Policing Twentieth Century Ireland Vicky Conway, 2013-08-15 The twentieth century was a time of rapid social change in Ireland from colonial rule to independence civil war and later the Troubles from poverty to globalisation and the Celtic Tiger and from the rise to the fall of the Catholic Church Policing in Ireland has been shaped by all of these changes This book critically evaluates the creation of the new police force an Garda Siochána in the 1920s and analyses how this institution was influenced by and responded to these substantial changes Beginning with an overview of policing in pre independence Ireland this book chronologically charts the history of policing in Ireland It presents data from oral history interviews with retired garda who served between the 1950s and 1990s giving unique insight into the experience of policing Ireland the first study of its kind in Ireland Particular attention is paid to the difficulties of transition the early encounters with the IRA the policing of the Blueshirts the world wars gangs in Dublin and the growth of drugs and crime Particularly noteworthy is the analysis of policing the Troubles and the immense difficulties that generated This book is essential reading for those interested in policing or Irish history but is equally important for those concerned with the legacy of colonialism and transition

Policing Soviet Society Louise Shelley, 2005-08-02 Since its creation immediately after the Russian revolution the militia has had a broad range of social political and economic functions necessary to direct and control a highly centralized socialist state However as the communist party lost its legitimacy the militia was increasingly thrust into the front line of political conflict A task it was unsuited to perform Despite the efforts of perestroika to reform it the collapse of the Soviet state also led to the collapse of morale within the militia Louise Shelley provides a comprehensive view of the history development functions personnel and operations of the militia from its inception until after the demise of the Soviet state The militia combined elements of continental socialist and colonial policing Its functions and operations changed with the development of the state yet it always intervened significantly in citizens lives and citizens were very much involved in their own control Over time the militia became more removed from politics and more concerned with crime control but it always remained a tool of the party This is the first book to analyze the militia which was one of the most vital elements of control within the Soviet State It will be a crucial aid to understanding the authoritarianism of the communist system and its legacy for Russia and the successor states Louise I Shelley is Professor at the Department of Justice Law and Society and the School of International Service at the American University Washington D C

Crafting Transnational Policing Andrew Goldsmith, James Sheptycki, 2007-11-16 The book examines the phenomenon of crafting transnational policing By this term is meant the different forms of engagement in policing reform by international donors national governments foreign police and law enforcement agencies in the domestic policing agencies and programs of recipient countries It includes inter alia peace keeping in post conflict situations reconstruction and capacity building as part of nation or state building exercises and the provision of technical assistance in relation to certain aspects of law enforcement In each instance there is a cross border provision of resources with a view to shaping the kind of policing provided in recipient nations Why do some countries engage in these activities Why has policing become a preferred form of foreign policy engagement in some countries What forms of policing development are provided How are they delivered And how are they received How should these kinds of assistance and or interventions be conducted in future In this regard is there a non negotiable core of good policing that needs to be developed and nurtured as an integral part of all defensible transnational policing engagements These are some of the questions raised by the contributions to this book The book arises primarily from papers presented at a workshop held in Onati Spain in July 2004 on the emergence of a global constabulary ethic The book has also been supplemented by two solicited chapters

Policing Insecurity Niels Uildriks, 2009-04-16 Profound distrust commonly characterizes not only the relationship between citizens and state institutions but also social as well as inter and intra state relations This impacts the effectiveness and quality of the service provided by state institutions The degree to which police and judicial reforms are able to generate trust on these fronts is therefore an important yardstick to judge their relevance under varying circumstances of post authoritarian rule but this question is largely ignored in the current literature on policing and reform From this perspective Policing Insecurity Police Reform Security and Human Rights in Latin America suggests an agenda of future reforms for the region drawing and building upon policing reform experiences throughout the Latin America looking at issues such as impunity professionalization community policing as well as accountability and training of the police By explicitly linking issues of state social trust democratic transition human rights and security these case studies provide a basis for the wider discussion in the book about prerequisites for the success or failure of police reforms thus adding to our empirical and theoretical knowledge in these areas and introducing an important dimension to the literature on police reform security and human rights

fact from fiction and should shorten the learning curve of any law enforcement administrator who seeks to implement this alternative method of policing Highly recommended for upper division undergraduates and graduate students A must read for law enforcement practitioners and criminal justice faculty S L Gottlieb in Choice In The Challenge of Community Policing Dennis P Rosenbaum has made an important and timely contribution to policing in America Important because he has assembled the work of a group of the nation s most thoughtful and respected researchers on policing that provides a current assessment of the field s progress toward reframing the way America s cities are policed Timely because it comes on the threshold of the greatest infusion of federal dollars into local policing in the history of our nation The greatest portion of those dollars are dedicated to putting officers on the street to engage in community policing The Challenge offers considerable insight into the experience of police agencies in America Canada and England that have had the courage to move into uncharted waters with the hope of having greater impact on crime violence and fear The complexity of the issues are acknowledged while appropriate cautions and important questions are raised This book will become a useful tool for researchers and practitioners as more police agencies make serious attempts to work with members of their community in a partnership to solve problems Chief Darrel W Stephens St Petersburg Florida I recently had the opportunity to review The Challenge of Community Policing by Dennis P Rosenbaum and found the book to be an excellent resource for both the academic and practitioner The information is current presented in a well balanced manner and relies on respected scholars who understand the concept of community policing Given the importance of this movement in police practices not to mention the central role community policing has in the current federal crime control initiative The Challenge of Community Policing provides a thorough view of the philosophy and issues Dr Rosenbaum s work is an important contribution to the literature David L Carter Professor and Director National Center for Community Policing

Policing Post-Conflict Cities Alice Hills, 2013-07-04 How and why does order emerge after conflict What does it mean in the context of the twenty first century post colonial city From Kabul Kigali and Kinshasa to Baghdad and Basra people abandoned by the state make their own rules With security increasingly ghettoised survival becomes a matter of manipulation and hustling In this book Alice Hills discusses the interface between order and security While analysts and donors emphasise security Hills argues that order is much more meaningful for people s lives Focusing on the police as both providers of order and a measure of its success the book shows that order depends more on what has gone before than on reconstruction efforts and that tension is inevitable as donors attempt to reform brutal

Reisig and Robert J. Kane have assembled a cast of renowned scholars to provide an authoritative and comprehensive overview of the institution of policing The different sections of the Handbook explore policing contexts strategies authority and issues relating to race and ethnicity The Handbook also includes reviews of the research methodologies used by policing scholars and considerations of the factors that will ultimately shape the future of policing thus providing persuasive insights into why and how policing has developed what it is today and what to expect in the future Aimed at a wide audience of scholars and students in criminology and criminal justice as well as police professionals the Handbook serves as the definitive resource for information on this important institution
