Reason And Its Other:

Restless Reason and Other Variations on Kantian Themes Amihud Gilead, 2021-11-23 This book combining integratively revised previously published papers with entirely new chapters challenges and treats some major problems in Kant's philosophy not by means of new interpretations but by suggesting some variations on Kantian themes Such variations are in fact reconstructions made according to Kantian ideas and principles and yet cannot be extracted as such directly from his writings The book also analyses Kant's philosophy from a new metaphysical angle based on the original metaphysics of the author called panenmentalism It reconstructs some missing links in Kant's philosophy such as the idea of teleological time which is vital for Kant's moral theory Although these variations cannot be found literally in Kant's works they can be legitimately explicated developed and implied from them Such is the case because these variations are strictly compatible with the details of the texts and the texts as wholes and because they are systematically integrated Their coherence supports their validation The target audiences are graduate and PhD students as well as specialist researchers of Kant's philosophy

The Self, the Lord, and the Other according to Paul and Epictetus Michael J. Gorman, 2023-03-29 This study explores the relationship between the individual person the self the divine and other people in the writings of the apostle Paul and the Roman Stoic Epictetus It does so by examining self-involving actions expressed with reflexive pronouns myself yourself etc in various kinds of sentences for example Examine yourself and You do not belong to yourself After situating the topic within the fields of linguistics and ancient Greek the study then examines the reflexive constructions in Epictetus's Discourses showing that reflexive texts express fundamental aspects of his ethic of rational self-interest in imitation of the indwelling rational deity Next the investigation examines the 109 reflexive constructions in Paul providing an exegesis of each reflexive text and then synthesizing the results Paul's reflexive phrases are essential statements of his theology and ethics expressing an interconnected narrative Christology narrative apostolic identity and narrative ethic Most importantly the study finds that for Epictetus concern for others is a rational means to self-realization whereas for Paul concern for others is a community ethic grounded in the story of the indwelling Christ and is the antithesis of self-interest **What is**

History? and Other Late Unpublished Writings Eric Voegelin, 1990 This volume contains the most significant pieces of unpublished writing completed by Eric Voegelin during an important time of his career Spanning the period from the early 1960s to the late 1970s these selections supplement the body of work Voegelin published after the appearance of the first three volumes of *Order and History* in 1956 and 1957 The five texts included here are *What Is History* *Anxiety and Reason* *The Eclipse of Reality* *The Moving Soul* and *The Beginning and the Beyond* In their introduction to the volume Thomas A. Hollweck and Paul Carlingella place these writings in their proper context and discuss the ways in which they reveal clues to the evolution of Voegelin's thought In *What Is History* Voegelin considers the development of a transcendent structure of history while simultaneously rejecting the notion that history can have a universal meaning *Anxiety and Reason* focuses on

Voegelin's critically important theory of historiogenesis which links events in pragmatic history with legendary and mythical events leading back to the beginning of the cosmic order. In *The Eclipse of Reality* Voegelin presents a critique of modernity by analyzing the work of Sartre, Schiller, Comte and others. *The Moving Soul* a thought experiment inspired by a remark Henry Margenau makes in *The Nature of Physical Reality* attempts to reformulate the connections between physics and myth. The most important of these essays is *Me Beginning and the Beyond Here*. Voegelin meditates on the universality of experience formed by the tension of existence under God. Publication of these previously unpublished writings will enable scholars to trace the genesis of many of the concerns that occupied Voegelin during a period in which the conception of his main work was undergoing frequent and perhaps fundamental changes.

The Other Within Yirmiyahu Yovel, 2018-06-05

The Marranos were former Jews forced to convert to Christianity in Spain and Portugal and their later descendants. Despite economic and some political advancement these Conversos suffered social stigma and were persecuted by the Inquisition. In this unconventional history Yirmiyahu Yovel tells their fascinating story and reflects on what it means for modern forms of identity. He describes the Marranos as the Other within people who both did and did not belong. Rejected by most Jews as renegades and by most veteran Christians as Jews with impure blood, Marranos had no definite integral identity. Yovel argues the Judaizers, Marranos who wished to remain secretly Jewish, were not actually Jews and those Marranos who wished to assimilate were not truly integrated as Hispano Catholics. Rather, mixing Jewish and Christian symbols and life patterns, Marranos were typically distinguished by a split identity. They also discovered the subjective mind engaged in social and religious dissent and demonstrated early signs of secularity and this worldliness. In these ways Yovel says the Marranos anticipated and possibly helped create many central features of modern Western and Jewish experience. One of Yovel's philosophical conclusions is that split identity, which the Inquisition persecuted and modern nationalism considers illicit, is a genuine and inevitable shape of human existence, one that deserves recognition as a basic human freedom. Drawing on historical studies, Inquisition records and contemporary poems, novels, treatises and other writings, this engaging critical history of the Marrano experience is also a profound meditation on dual identities and the birth of modernity.

Structural Rationality and Other Essays on Practical Reason Julian Nida-Rümelin, 2019-05-24

In this book the author shows that it is necessary to enrich the conceptual frame of the theory of rational choice beyond consequentialism. He argues that consequentialism as a general theory of rational action fails and that this does not force us into the dichotomy teleology vs deontology. The unity of practical reason can be saved without consequentialism. In the process he presents insightful criticism of standard models of action and rational choice. This will help readers discover a new perspective on the theory of rationality. The approach is radical. It transcends the reductive narrowness of instrumental rationality without denying its practical impact. Actions do exist that are outlined in accordance to utility maximizing or even self-interest maximizing. Yet not all actions are to be understood in these terms. Actions oriented around social roles, for example, cannot count as irrational.

only because there is no known underlying maximizing heuristic The concept of bounded rationality tries to embed instrumental rationality into a form of life to highlight limits of our cognitive capabilities and selective perceptions However the agent is still left within the realm of cost benefit reasoning The idea of social preferences or meta preferences cannot encompass the plurality of human actions According to the author they ignore the plurality of reasons that drive agency Hence they coerce agency in fitting into a theory that undermines humanity His theory of structural rationality acknowledges lifeworld patterns of interaction and meaning

Reason and Morality Joanna Overing, Association of Social Anthropologists of the Commonwealth, 1985 First Published in 1985 Routledge is an imprint of Taylor Francis an informal company *The Other Emerson* Branka Arsić, Cary Wolfe, Stanley Cavell, Designing the City of Reason Ali Madanipour, 2007-04-11 With a practical approach to theory Designing the City of Reason offers new perspectives on how differing belief systems and philosophical approaches impact on city design and development exploring how this has changed before during and after the impact of modernism in all its rationalism Looking at the connections between abstract ideas and material realities this book provides a social and historical account of ideas which have emerged out of the particular concerns and cultural contexts and which inform the ways we live By considering the changing foundations for belief and action and their impact on urban form it follows the history and development of city design in close conjunction with the growth of rationalist philosophy Building on these foundations it goes on to focus on the implications of this for urban development exploring how public infrastructures of meaning are constructed and articulated through the dimensions of time space meaning value and action With its wide ranging subject matter and distinctive blend of theory and practice this book furthers the scope and range of urban design by asking new questions about the cities we live in and the values and symbols which we assign to them

Facing the Other Linda Bolton, 2004 Linda Bolton uses six extraordinarily resonant moments in eighteenth and nineteenth century American history to highlight the ethical challenge that the treatment of Native and African persons presented to the new republic's ideal of freedom Most daringly she examines the efficacy of the Declaration of Independence as a revolutionary text and explores the provocative question What happens when freedom eclipses justice when freedom breeds injustice Guided by the intellectual influence of philosopher Emmanuel Levinas Bolton asserts that the traditional subject centered or I concept of freedom is dependent on the transcendent presence of the Other and thus freedom becomes a privilege subordinate to justice There can be no authentic freedom as long as others whether Native or African are reduced from full human beings to concepts and thus properties of control and power American Farmer Thomas Paine's incendiary political treatises and Thomas Jefferson's Declaration of Independence in tracing the celebrations of the a priori right to freedom at America's founding She then explores three critiques of the ideal of freedom insofar as it allows the persecution of others Frederick Douglass's oratories Native American Sarah Winnemucca's stage performances as an Indian princess and radical abolitionist John Brown's violent raid on Harpers Ferry Bolton shows that it is the face of the other that interrupts the American discourse on freedom to reveal freedom's limits and its obligation to justice An eloquent and thoughtful re-reading of the U S touchstones of democracy this book argues forcefully for an ethical understanding of American literary history
