Roots Of Solidarity:

Pluralizing Humanism Slavica Jakelić, 2025-02-28 Humanism is appealed to today whenever we want to tackle the conditions of dehumanization in the contemporary world. But for humanism to be viable in the twenty-first century, this book argues it needs to be pluralized. Employing theoretical, historical, and sociological arguments, this book moves beyond the discourse of critique. It engages theories of religion and secularism as well as postmodern, postcolonial, and decolonial critiques of Western humanist projects to uncover the ideas and practices of religious and secular humanisms when they challenge dehumanization in the pursuit of conditions of flourishing for all. Through studies of the Solidarity movement in Poland and the anti-apartheid movement in South Africa, the book demonstrates the centrality of humanist traditions to the emergence of religious, secular solidarities that transformed the political landscapes of the world. By highlighting the instances in which humanisms functioned as checks on each other's absolutist claims, the book contends that humanisms supply a constructive path for addressing the challenges of our time: a time of radically divided societies and intolerant, even violent forms of nationalism. A challenge to the critiques of humanism that seek to identify it solely as the legacy of the West, as anti-religious discourse, or relegate it to the domain of power constellations, *Pluralizing Humanism* highlights the rich plurality of humanist discourses and the need for their mutual engagements. It points to humanist ideals as constitutive of politics that can guide our human power because they are irreducible to it. As such, this book will appeal to social scientists, social theorists, religious studies scholars, and ethicists with interests in religion, secularism, social movements, and humanist thought and practice.

Repression and Resistance in Communist Europe Jason Sharman, 2004-06 This book explores the role of coercion in the relationship between the citizens and regimes of communist Eastern Europe. Looking in detail at Soviet collectivisation in 1928-34, the Hungarian Uprising of 1956, and the Polish Solidarity Movement of 1980-84, it shows how the system excluded channels to enable popular grievances to be translated into collective opposition, how this lessened the amount of popular protest, affected the nature of such protest as did occur, and entrenched the dominance of state over society.

The Local Roots of Solidarity Carol Conell, 1987

The Road to Democracy in South Africa South African Democracy Education Trust, 2010 v. 3 The third volume in the series examines the role of anti-apartheid movements around the world. The global anti-apartheid movement was very successful in creating awareness of the liberation struggle in South Africa and in contributing to the downfall of the apartheid government. This volume in 2 parts brings together analyses which in the main are written by activist scholars with deep roots in the movements and organizations they are writing about.

Doing Faithjustice Kammer, Fred, SJ, 2023 The author defines faithjustice as a passionate virtue which disposes citizens to become involved in the greater and lesser societies around themselves in order to create communities where human dignity is protected and enhanced the gifts of creation are shared for the common good and the poor are treated with respect and a special love He says it is in the end a habit of the believing heart Against the backdrop of the author's explicit experiences as a southerner lawyer priest and Jesuit this book expounds on the meaning of faithjustice starting with the biblical grounding It then traverses the full breadth of historical developments in the Catholic Christian community for more than 200 years and elucidates the meaning of faithjustice in our contemporary context Underlining all this is the author's conviction that only people who are living out faithjustice commitments can promote the truth about the necessity of solidarity and counter the pernicious mistrust that creates division in society This updated edition includes new materials on creation and the jubilee tradition and on the parables of Jesus the writings of Popes Benedict XVI and Francis and other social teaching documents from the past twenty years and updated economic racial and social data and analysis in light of the justice tradition

Southern African Liberation Movements and the Global Cold War 'East' Lena Dallywater, Chris Saunders, Helder Adegas Fonseca, 2019-06-17 In the global context of the Cold War the relationship between liberation movements and Eastern European states obviously changed and transformed Similarly forms of material aid and ideological encouragement underwent changes over time The articles assembled in this volume argue that the traditional Cold War geography of bi polar competition with the United States is not sufficient to fully grasp these transformations The question of which side of the ideological divide was more successful or lucky in impacting actors and societies in the global south is still relevant yet the

Cold War perspective falls short in unfolding the complex geographies of connections and the multipolarity of actions and transactions that exists until today Acknowledging the complexities of liberation movements in globalization processes the papers thus argue that activities need to be understood in their local context including personal agendas and internal conflicts rather than relying primarily on the traditional frame of Cold War competition They point to the agency of individual activists in both Africa and Eastern Europe and the lessons practices and languages that were derived from their often contradictory encounters In Southern African Liberation Movements authors from South Africa Portugal Austria and Germany ask What role did actors in both Southern Africa and Eastern Europe play What can we learn by looking at biographies in a time of increasing racial and international conflict And which creative solutions need to be found to combine efforts of actors from various ideological camps Building on archival sources from various regions in different languages case studies presented in the edition try to encounter the lack of a coherent state of the art They aim at combining the sometimes scarce sources with qualitative interviews to give answers to the many open questions regarding Southern African liberation movements and their connections to the East

Principle of Mercy Jon Sobrino, 2015-03-24 The essays in Sobrino's latest collection bear on one of the most pressing signs of the times the existence of a crucified people the poor and oppressed of our world whose suffering presents Christian faith with an urgent demand that we take them down from the cross Writing from the Salvadoran context he presents a theology of mercy reflecting on the principles of mercy and solidarity as the mode of Christian witness and discipleship in a world of conflict and suffering In a personal introduction that sets the tone Sobrino describes the evolution of his own thinking under the impact of the Salvadoran reality Part One focuses on the essential character of mercy and on the importance of shaping the mission of the church and the task of theology Part Two analyzes the crucified reality of the Third World with specific reflections on salvation forgiveness and the grace of being forgiven Part Three presents two manifestations of mercy the reality of priesthood and solidarity Finally in a moving Afterword Sobrino focuses on his martyred fellow Jesuits of the Central American Universit

The Reinvention of Mexico Gavin O'Toole, 2010-10-25 This book examines a sophisticated effort by radical economic reformers to change the ideology of nationalism in Mexico from 1988-94 and so reinvent the country in a way that was more friendly to their market policies and responses to this by opposition parties

Social Movements and the New State Brian K. Grodsky, 2012-09-26 The world's democracies cheered as the social movements of the Arab Spring ended the reigns of longstanding dictators and ushered in the possibility of democracy Yet these unique transitions also fit into a broader pattern of democratic breakthroughs around the globe where political leaders emerge from the pro democracy movement that helped affect change In Social Movements and the New State Brian Grodsky examines the relationships between new political elites and the civil society organizations that brought them to power in three culturally and geographically disparate countries Poland South Africa and Georgia This book argues that the identities and personal networks developed during the struggle provide movement activists with

opportunities to influence minor issues but that new and differing institutional pressures create schisms on broader policy that can turn prior bonds into a liability rather than an asset Drawing on media analyses and more than 150 elite interviews Grodsky offers a rare empirical assessment of the degree to which social movement organizations shape activists beliefs and actions over the long term
