**Occupations of the first and second generation of immigrants in the United States. Fecundity of immigrant women** United States. Immigration Commission (1907-1910),1911      **The Position of the Turkish and Moroccan Second Generation in Amsterdam and Rotterdam** Maurice Crul,Liesbeth Heering,2008 Annotation The Dutch second generation of Turkish and Moroccan origin is coming of age and making a transition from education to the labour market This first publication of the TIES Project Towards the Integration of the European Second Generation studies the social situation and views of this ethnic group drawing on the research carried out in Amsterdam and Rotterdam in 2006 07 among the Dutch born children of immigrants from Turkey and Morocco and a comparison group of young people age 18 35 whose parents were born in the Netherlands This title can be previewed in Google Books <http://books.google.com/books> vid ISBN9789089640611 This title is available in the OAPEN Library <http://www.oapen.org>      *Second-Generation Memory and Contemporary Children's Literature* Anastasia Ulanowicz,2013-09-02 Winner of the Children s Literature Association Book Award This book visits a range of textual forms including diary novel and picturebook to explore the relationship between second generation memory and contemporary children s literature Ulanowicz argues that second generation memory informed by intimate family relationships textual mediation and technology is characterized by vicarious rather than direct experience of the past As such children s literature is particularly well suited to the representation of second generation memory insofar as children s fiction is particularly invested in the transmission and reproduction of cultural memory and its form promotes the formation of various complex intergenerational relationships Further children s books that depict second

generation memory have the potential to challenge conventional Western notions of selfhood and ethics This study shows how novels such as Lois Lowry's *The Giver* 1993 and Judy Blume's *Starring Sally J Freedman as Herself* 1977 both of which feature protagonists who adapt their elders' memories into their own mnemonic repertoires implicitly reject Cartesian notions of the unified subject in favor of a view of identity as always already social, relational and dynamic in character This book not only questions how and why second generation memory is represented in books for young people but whether such representations of memory might be considered radical or conservative Together these analyses address a topic that has not been explored fully within the fields of children's literature, trauma and memory studies and Holocaust studies

*Origins and Destinations* Renee Luthra, Roger Waldinger, Thomas Soehl, 2018-10-25 The children of immigrants continue a journey begun by their parents Born or raised in the United States this second generation now stands over 20 million strong In this insightful new book immigration scholars Renee Luthra, Thomas Soehl and Roger Waldinger provide a fresh understanding the making of the second generation bringing both their origins and destinations into view Using surveys of second generation immigrant adults in New York and Los Angeles *Origins and Destinations* explains why second generation experiences differ across national origin groups and why immigrant offspring with the same national background often follow different trajectories Inter group disparities stem from contexts of both emigration and immigration Origin countries differ in value orientations immigrant parents transmit lessons learned in varying contexts of emigration to children raised in the U S A system of migration control sifts immigrants by legal status generating a context of immigration that favors some groups over others Both contexts matter schooling is higher among immigrant children from more secular societies South Korea than among those from more religious countries the Philippines When immigrant groups enter the U S migration system through a welcoming door as opposed to one that makes authorized status difficult to achieve education propels immigrant children to better jobs Diversity is also evident among immigrant offspring whose parents stem from the same place Immigrant children grow up with homeland connections which can both hurt and harm immigrant offspring get less schooling when a parent lives abroad but more schooling if parents in the U S send money to relatives living abroad Though all immigrants enter the U S as non citizens some instantly enjoy legal status while others spend years in the shadows Children born abroad but raised in the U S are all everyday Americans but only some have become de jure Americans a difference yielding across the board positive effects even among those who started out in the same country Disentangling the sources of diversity among today's population of immigrant offspring *Origins and Destinations* provides a compelling new framework for understanding the second generation that is transforming America

Kim, 2007 This in depth study on preaching to second generation Korean Americans the first of its kind is based on empirical and ethnographic fieldwork Matthew D Kim conducted surveys and semi structured qualitative interviews with Korean American pastors and second generation young adult respondents in three geographic

regions of the United States the Midwest the West Coast and the East Coast His primary conceptual framework employs social psychologists Hazel Markus and Paula Nurius theory of possible selves to facilitate the process of congregational exegesis in the second generation Korean American church context This book offers a new contextual homiletic model that enables Korean American preachers to engage in deeper levels of ethnic and cultural analysis in their sermonic preparation Simultaneously the author reconstructs conventional preaching roles of Korean American preachers and second generation listeners so that they may co creatively imagine new possible selves that radically advance Christian mission and practice in the world This book will serve as a primary or secondary source for upper level undergraduate graduate and postgraduate courses on preaching communication studies ethnic and racial studies cross cultural ministry or social psychology

**The New Second Generation** Alejandro Portes, 1996-05-02 The children of the past decade s influx of immigrants comprise a second generation far different than any this country has known before Largely non white and from the world s developing nations these children struggle with complex problems of racial and ethnic relations in multicultural urban neighborhoods attend troubled inner city schools and face discriminatory labor markets and an economy that no longer provides the abundant manufacturing jobs that sustained previous generations of immigrants As the contributors to The New Second Generation make clear the future of these children is an open question that will be key to understanding the long range consequences of current immigration The New Second Generation chronicles the lives of second generation youth in Miami New York City New Orleans and Southern California The contributors balance careful analysis with the voices of the youngsters themselves focusing primarily on education career expectations language preference ethnic pride and the influence of their American born peers Demographic portraits by Leif Jensen and Yoshimi Chitose and by Charles Hirschman reveal that although most immigrant youths live at or below the official poverty line this disadvantage is partially offset by the fact that their parents are typically married self employed and off welfare However the children do not always follow the course set by their parents and often challenge immigrant ethics with a desire to embrace American culture Mary Waters examines how the tendency among West Indian teens to assume an American black identity links them to a legacy of racial discrimination Although the decision to identify as American or as immigrant usually presages how well second generation children will perform in school the formation of this self image is a complex process M Patricia Fernandez Kelly and Richard Schauffler find marked differences among Hispanic groups while Ruben G Rumbaut explores the influence of individual and family characteristics among Asian Latin and Caribbean youths Nativists frequently raise concerns about the proliferation of a non English speaking population heavily dependent on welfare for economic support But Alejandro Portes and Richard Schauffler s historical analysis of language preferences among Miami s Hispanic youth reveals their unequivocal preference for English Nor is immigration an inevitable precursor to a swollen welfare state Lisandro Perez and Min Zhou and Carl L Bankston demonstrate the importance of extended families and ethnic community solidarity in improving school performance and providing increased labor opportunities As immigration continues to change the face of our nation s cities we cannot ignore the crucial issue of how well the second generation youth will adapt The New Second Generation provides valuable insight into issues that may spell the difference between regeneration and decay across urban America
