

# Duchenne Muscular Dystrophy Pathogenesis

In 1986, researchers identified a gene on the X chromosome that, when flawed (mutated), causes both Duchenne and Becker muscular dystrophies.

DMD occurs because the mutated gene fails to produce virtually any functional dystrophin. Lack of dystrophin causes muscle damage and progressive weakness, beginning in early childhood.

**Pathogenesis and Therapy of Duchenne and Becker Muscular Dystrophy** Byron Arthur Kakulas, Frank L. Mastaglia, 1990     Mechanisms in Duchenne Muscular Dystrophy Pathophysiology and Treatment Atsushi Asakura, Masatoshi Suzuki, Katsumasa Goto, 2023-09-07     **Handbook of Stem Cell Therapy** Khawaja Husnain Haider, 2022-11-07 The handbook comprehensively reviews the therapeutic potential of stem cells and stem cell secretome based cell free strategies in regenerative medicine The chapters in section I and section II respectively discuss the diverse applications of mesenchymal stem cells and non mesenchymal stem cells including skeletal myoblasts endothelial progenitor cells adipose tissue derived stem cells induced pluripotent stem cells and neuronal stem cells in myocardial repair inflammatory bowel disease cognitive deficits wound healing retinal disorders and COVID 19 The subsequent chapters in section III primarily focused on the fast emerging cell free therapy approach in regenerative medicine for tissue repair and regeneration These chapters review the impact of stem cell derived secretome on various biological processes such as angiogenesis neurogenesis tissue repair immunomodulation musculoskeletal pathologies wound healing anti fibrotic and anti tumorigenesis for tissue maintenance and regeneration Lastly section IV summarizes miscellaneous aspects of cell based therapy including the treatment advantages opportunities and shortcomings in stem cell based therapy potentially helping to refine future studies and translate them from experimental to clinical studies Moreover this section also has chapters on cancer stem cells as novel targets in cancer therapeutics This Major Reference Book MRW is a valuable resource for researchers involved in stem cell research to understand the multifaceted therapeutic applications of stem cells and their derivative secretome in regenerative medicine     **Stem Cell Therapy** Erik V. Greer, 2006 Among the many applications of stem cell research are nervous system diseases diabetes heart disease auto immune diseases as well as Parkinson s disease end stage kidney disease liver failure cancer spinal cord injury multiple sclerosis Parkinson s disease and Alzheimer s disease Stem cells are self renewing unspecialised cells that can give rise to multiple types all of specialised cells of the body Stem cell research also involves complex ethical and legal considerations since they involve adult foetal tissue and embryonic sources This new book brings together leading research from throughout the world in this frontier field     *Myoblast Transfer Therapy* Robert C. Griggs, George Karpati, 2012-12-06 I am pleased to introduce this volume on Myoblast Transfer Therapy on behalf of the Muscular Dystrophy Association and all of its Advisory Committees The international conference which led to this volume brought together leading basic scientists and clinical investigators for the purpose of coordinating the development of this new field in the fight against muscular dystrophy The Muscular Dystrophy Association is the nation s most rapidly growing voluntary health agency in terms of its programs of patient care research and professional and public education Success is attributable to its National Chairman Jerry Lewis to its effective corporate membership and to the many physicians and scientists who give their time freely to advise on policies to review grant applications and to participate in

meetings such as this I should like to acknowledge a large number of other individuals to whom we are indebted the broad segment of the American public which continually and generously supports our spectrum of services The Muscular Dystrophy Association next year should raise in excess of 115 000 000 These contributions are derived from more than 10 million American families These families are not only pledging their money but expressing their hopes that we will find answers to the tragic problem of neuromuscular disease We are confident that the fruits of this meeting will move the frontier of research forward toward that goal
