Multiple Risk Factors in Cardiovascular Disease

Giovanni Lorenzini Foundation (Milan), International Symposium on Multiple Risk Factors in Cardiovascular Disease, 1998

The issue of interaction of risk factors in cardiovascular disease is timely and of clinical relevance. This book is a collection of the scientific contributions to the 4th International Symposium on Multiple Risk Factors and Cardiovascular Disease.

Strategies of Prevention of Coronary Heart Disease, Cardiac Failure and Stroke, and addresses the role of simultaneous risk factors in patients. Because patients with two or more risk factors are at very high risk for developing cardiovascular diseases, special care should be taken in the choice of appropriate therapeutic intervention. Risk factors are also discussed from the point of view of the biochemist and the pharmacologist by addressing the mechanisms underlying the onset of hypertension, hyperlipoproteinemia, hypercoagulability, and the possibility of therapeutic intervention. This book will therefore be of value to the biochemist, pharmacologist, and clinical pharmacologist as well as to specialists in the field of cardiovascular medicine in order to keep up to date with current knowledge in this fast moving field of research.
