Secondary Education Perspectives And Prospects:

Secondary Education Daniel Tanner,1972 **Secondary Education** ,1997 **Education for Values: Morals, Ethics and Citizenship in Contemporary Teaching** Jo Cairns,Roy Gardner,Denis Lawton,2013-05-13 Values in education in terms of both how they are taught and of the ethics of teaching itself are an area of lively debate This text provides a resource of ideas issues and practice for all those with an interest in this area of education **Democracy's High School** William G. Wraga,1994 The comprehensive high school model emerged from the early 20th century struggle for a unitary as opposed to a dual system of secondary education and was outlined in the report of the Commission on the Reorganization of Secondary Education The Cardinal Principles of Secondary Education 1918 In this study Wraga traces the development of the model in the United States evaluating among other things the influence of sociopolitical forces on the historical interpretations of the model In the first book length historical study of the comprehensive high school he assesses the impact of successive reform movements on the model and offers recommendations for enhancing its effectiveness School Choice and Competition: Markets in the Public Interest? Philip Woods,Carl Bagley,Ron Glatter,2005-06-23 This book reports on the findings of a unique investigation into the impact of education reforms aimed at introducing more choice and competition into the school system **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1974 **Improving Education in Mexico A State-level Perspective from Puebla** OECD,2013-09-02 This book suggests strategies for building an education model that could inspire other Mexican states and fuel federal reform efforts Education in Brazil An International Perspective OECD,2021-06-30 The Education in Brazil An International Perspective report was developed drawing on internationally comparative data on education in Brazil in particular the extensive range of data collected by the OECD through its surveys The experiences of other countries and how they have tackled challenges similar to those now faced by Brazil along with the insights from consultations with key national experts also inform the analysis *Feminist Critical Policy Analysis: A perspective from primary and secondary schooling* Catherine Marshall,1997 **Understanding Curriculum** William F. Pinar,1995 Perhaps not since Ralph Tyler s 1949 Basic Principles of Curriculum and Instruction has a book communicated the field as completely as Understanding Curriculum From historical discourses to breaking developments in feminist poststructuralist and racial theory including chapters on political theory phenomenology aesthetics theology international developments and a lengthy chapter on institutional concerns the American curriculum field is here It will be an indispensable textbook for undergraduate and graduate courses alike **Schools Making a Difference** Martin Thrupp,1999-05-16 Does an effective school really come about through the actions of teachers and school leaders or does it also require an advantaged student intake This question reflects a longstanding research debate about whether or not the social class mix of a school s student intake has much effect on individual achievement Schools Making a Difference Let s Be Realistic presents new evidence which suggests that school mix is likely to be important because of the way many school

processes are deeply influenced by student intake characteristics Low socioeconomic schools face numerous intake related constraints which make them highly resistant to improvement efforts By suggesting that failing schools are often overwhelmed rather than ineffective this book provides a sympathetic reappraisal of the performance of teachers and school leaders in such schools It also offers a critical response to the often unrealistic claims of the school effectiveness and school improvement movement and a fresh critique of market reforms in education

International Studies in Educational Inequality, Theory and Policy Richard Teese, Stephen Lamb, Marie Duru-Bellat, 2007-05-18 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies The book covers many different global contexts from the wealthiest to some of the poorest nations on earth It therefore offers a broad range of different theoretical and methodological approaches and brings together extensive international experience in equity policy

Schools, Markets and Choice Policies John Fitz, Stephen Gorard, Chris Taylor, 2003-12-16 Choice and selection are now cornerstones of education policies wherever these have been shaped by market economics Now as never before schools can face uncertain futures because their survival is determined by external factors such as admission policies and parental preferences Because of the link between schooling and housing and other public sector services the implications of increasing choice extends well beyond education Schools Markets and Choice Policies brings together the findings of the most comprehensive research ever conducted into choice in secondary education and provides in depth context analysis and discussion In assessing the impact of choice policies not only upon the education system itself but also upon wider society it provides valuable insights into economic and social segregation A groundbreaking contribution to the debate on the role of choice and market economies in education this book is essential reading for anyone involved in determining or implementing education policy at all levels

School Choice and Student Well-Being A. Kelly, 2007-08-16 This review of research in school choice adapts Sen's theory of Capability developing a more complex theoretical framework for understanding education markets This gives those most affected by the perceived failure of public education a better explication of the tension between the rhetoric of public good and the reality of everyday disadvantage

Underachievement in Schools Hazel Pennell, Anne West, 2003-12-08 There is greater pressure for schools to meet certain levels of pupil achievement now more than ever before Teachers and policy makers are looking for ways to ensure pupils are not underachieving and to do this must have some understanding of the causes of underachievement This timely book examines different levels of achievement of pupil groups and the reasons behind them The authors highlight ways in which schools and policy makers might improve achievement through changes in policy and practice Some of the topics considered are What is underachievement Social background and achievement School structures and achievement Schools raising attainment

Underachievement in Schools will be a valuable resource for anyone involved with school policy as well as teachers and those training to teach
