Secret Agent Gavin Webster, 2004 **Intelligent Virtual Agents** Jan Allbeck, Norman Badler, Timothy Bickmore, Catherine Pelachaud, Alla Safonova, 2010-09-03

Welcome to the proceedings of the 10 International Conference on Intelligent Virtual Agents IVA held 20-22 September 2010 in Philadelphia Pennsylvania USA. Intelligent Virtual Agents are interactive characters that exhibit human-like qualities and communicate with humans or with each other using natural human modalities such as behavior, gesture, and speech. IVAs are capable of real-time perception, cognition, and action that allow them to participate in a dynamic physical and social environment. IVA 2010 is an interdisciplinary annual conference and the main forum for presenting research on modeling, developing, and evaluating Intelligent Virtual Agents with a focus on communicative abilities and social behavior. The development of IVAs requires expertise in multimodal interaction and several AI fields such as cognitive modeling, planning, vision, and natural language processing. Computational models are typically based on experimental studies and theories of human-human and human-robot interaction; conversely, IVA technology may provide interesting lessons for these fields. Visualizations of IVAs require computer graphics and animation techniques and in turn supply significant realism problem domains for these fields. The realization of engaging IVAs is a challenging task so reusable modules and tools are of great value. The fields of application range from robot assistants, social simulation, and tutoring to games and artistic exploration. The enormous challenges and diversity of possible applications of IVAs have resulted in an established annual conference.

This volume contains the papers selected for presentation at the 14th International Symposium on Methodologies for Intelligent Systems ISMIS 2003 held in Maebashi City, Japan, 28-31 October 2003. The symposium was organized by the Maebashi Institute of Technology in co-operation with the Japanese Society for Artificial Intelligence. It was sponsored by the Maebashi Institute of Technology, Maebashi Convention Bureau, Maebashi City Government, Gunma Prefecture Government, US AFOSR AOARD, the Web Intelligence Consortium, Japan Gunma Information Service Industry Association, and Ryomo Systems Co. Ltd. ISMIS is a conference series that was started in 1986 in Knoxville, Tennessee. Since then it has been held in Charlotte, North Carolina; Knoxville, Tennessee; Turin, Italy; Trondheim, Norway; Warsaw, Poland; Zakopane, Poland; and Lyon, France. The program committee selected the following major areas for ISMIS 2003: active media, human-computer interaction, autonomic and evolutionary computation, intelligent agent technology, intelligent information retrieval, intelligent information systems, knowledge representation and integration, knowledge discovery and data mining, logic for artificial intelligence, soft computing, and Web intelligence.

Modelling Machine Emotions for Realizing Intelligence Toyoaki Nishida, Colette Faucher, 2010-06-21 Emotion connects the thought to the body which is a magnificent biological vice for sensing and affecting the world The thought controls the body through emotions The body affects the thought through emotions Through this mechanism the thought allows the agent to behave intelligently in the complex world filled with a huge amount of dynamic information The emotion maps a flux of information into a space which the agent is familiar with enabling her him to associate ongoing events with past experiences which help to reduce complexity by providing with a nominal solution Recent findings in brain science suggest that mirror neurons map visual signals into motor signals for the body This mechanism might permit one to experience the emotion of the other agent just by feeling the motor signals caused by mirror neurons as a result of visual stimuli caused by the other agent's emotional behaviors In particular it might play a significant role in invoking empathy in a social situation It may not be hard to think about what might happen to emotionless machines The emotionless machines may not be able to accumulate experiences to avoid serious failures They may not be able to communicate with the humans in an empathetic way
