Islamism and Intelligence in South Asia Prem

Mahadevan, 2018-05-10 State sponsorship of terrorism is a complex and important topic in today's international affairs and especially pertinent in the regional politics of the Middle East and South Asia where Pakistan has long been a flashpoint of Islamist politics and terrorism. In *Islamism and Intelligence in South Asia*, Prem Mahadevan demonstrates how over several decades radical Islamists, sometimes with the tacit support of parts of the military establishment, have weakened democratic governance in Pakistan and acquired progressively larger influence over policy making. Mahadevan traces this history back to the anti-colonial Deobandi movement which was born out of the post-partition political atmosphere and a rediscovery of the thinking of Ibn Taymiyyah and partially ennobled the idea of jihad in South Asia as a righteous war against foreign oppression. Using Pakistani media and academic sources for the bulk of its raw data and reinforcing this with scholarly analysis from Western commentators, the book tracks Pakistan's trajectory towards a soft Islamic revolution. Envisioned by the country's intelligence community as a solution to chronic governance failures, these narratives called for a re-orientation away from South Asia and towards the Middle East. In the process, Pakistan has become a sanctuary for Arab jihadist groups such as Al Qaeda, who had no previous ethnic or linguistic connection with South Asia. Most alarmingly, official discourse on terrorism has been partly silenced by the military intelligence complex. The result is a slow drift towards extremism and possible legitimization of internationally proscribed terrorist organizations in Pakistan's electoral politics. Democratic

Accountability and International Human Development Kamran Ali Afzal, Mark Considine, 2014-11-27 Scholars and policymakers have long known that there is a strong link between human development and spending on key areas such as education and health. However, many states still neglect these considerations in favour of competing priorities such as expanding their armies. This book examines how states arrive at these decisions, analysing how democratic accountability influences public spending and impacts on human development. The book shows how the broader paradigm of democratic accountability, extending beyond political democracy to also include bureaucratic and judicial institutions as well as taxation and other modes of resource mobilisation, can best explain how states allocate public resources for human development. Combining cross-country regression analysis with exemplary case studies from Pakistan, India, Botswana and Argentina, the book demonstrates that enhancing human capabilities requires not only effective party competition and fair elections but also a particular nesting of public organisational structures that are tied to taxpaying citizens in an undisturbed chain of accountability. It draws out vital lessons for institutional design and our approach to the question of human development, particularly in the less developed states. This book will be of great interest to postgraduate students and researchers in the fields of political economy, public policy, governance and development. It also provides valuable insights for those working in the international relations field, including inside major aid and investment organisations. **Federalism in South Asia**

Mahendra Prasad Singh, Veena Kukreja, 2014-08-07 This book is one of the first in depth and systematic studies on the

functioning and aspiring federations of South Asia It examines how federal dynamics in India Pakistan Nepal and Sri Lanka are impinged on by the nature of their specific constitutions their societal political and cultural fabrics composition of power elites and ruling classes structures of political economy and market electoral and party systems mass media and information technology The authors offer a comparative analytical conceptual and theoretical framework to understand patterns and trends as also experiences of and possibilities for federalism in South Asia They highlight divergences and similarities successes and key challenges while indicating federalism's wider regional relevance in the discourse on democracy and governance The book concludes that the multicultural character of these societies beset with ethnic and regional conflicts separatist and military undercurrents makes federal political solutions the only viable route Providing a wealth of material this will deeply interest scholars students and teachers of comparative politics political science federal studies area studies as well as those interested in political structures and processes in South Asia South Asia's Weak States T. V.

Paul, 2010-08-09 South Asia which consists of eight states of different sizes and capabilities is characterized by high levels of insecurity at the inter state intra state and human level insecurity that is manifest in both traditional and non traditional security problems especially transnational terrorism fuelled by militant religious ideologies To explain what has caused and contributed to the perpetual insecurity and human suffering in the region this book engages scholars of international relations comparative politics historical sociology and economic development among others to reveal and analyze the key underlying and proximate drivers It argues that the problems are driven largely by two critical variables the presence of weak states and weak cooperative interstate norms Based on this analysis and the conclusions drawn the book recommends specific policies for making the region secure and for developing the long lasting inter and intra state cooperative mechanisms necessary for the perpetuation of that security **Cricket: A Political History of the Global Game,**
