Voss, Eleanor Conlin Casella, 2011-10-31 This volume examines human sexuality as an intrinsic element in the interpretation of complex colonial societies While archaeological studies of the historic past have explored the dynamics of European colonialism such work has largely ignored broader issues of sexuality embodiment commemoration reproduction and sensuality Recently however scholars have begun to recognize these issues as essential components of colonization and imperialism This book explores a variety of case studies revealing the multifaceted intersections of colonialism and sexuality Incorporating work that ranges from Phoenician diasporic communities of the eighth century to Britain's nineteenth century Australian penal colonies to the contemporary Maroon community of Brazil this volume changes the way we understand the relationship between sexuality and colonial history *The Oxford Companion to Archaeology* Brian M. Cognitive Archaeology David Whitley, Johannes Loubser, Gavin Whitelaw, 2019-11-28 Cognitive Archaeology Mind Ethnography and the Past in South Africa and Beyond aims to interpret the social and cultural lives of the past in part by using ethnography to build informed models of past cultural and social systems and partly by using natural models to understand symbolism and belief How does an archaeologist interpret the past Which theories are relevant what kinds of data must be acquired and how can interpretations be derived One interpretive approach developed in southern Africa in the 1980s has been particularly successful even if still not widely known globally With an expressed commitment to scientific method it has resulted in deeper well tested understandings of belief ritual settlement patterns and social systems This volume brings together a series of papers that demonstrate and illustrate this approach to archaeological interpretation including contributions from North America Western Europe and sub Saharan Africa in the process highlighting innovative methodological and substantive research that improves our understanding of the human past Professional archaeological researchers would be the primary audience of this book Because of its theoretical and methodological emphasis it will also be relevant to method and theory courses and postgraduate students

The Archaeology of Childhood Güner Coşkun, 2015-11-16 Children existed in ancient times as active participants in the societies in which they lived and the cultures they belonged to Despite their various roles and in spite of the demographic composition of ancient societies where children comprised a large percentage of the population children are almost completely missing in many current archaeological discourses To remedy this The Archaeology of Childhood aims to instigate interdisciplinary dialogues between archaeologists and other disciplines on the notion of childhood and children and to develop theoretical and methodological approaches to analyze the archaeological record in order to explore and understand children and their role in the formation of past cultures Contributors consider how the notion of childhood can be expressed in artifacts and material records and examine how childhood is described in literary and historical sources of people from different regions and cultures While we may never be able to reconstruct every last aspect of what childhood was like in the past this volume argues that we can certainly bring children back into archaeological thinking and research and correct many erroneous and gender biased interpretations

The Archaeology of Violence Sarah Ralph, 2013-01-17 The Archaeology of Violence is an interdisciplinary consideration of the role of violence in social cultural and sociopolitical

contexts The volume draws on the work of archaeologists anthropologists classicists and art historians all of whom have an interest in understanding the role of violence in their respective specialist fields in the Mediterranean and Europe The focus is on three themes contexts of violence politics and identities of violence and sanctified violence In contrast to many past studies of violence often defined by their subject specialism or by a specific temporal or geographic focus this book draws on a wide range of both temporal and spatial examples and offers new perspectives on the study of violence and its role in social and political change Rather than simply equating violence with warfare as has been done in many archaeological cases the volume contends that the focus on warfare has been to the detriment of our understanding of other forms of non warfare violence and has the potential to affect the ways in which violence is recognized and discussed by scholars and ultimately has repercussions for understanding its role in society **Theatre/Archaeology** Mike Pearson,Michael Shanks,2005-07-08

Theatre Archaeology is a provocative challenge to disciplinary practice and intellectual boundaries It brings together radical proposals in both archaeological and performance theory to generate a startlingly original and intriguing methodological framework **Unmasking Ideology in Imperial and Colonial Archaeology** Bonnie Effros,Guolong Lai,2018-12-31 This volume addresses the entanglement between archaeology imperialism colonialism capitalism and war Popular sentiment in the West has tended to embrace the adventure rather than ponder the legacy of archaeological explorers allegations by imperial powers of discovering archaeological sites or saving world heritage from neglect or destruction have often provided the pretext for expanding political influence Consequently citizens have often fallen victim to the imperial war machine seeing their lands confiscated their artifacts looted and the ancient remains in their midst commercialized Spanning the globe with case studies from East Asia Siberia Australia North and South America Europe and Africa sixteen contributions written by archaeologists art historians and historians from four continents offer unusual breadth and depth in the assessment of various claims to patrimonial heritage contextualized by the imperial and colonial ventures of the last two centuries and their postcolonial legacy *Contemporary Archaeology in Theory* Robert W. Preucel,Stephen A.

Mrozowski,2011-10-04 The second edition of *Contemporary Archaeology in Theory* The New Pragmatism has been thoroughly updated and revised and features top scholars who redefine the theoretical and political agendas of the field and challenge the usual distinctions between time space processes and people Defines the relevance of archaeology and the social sciences more generally to the modern world Challenges the traditional boundaries between prehistoric and historical archaeologies Discusses how archaeology articulates such contemporary topics and issues as landscape and natures agency meaning and practice sexuality embodiment and personhood race class and ethnicity materiality memory and historical silence colonialism nationalism and empire heritage patrimony and social justice media museums and publics Examines the influence of American pragmatism on archaeology Offers 32 new chapters by leading archaeologists and cultural anthropologists **Archaeology and Conservation along the Silk Road** Gabriela Krist,Liangren Zhang,2018-11-12

Market Capitalism Gaye Nayton,2011-04-13 The area claimed by the British Empire as Western Australia was primarily colonized through two major thrusts the development of the Swan River Colony to the southwest in 1829 and the 1863 movement of Australian born settlers to colonize the northwest region The Western Australian story is overwhelmingly the story of the spread of market capitalism a narrative which is at the foundation of modern western world economy and culture Due to the timing of settlement in Western Australia there was a lack of older infrastructure patterns based on industrial capitalism to evoke geographical inertia to modify and deform the newer system in many ways making the systemic patterns which grew out of market capitalist forces clearer and easier to delineate than in older settlement areas However the struggle between the forces of market capitalism settlers and indigenous Australians over space labor physical and economic resources and power relationships are both unique to place and time and universal in allowing an understanding of how such complicated regional interregional and global forces shape a settler society Through an examination of historical records town layout and architecture landscape analysis excavation data and material culture analysis the author created a nuanced understanding of the social economic and cultural developments that took place during this dynamic period in Australian history In examining this complex settlement history the author employed several different research methodologies in parallel to create a comprehensive understanding of the area Her research techniques will be invaluable to researchers struggling to understand similarly complex sociocultural evolutions throughout the globe American Journal of

Archaeology and of the History of the Fine Arts ,1902 **CAA2014: 21st Century Archaeology** F. Giligny,F. Djindjian,L. Costa,2015-03-31 This volume brings together a selection of papers proposed for the Proceedings of the 42nd Computer

Applications and Quantitative Methods in Archaeology conference CAA hosted at Paris 1 Pantheon Sorbonne University from 22nd to 25th April 2014 **The Journal of Egyptian Archaeology** ,1922 **Theory and Practice in Mediterranean Archaeology** Richard M. Leventhal,John K. Papadopoulos,2003-12-31 Theory and Practice in Mediterranean Archaeology Old World and New World Perspectives brings together leading scholars from the Old World and the Americas to discuss some of the most pressing issues facing archaeology today These topics include archaeology and text the future of large scale archaeological fieldwork at individual sites interpretation and preservation of archaeological sites and landscapes past trajectories and new approaches to regional survey and debates surrounding landscape and settlement archaeology Essays by Old World archaeologists provide an overview of these themes as well as a history of research over the last hundred years These scholars review the major successes and shortcomings of that work identifying critical issues that determine and define the field These essays serve as a springboard for discussion and response by archaeologists working in the Americas and in other parts of the world The combination of an Old World focus with responses from New World archaeologists provides a uniquely broad assessment of contemporary archaeological theory methods and practice throughout the world

Archaeology and Public Perception of a Transscientific Problem Isaac Judah Winograd,Geological Survey (U.S.),1987 See journals under US Geological survey Circular 990 **Archaeology and the Media** Timothy Clack,Marcus Brittain,2016-09-16 The public s fascination with archaeology has meant that archaeologists have had to deal with media more regularly than other scholarly disciplines How archaeologists communicate their research to the public through the media and how the media view archaeologists has become an important feature in the contemporary world of academic and professional archaeologists In this volume a group of archaeologists many with media backgrounds address the wide range of questions in this intersection of fields An array of media forms are covered including television film photography the popular press art video games radio and digital media with a focus on the overriding question What are the long term implications of the increasing exposure through and reliance upon media forms for archaeology in the contemporary world The volume will be of interest to archaeologists and those teaching public archaeology courses
