Pathology of the Bone Marrow Karl Lennert, Klaus Hübner, 1984 *Illustrated Pathology of the Bone Marrow* Attilio Orazi, Dennis P. O'Malley, Daniel A. Arber, 2006-07-20 This book provides a highly illustrated and comprehensive account of the diseases of the human bone marrow. It will help experienced clinicians and those in training to answer the practical diagnostic questions that arise during the routine analysis of bone marrow core biopsy specimens. Emphasis is placed on the evaluation of peripheral blood aspirate smear, clot section and core biopsy as well as ancillary techniques including flow cytometry and immunohistochemistry in the diagnosis of hematologic disorders of the marrow. The text is illustrated with numerous color figures, charts and tables and descriptions of real case situations using the most up to date classification systems. *Illustrated Pathology of Bone Marrow* should be read by all pathologists, hematologists and laboratory technicians involved in the analysis of bone marrow specimens.

In the future, the haematologist and the histopathologist will work more closely together. This is because smears of bone marrow aspirates, after lengthy discussions and enquiries, the conclusion together with peripheral blood films and results of other tests was reached that the magnifications of most of the tests and investigations provided the information on which illustrations could be omitted without detracting from the usefulness of the Atlas. The magnifications used are the clinical diagnosis was based. Recently, the widespread availability of both improved techniques indicated in Fig 1.25. In addition, not every detail specific biopsy needles and techniques for processing has been greatly indicated in a figure or its legend. The number of routinely taken bone biopsies mentioned in the text and often a range of observations and placed the examination of bone marrow biopsy is illustrated and in these cases the legends are self-explanatory. Also in the field of histopathology, so that explanatory this Atlas is one of the Current Histopathology series. This Atlas is directed to haematologists and to histopathologists. Therefore, the haematologist and the histopathologist, pathologists and to anyone interested in the investigation now complement each other in the interpretation of bone and understanding of the human bone marrow smears, imprints and sections thus utilizing all available information and expertise to arrive at a
