de discutir el proyecto de la Vivienda Social encontraba una estructura conceptual que a modo de síntesis me permitía ordenar mis antecedentes en materia de investigación. Antes como joven investigador en formación había transitado temas tales como la aptitud de las tierras donde se espacializa la vulnerabilidad social, la diversidad y cambios en las constituciones familiares recientes y su implicancia en el registro de los modos de habitar de los destinatarios de las políticas públicas de vivienda, la ausencia de respuestas técnicas constructivas eficaces para respuesta al déficit habitacional y en el marco de los parámetros normativos vigentes entre otros. En el marco de los trabajos de investigación del Laboratorio de Tecnología y Gestión Habitacional LATEC comenzaba a aprehender algunas nociones de disponibilidad de suelo urbano técnicas de prefabricación liviana, fábrica social, mínimos dimensionales, formas imperfectas en la tenencia, gestión participativa del diseño entre otras. Modern Architecture in Latin America Luis E. Carranza, Fernando Luiz Lara, 2015-01-05. Designed as a survey and focused on key examples and movements arranged chronologically from 1903 to 2003, this is the first comprehensive history of modern architecture in Latin America in any language. Runner up University Co-op Robert W. Hamilton Book Award 2015. *Modern Architecture in Latin America* Art, Technology, and Utopia is an introductory text on the issues, polemics, and works that represent the complex processes of political, economic, and cultural modernization in the twentieth century. The number and types of projects varied greatly from country to country, but as a whole, the region produced a significant body of architecture that has never before been presented in a single volume in any language. *Modern Architecture in Latin America* is the first comprehensive history of this important production. Designed as a survey and focused on key examples, paradigms arranged chronologically from 1903 to 2003, this volume covers a myriad of countries, historical, social, and political conditions, and projects, developments that range from small houses to urban plans to architectural movements. The book is structured so that it can be read in a variety of ways: as a historically developed narrative of modern architecture in Latin America; as a country-specific chronology; or as a treatment of traditions centered on issues of art, technology, or utopia. This structure allows readers to see the development of multiple and parallel branches, historical strands of architecture, and at times their interconnections across countries. The authors provide a critical evaluation of the movements presented in relationship to their overall goals and architectural transformations.

Tardomodernidad en crisis Andreas Reckwitz, Hartmut Rosa, 2022-10-17. Estamos estancados en una vida frenética, alienada y desconectada del entorno social y natural. Necesitamos un horizonte social alternativo. Para ello, los dos sociólogos más importantes de Alemania elaboran una novedosa teoría crítica que da respuesta a la crisis multidimensional de la época actual. Andreas Reckwitz y Hartmut Rosa presentan sus respectivas concepciones de las dos ramas de la teoría sociológica: la teoría social (Sozialtheorie) y la teoría de la sociedad (Gesellschaftstheorie). Andreas Reckwitz define su propia teoría de la praxis y desarrolla los mecanismos de su teoría de la sociedad tardomoderna. Por otro lado, Hartmut Rosa profundiza en su

original sociología de las relaciones con el mundo y propone la estabilización adaptativa y la resonancia como dos terapias para la superación de las patologías sociales de la tardía modernidad. Un extraordinario diálogo que aspira a contribuir al debate en torno a otras formas de relacionarnos con los demás seres vivos y nuestro entorno y que se distingue por un estilo amigable a la hora de tratar tópicos tan ricos y complejos. *Modern Architecture of Quito* Christian Parreno, 2024-08-22

Situated at the crossroads of the foreign and the vernacular, Quito, the capital of Ecuador, with its world famous yet understudied built environment stands as a testament to architectural in-betweenness. This book interweaves history and theory to explore how near and far influences have shaped its unique character. Case studies present diverse and unexpected episodes in the architectural history of this city, spanning the intricacies of its topography, the design of modernist houses and the appropriation of the motel typology. Together they show how fluxes of different origins have created an architecture marked by diversity and interrelation. To theoretically frame these investigations, this anthology readdresses the notions of the global and the local, examining their tension and unavoidable coexistence while introducing the in-between as a phenomenon with many variations and embodiments increasingly referenced in architectural thinking. This book not only furthers the evolution of these concepts but also demonstrates their value as tools for analyzing the architectures of Latin America and the Global South more broadly. With contributions from both international experts and a new generation of Ecuadorian scholars, *Modern Architecture of Quito* is an indispensable resource for students and researchers investigating the development of architectural modernism in Latin America. **VERSUS: Heritage for Tomorrow** Correia,

Mariana, Dipasquale, Letizia, Mecca, Saverio, 2014. Vernacular architecture represents a great resource that has considerable potential to define principles for sustainable design and contemporary architecture. This publication is the result of an overall aim to produce a valuable tool for analysis regarding vernacular heritage through different assessments in order to define principles to consider for sustainable development. This was possible through a comprehensive reflection on the principles established and the strategies to recognise in different world contexts. The present publication was the result of an in-depth approach by 46 authors from 12 countries concerned with the analysis and critical assessment of vernacular heritage and its sustainable perspective. The book presents 8 chapters addressing operational definitions and synopses, advances regarding the main areas of vernacular heritage contribution to sustainable architecture. It also presents 15 chapters and 53 case studies of vernacular and contemporary approaches in all the 5 continents regarding urban architectural technical and constructive strategies and solutions. **VERSUS: HERITAGE FOR TOMORROW**. Vernacular Knowledge for Sustainable Architecture is the result of a common effort undertaken by the partners: ESG Escola Superior Gallaecia Portugal as Project leader, CRATERRE cole Nationale Supérieure d'Architecture de Grenoble France, DIDA Università degli Studi di Firenze Italy, DICAAR Università degli Studi di Cagliari Italy and UPV Universitat Politècnica de València Spain. This is the final outcome of VerSus, an European project developed from 2012 to 2014 in the framework of the Culture 2007-2013 programme.
