Democratization in South Africa Timothy Sisk, 2017-03-14 Timothy Sisk presents a new way of conceiving the transition to democracy in South Africa Unlike authors such as Horowitz and Lijphart who have sought to prescribe an ideal set of post apartheid political institutions Sisk asks what kinds of institutions show signs of actually emerging given recent history and present realities He treats the problem of constructing a democratic post apartheid society in South Africa as part of a larger condition common to societies deeply divided by ethnic religious racial or national discord Though its profound cleavages of race and class make it a least likely candidate for conflict resolution through democratization Sisk argues that the centripetal pull on moderate politicians of all parties was greater than the seemingly natural polarizing trend in a divided society This centripetal pull led to the adoption of an interim constitution in 1993 after protracted negotiations An American Fulbright scholar sent to South Africa after the end of the 21 year rupture of official scholarly exchanges between the two countries Sisk analyzes the changes in the strategic calculations of the white minority government the black liberation movement and other parties over the course of negotiations since 1990 He concludes that intermittent upsurges of violence often reinforced rather than reduced the incentives of leaders on both sides to negotiate a settlement that would avoid mutually damaging outcomes Drawing on extensive interviews with political figures as well as other primary and secondary sources Sisk finds reason for hope that a democratic social contract can evolve balancing majority rule with minority representation and

Policymaking Under Adversity Yehezkel Dror, 2017-09-29 This groundbreaking study systematically treats recent policymaking trends starting with a reconsideration of salient theoretical issues of policymaking and its study and culminating with a survey of current policy related predicaments in various countries Dror proposes that the task for social science research is to uncover underlying causes of policymaking inadequacies Standard research methods Dror states have been unable to uncover the realities of important decisions made inside governments In order to gain an understanding of pressing predicaments he believes that policymakers need to examine the foundations of contemporary practices of present assumptions and that they need a multiplicity of approaches to policymaking After prescribing a set of requirements that policymaking must satisfy in order to adequately respond to challenges Dror posits several improvements needed in education and in policy decision making The book concludes with an extensive bibliography including numerous important German works not found in other English language studies This book supplements the earlier basic theory and models propounded in Dror's *Public Policymaking* Reexamined by dealing with current trends As a guide to public policy literature and related works it will be invaluable to students and practitioners

Public Administration in the Third World V. Subramaniam, 1990-06-26 This multiauthor reference handbook gives a detailed objective picture of the evolution structure and processes of public administration in representative Third World countries Written by an international group of specialists with first hand knowledge of the subject it presents empirical studies of developing nations in Asia the Middle East North and Sub Saharan Africa the West Indies and Latin America The resulting data are shaped by the editor into a theoretical framework delineating the complex relationships of state bureaucracy and class in the Third World Subramaniam's introduction provides a critical overview of development literature in the field Each case study begins with an historical introduction and discusses the political executive and the administrative structures and processes Among the specific topics

covered are public enterprises administrative departments personnel financial administration and regional and local administrative units The majority of the systems studied are affected by the unregulated power of public enterprises the persistence of colonial legacies and the elitism of the bureaucracy The concluding section relates these common elements to the sociohistorical characteristics of the middle class groups that dominate both politics and public administration Offering new research findings and a useful theoretical synthesis this study will promote a clearer understanding of the internal political processes of Third World nations and be of compelling interest to specialists and students concerned with Third World political economy comparative government and international political economy *The Paradox of Plenty* Terry Lynn Karl, 1997-10-10 The Paradox of Plenty explains why in the midst of two massive oil booms in the 1970s oil exporting governments as different as Venezuela Iran Nigeria Algeria and Indonesia chose common development paths and suffered similarly disappointing outcomes Meticulously documented and theoretically innovative this book illuminates the manifold factors economic political and social that determine the nature of the oil state from the coherence of public bureaucracies to the degree of centralization to patterns of policy making Karl contends that oil countries while seemingly disparate are characterized by similar social classes and patterns of collective action In these countries dependence on petroleum leads to disproportionate fiscal reliance on petrodollars and public spending at the expense of statecraft Oil booms which create the illusion of prosperity and development actually destabilize regimes by reinforcing oil based interests and further weakening state capacity Karl's incisive investigation unites structural and choice based approaches by illuminating how decisions of policymakers are embedded in institutions interacting with domestic and international markets This approach which Karl dubs structured contingency uses a state's leading sector as the starting point for identifying a range of decision making choices and ends by examining the dynamics of the state itself *The Cambridge History of Africa* J. D. Fage, Roland Anthony Oliver, Michael Crowder, 1975 The eighth and final volume of The Cambridge History of Africa covers the period 1940-75 It begins with a discussion of the role of the Second World War in the political decolonisation of Africa Its terminal date of 1975 coincides with the retreat of Portugal the last European colonial power in Africa from its possessions and their accession to independence The fifteen chapters which make up this volume examine on both a continental and regional scale the extent to which formal transfer of political power by the European colonial rulers also involved economic social and cultural decolonisation A major theme of the volume is the way the African successors to the colonial rulers dealt with their inheritance and how far they benefited particular economic groups and disadvantaged others The contributors to this volume represent different disciplinary traditions and do not share a single theoretical perspective on the recent history of the continent a subject that is still the occasion for passionate debate
