against the dogmas of disciplines and skimpy rationality.

In the Long Run We're All Dead Timothy Lewis, 2007-10-01. *In the Long Run We're All Dead: The Canadian Turn to Fiscal Restraint* offers the first comprehensive scholarly account of this vital public policy issue. Lewis deftly analyzes the history of deficit finance from before Confederation through Canada's postwar Keynesianism to the retrenchment of the Mulroney and Chrétien years. In doing so, he illuminates how the political conditions for Ottawa's deficit elimination in the 1990s materialized after over 20 consecutive years in the red and how the decline of Canadian Keynesianism has made way for the emergence of politics organized around balanced budgets.

Capacity for Choice George Hoberg, 2002-01-01. Examines North American integration and its

potential future impact on Canadian life in eight areas trade the labour market the brain drain macroeconomics federalism social welfare the environment and culture *Modern State Intervention in the Era of Globalisation* Nikolaos Karagiannis,Zagros Madjd-Sadjadi,2007-06-26 Modern State Intervention in the Era of Globalisation is a thoughtful and well researched assessment of the evolving role of the state in the contemporary world economy This work is provocative because it goes against the predominant arguments in favor of a minimal state as commonly asserted by neoclassical economics Instead Karagiannis and Madjd Sadjadi think outside of the box and produce both theoretical arguments and evidence from important cases such as the EU Singapore and Hong Kong to support the idea of a viable and continuing role for the Developmental State The scholarship underlying this very readable book which includes contemporary material as well as ancient economic thought is truly impressive Readers will be left with much to reconsider about the benefits of globalisation Patrick James University of Southern California US *Canada: the State of the Federation 1992* Douglas M.
