Joseph Hillis Miller

Painted By The Sun:

Polychrome Sculpture Johannes Taubert, 2016-02-15 In the decades since its initial publication in German in 1978 *Polychrome Sculpture* has come to be widely regarded as a watershed text on the making and meaning of European medieval and Baroque painted wood sculpture An early proponent of interdisciplinary research Johannes Taubert played a pioneering role in combining the rigorous scientific analysis of materials with a fuller understanding of form and function an approach that has led to the development of technical art history as practiced today Many of the essays in this volume apply such scientific techniques as microscopic analysis to an art historical understanding of Romanesque and late Gothic wood sculpture revealing that far from serving a merely decorative function the painted surface of these works was intricately connected to their meaning The paint layers on the sculptures for example which the author spent years documenting through close examination and analysis were intended to impart a heightened sense of reality to the life sized sculptures thereby enhancing the viewer's experience of worship Taubert believed it was crucial for conservators to understand this context before undertaking any treatments No other book offers such a focused subtle and interdisciplinary examination of the subject as *Polychrome Sculpture* This influential work is now available in English for the first time in a meticulous translation enhanced and updated by new color illustrations annotations to the original text and a new introduction

Illustration Joseph Hillis Miller, 1992 Positioning himself in the slippery divide between two highly charged critical approaches deconstruction and cultural studies J Hillis Miller explains why the split occurred and offers for the first time an eloquent analysis of the goals and methods of cultural studies Miller's *Illustration* is an intellectual adventure that transgresses the boundaries of critical theory to reveal the ideological forces at work The result art critic Norman Bryson concludes is an extraordinary performance In a positive constructive way Miller describes cultural studies as primarily a means of contextualizing works of art Relating the assumptions behind this approach to recent social political and technological changes he shows how cultural studies is itself subject to its context and thus perhaps misguided insofar as it portrays art objects as mere illustration In particular Miller considers new forms of electronic research in the humanities which with their vast homogenizing effect on data can compel a critic to reconfigure information in fact to create the context that he or she means simply to identify To illustrate this phenomenon Miller investigates one topic of importance for cultural studies the relation of verbal and visual forms in multimedia works Drawing examples from Twain Gorey Mallarmé James Ruskin Heidegger Dickens and Turner he shows how neither word nor image takes priority in such collaborations nor is either a mere representation of a pre-existing reality The transformations wrought by cultural artifacts on their contexts Miller contends must be identified through detailed and vigilant rhetorical readings if the force of a work of art is to be passed on into the current cultural situation And for the new form these readings take the reader critic must in turn assume responsibility

helps readers separate the sensible from the specious At a time when humanities departments are shrinking and when STEM education is on the rise Bioaesthetics makes vital points about the limitations of science while lodging a robust defense of the importance of the humanities

The Pictorial Third Liliane Louvel, 2018-05-23 The Pictorial Third An Essay into Intermedial Criticism examines the extent to which poetry intertwines with painting and the visual at large and studies the singular relationship established between language and image observing the modalities and workings of what is termed intermedial transposition By following a critical method of the close analysis of texts the book examines to what extent the pictorial tool may be of help to analyze literary texts and thus enlarge and enrich literary criticism Examining the technical notions typical of the medium and its history including perspective framing colour anamorphosis trompe l'œil Veronika veil still life portrait figure illusion apparatus genres and styles this volume presents a pragmatics of image in text and of the visual in text as an operative tool This pictorial reading necessarily includes synesthesia and the senses it also functions as a reading event or what happens to one when one unawares encounters a picture be it present in the book or the object of an ekphrasis Thus the body is eventually given back a role to play The sensitive approach has its own resonances and the eye or the gaze sometimes sees double in such intermedially oriented texts This volume proposes to identify the pictorial third as the phenomenon which can be apprehended in terms of effect or affect not only as a concept
