Ebeling,Signe Oksefjell Ebeling,2013-09-17 Combining the fields of phraseology and contrastive analysis this book describes how patterns defined as recurrent word combinations with semantic unity behave cross linguistically As the contrastive approach adopted in the book relies on translations and a bidirectional corpus model the first part offers an in depth discussion of contrastive linguistics with special emphasis on using translations as tertium comparationis and a parallel corpus as the main source of material Central to the contrastive analysis is the use of corpus linguistic methods in the identification of patterns while a deeper understanding of the phraseological nature of the patterns is closely related to the concept of extended units of meaning The second part of the book presents five case studies using an easy to follow step by step method to illustrate the phraseological contrastive approach at work The studies show that patterns weave an intricate web of meanings across languages and demonstrate the potential of exploring patterns in contrast **Pattern-oriented Analysis and Design** Sherif M.
