The Great Astronomical Revolution Patrick Moore, 1994

Camille Flammarion's The Planet Mars Camille Flammarion, 2014-11-02 Camille Flammarion 1842-1925 began his career at 16 as a human computer under the great mathematician U J J Le Verrier at the Paris Observatory He soon tired of the drudgery he was drawn to more romantic vistas and at 19 wrote a book on an idea that he was to make his own the

habitability of other worlds There followed a career as France's greatest popularizer of astronomy with over 60 titles to his credit An admirer granted him a chateau at Juvisy sur l'Orge and he set up a first rate observatory dedicated to the study of the planet Mars Finally in 1892 he published his masterpiece *La Planete Mars et ses conditions d'habitabilite* a comprehensive summary of three centuries worth of literature on Mars much of it based on his own personal research into rare memoirs and archives As a history of that era it has never been surpassed and remains one of a handful of indispensable books on the red planet Sir Patrick Moore 1923 2012 needs no introduction his record of popularizing astronomy in Britain in the 20th century equaled Flammarion's in France in the 19th century Moore pounded out hundreds of books as well as served as presenter of the BBC's TV program *Sky at Night* program for 55 years a world record Though Moore always insisted that the Moon was his *chef d'oeuvre* Mars came a close second and in 1980 he produced a typescript of Flammarion's classic Unfortunately even he found the project too daunting for his publishers and passed the torch of keeping the project alive to a friend the amateur astronomer and author William Sheehan in 1993 Widely regarded as a leading historian of the planet Mars Sheehan has not only meticulously compared and corrected Moore's manuscript against Flammarion's original so as to produce an authoritative text he has added an important introduction showing the book's significance in the history of Mars studies Here results a book that remains an invaluable resource and is also a literary tour de force in which the inimitable style of Flammarion has been rendered in the equally unique style of Moore *Patrick Moore on the Moon* Patrick Moore, 2001 Discusses the history of the moon and its relation to the Earth offering information about its geological origins potential future uses and ancient beliefs regarding the moon Man the Astronomer Patrick Moore, 1973
