Implementing Patient Safety Suzette Woodward, 2019-09-11 Over the last two decades across the globe we have seen a multitude of programs projects and books to help improve the safety of patient care in healthcare However the full potential of these has not yet been reached Most of the current approaches are top down programmatic and target driven These look at problems in isolation one harm at a time with simplistic solutions that fail to support a holistic systematic approach They are focused on collecting incident data and learning from failure using tools that are not fit for purpose in a complex nonlinear system Very rarely do the solutions help build the conditions cultures and behaviours that support a safer system and help the people involved work safely Healthcare is stuck in a relentlessly negative approach to safety Those working in patient safety and healthcare are struggling and books on patient safety to date instruct the reader to continue doing the same things we have been doing for the last 20 years This book uniquely combines the latest thinking in safety including creating a balanced approach to learning from what works as a way to understand why it fails together with the evidence on building a just culture positive workplaces and working relationships that we now know are so important for safety It helps people understand how to address issues despite their complexities and improve safety with practical ways to truly understand what day to day healthcare work is actually like rather than what people imagine it is like This book builds on the author's first book *Rethinking Patient Safety* which exposed what we need to do differently to truly transform our approach to patient safety It updates the reader further on the concepts explored in the first book but also vitally helps readers understand how *Implementing Patient Safety* goes beyond the rhetoric and provides the reader with ideas and examples for how the latest thinking can actually be achieved It is based on the author's personal experience of leading a national culture change campaign in the National Health Service for five years The lessons arise from helping hundreds of organisations and people rethink and implement a whole new way of thinking about improving patient safety in healthcare

Integrating Evidence into Practice for Impact, An Issue of Nursing Clinics of North America Debra Mark, 2014-09-28 This issue begins with an overview that distinguishes evidence based practice EBP and translation science followed by a description of Hawaii's statewide EBP program that uses active and multifaceted translation science strategies to facilitate the rate and extent of adoption of EBP changes With one exception the remaining articles describe individual EBP projects from five different health care facilities that used the Iowa Model to guide their work Each article includes an evidence summary a description of implementation strategies an evaluation of the innovation and lessons learned These

completed projects were initiated between 2009 and 2012 address a variety of topical nursing issues and for the most part focus on preventing complications ie blood sugar elevations increased lengths of stay extubation failures noise related injury pain surgical site infections pneumonia restraint use delirium and fever An additional article describes the use of evidence to inform simulation based learning a possible strategy for ensuring competencies in and compliance with EBP interventions Nursing leaders will come away with solid information about utilizing EBP to improve patient outcomes The Hawaii program demonstrates that health care quality can be realized by employing the best available evidence and empowering the nursing workforce It also offers a glimpse of the care that the future nursing workforce could provide to create a health system that provides accessible affordable and quality care to everyone in the United States **Cumulated Index to the Books** ,1999
