Political Integration Johan K. de Vree, 1972

Emotion-Oriented Systems Paolo Petta, Catherine Pelachaud, Roddy Cowie, 2011-02-04 Emotion pervades human life in general and human communication in particular and this sets information technology a challenge Traditionally IT has focused on allowing people

absent since the dawn of modernity when reason became identified with modern science to disastrous results While the advent of postmodernism has brought the limits of modernism to light it has done nothing to establish the rationality of religion other than to treat religion as a cultural phenomenon along with science This book conceives fundamental theology as a discipline that seeks religious truth in the midst of diverse perspectives ranging from militant atheism to violent religious fanaticism International Encyclopedia of the Social & Behavioral Sciences Neil J.
