Buckridge, 2016-07-14 In Caribbean history the European colonial plantocracy created a cultural diaspora in which African slaves were torn from their ancestral homeland In order to maintain vital links to their traditions and culture slaves retained certain customs and nurtured them in the Caribbean The creation of lace bark cloth from the lagetta tree was a practice that enabled slave women to fashion their own clothing an exercise that was both a necessity as clothing provisions for slaves were poor and empowering as it allowed women who participated in the industry to achieve some financial independence This is the first book on the subject and through close collaboration with experts in the field including Maroon descendants scientists and conservationists it offers a pioneering perspective on the material culture of Caribbean slaves bringing into focus the dynamics of race class and gender Focussing on the time period from the 1660s to the 1920s it examines how the industry developed the types of clothes made and the people who wore them The study asks crucial questions about the social roles that bark cloth production played in the plantation economy and colonial society and in particular explores the relationship between bark cloth production and identity amongst slave women      [Anthropological Resources](#) Lee S.
