Fa, 2012-12-06 The Barbary macaque all too often mistakenly called an ape was first brought to the attention of the Conservation Working Party of the Primate Society of Great Britain late 1979 when John Fa reported that surplus animals were being sent from Gibraltar to dubious locations such as an Italian safari park Since there had been no scientific input into the Army's management of the monkey colony on Gibraltar and there was concern about inbreeding nutrition and health about the long term viability of the colony it was felt that the Society could help The Gibraltar Scientific Authority and the Army were very receptive to our offer and ideas and this topic occupied successive chairmen over the last few years Robin Dunbar and Richard Wrangham myself and now Miranda Stevenson with constant prompting and help from John Fa Considerations soon extended to the status of the species as a whole so that there have been three main aspects 1 the improved health of a larger self sustaining population on Gibraltar 2 the status and behavioural biology of natural populations in North Africa Morocco and Algeria and 3 the breeding achievements in European parks and zoos and their potential for reintroduction to suitable areas in North Africa along with other possibilities Robin Dunbar organized the compilation of recommendations for managing the Gibraltar colony with regard to numbers age sex structure and behavioural relationships with some observations on diet to avoid obesity and infertility **Mergers and Productivity** Steven N. Kaplan, 2007-12-01 Mergers and Productivity offers probing analyses of high profile mergers in a variety of industries Focusing on specific acquisitions it illustrates the remarkable range of contingencies involved in any merger attempt The authors clearly establish each merger's presumed objectives and the potential costs and benefits of the acquisition and place it within the context of the broader industry Striking conclusions that emerge from these case studies are that merger and acquisition activities were associated with technological or regulatory shocks and that a merger's success or failure was dependent upon the acquirer's thorough understanding of the target its corporate culture and its workforce and wage structures prior to acquisition Sifting through a wealth of carefully gathered evidence these papers capture the richness the complexity and the economic intangibles inherent in contemporary merger activity in a way that large scale studies of mergers cannot The Philosophy of Risk John C. Chicken, Tamar Posner, 1998 An element of risk is inherent in most activities but discussion about the acceptability of risk is often compartmentalised This

book aims to give decision makers a logical overall philosophy of risk
