Patterns Of Social And Technological Change In Europe:

Patterns of Social and Technological Change in Europe Savvas Katsikides, Mike Campbell, Josef Hochgerner, 1994
This text brings together research devoted to the relationship between the new developments of technological systems and the social changes with which they are associated. Authors from all parts of Europe have contributed to this volume discussing the prospects of social research developments concerning specific professions linked to technical changes, technological standards compared with social structures, cultural identity and economic performance, female and male conceptions of technology, labour relations, developments in the labour market, structures and trends in technological societies and strategies in technology transfer.

European Labour Relations György Széll, 2020-07-24
This title was first published in 2001. With the increasing economic, political and social integration in Europe, there has been a fundamental change in labour and industrial relations. Not only in the Japanese and American challenges in the triad competition under the slogan of Lean Management, but also ecological and democratic challenges are relevant. The directive for the introduction of European works councils is one example of new forms of industrial relations. The question remains since the Hofstede studies on how far will integration go in guarding the cultural specificities and identities. The material is structured in a logical and helpful way with a balanced and complete review of the subject. This first of two volumes concentrates on the general features of the European system of labour relations. Both volumes are addressed particularly to academics and students of business administration, economics, sociology, labour law and organizational psychology at university level and would also be suitable for intensive courses and seminars in the private sector.

An Exploration of Technology and its Social Impact Savvas Andreas Katsikides, 2017-05-11
This book provides a set of important articles dealing with technology's role and its social impact within the new information age. Taking into consideration the rapid changes within the modern social sphere, the book will be of interest to those seeking to understand how technology is currently reshaping life as well as its capacity to influence social change in the contemporary era. The book is of analytical and critical value and concerns vital research issues within the context of the emerging information age. It draws together research devoted to key questions examining the relationship between the various new developments of technological systems and their social impact.

European Labour Relations: Common features György Széll, 2001
With increasing economic, political and social integration in Europe, there comes a fundamental change in labour and industrial relations, for example the introduction of the European Work Council. This first volume gives an overview of common traits in industrial and labour relations around Europe and discusses specific terms.

The Societal Impact of Technology Savvas A. Katsikides, 2018-11-06
Published in 1998, this text is concerned with research issues within the context of the emerging information age. The book draws together research which is devoted to key questions examining the relationship between the various and widely discussed developments of technological systems and their societal impacts. Increasing interest and research into the information

society and their euphorical assumptions is creating a wide spectrum of societal criticism Computer supported work for instance has led to the development of innovative organizational processes based on technological developments and communications paradigms In particular the focus is centred on the perspectives of such Networking Entities and their many varied implications The book links sociology with technology and aims to lead it to wider discussions of the above issues

Territorial and Social Inequalities in Europe Martin Heidenreich,2022-10-28 This book examines social inequalities in Europe especially those caused by economic factors It starts with the paradox of European inequality where on the one hand even total income inequality in Europe is significantly lower than in most parts of the world but on the other Europe is also characterised by profound and durable inequalities within the continent It discusses inequalities caused by the exclusion of marginalised groups from the labour market with considerable and sometimes increasing differences between central and peripheral regions pronounced wealth and labour market inequalities and significant rates of persistent poverty deprivation educational poverty low wages and unemployment The book also discusses broader territorial inequalities which are the basis for divisions between Northern and Southern Europe East and West between qualified and unqualified employees younger and older people men and women and migrants and non migrants The book raises questions about the winners and losers of the social transformations linked to the introduction of the Euro the Eastern enlargement of the EU and the financial and Eurozone crises It is based on a comprehensive analysis of a European wide microdata set on income and living conditions EU SILC The empirical research material which is the first to deploy this data in a comprehensive manner consists of detailed empirical analyses of social divisions and Europeanisation processes in 30 European countries It analyses and explains the transformation of the previously dominant national spaces into a European social space This topical book is of interest to academics and students in the fields of sociology and comparative social sciences along with those studying European regional geography anthropology international relations and international politics ECSM 2019 6th European

The European Digital Economy Judyta Lubacha, Beata

Mäihäniemi, Rafał Wiśła, 2023-12-22 The digital economy is a conceptual umbrella referring to markets organizations and their networks that are based on digital technologies communication data processing and e-commerce. It is multidimensional and its dynamic structure must be analysed from various dimensions such as economic changes in the nature of resources production factors and economic processes technological technological progress viewed from a macroeconomic perspective vs technological innovation viewed from a microeconomic perspective regulatory challenges facing regulators new risks affecting the institutional order and sociological changes in society's functioning principles attitudes towards work and human relations. The purpose of this book is to analyse the effectiveness of digital technologies as well as the fundamental factors that contribute to technological progress in the long run. It also examines structural and qualitative shifts in economies and societies. It investigates many research questions such as the gap between the level of digital economic development in European Union countries digital transformation and its impact on workplace skills development patterns and also the legal framework for data as resource. The book approaches these issues from a multidisciplinary perspective from law to economics and sociology. It focuses on definitional discussions the measurement challenges drivers for digital transition the impact on labour relations digital skills and education data reuse and data extractivism. This is a comprehensive introduction to the different contexts from which the digital economy can be addressed offering an innovative method for studying this complex phenomenon and as such it will be a valuable resource for students scholars and researchers across a range of disciplines. European Media in the Digital Age Richard Rooke, 2013-11-04 This introductory textbook for Media and Communication Studies students is designed to encourage observation and evaluation of the European media in the digital age enabling students to grasp key concepts and gain a broad and clear overview of the area. It also introduces the principal debates developments legislative commercial political and technological and issues shaping the European media today and examines in depth the mass media digital media the internet and new media policy. Understanding today's media scene from print to audiovisual needs a wider view and this book helps make comprehensible the European media within a broader global media landscape. The text is pedagogically rich and explores a variety of approaches to help the reader gain a better understanding of the European media world. Students are encouraged to start thinking about statistics relating this to economics analysing regulations and combining media theories with theories of European Union integration. The book also

includes the use of case studies illustrations summaries critical reflections and directions to wider reading The European Media in the Digital Age is recommended for all Media Studies students and is also of key interest to students of Politics and Policy Business Studies International Studies and European Studies Europe and Central Asia Economic Update, Fall 2022 World Bank,2022-10-04 Globalization demographic trends the green transition and technological innovations are transforming labor markets in Europe and Central Asia altering their institutional and contractual arrangements and creating disparities and vulnerabilities in the labor force Systemic risks economic health or climate related are also playing an increased role in driving poverty and vulnerability Social protection systems in Europe and Central Asia will need to be reformed to address these challenges and provide adequate protection to workers and families Countries in the region responded to the COVID 19 pandemic by implementing social protection packages with a substantial contribution of job protection policies Analysis of the impact of these policies suggests that while job protection policies may have preserved employment in the short run this may have come at the expense of efficiency and growth In the long run income protection policies may be better at addressing the needs of vulnerable groups as labor markets continue evolving A policy package that combines a guaranteed minimum income with labor market policies that facilitate job transitions can best help countries address long term challenges *Prestate Societies of the North Central European Plains* Ludomir R Lozny,2013-04-16 This volume offers a new perspective on social dynamics and culture change in the North Central European Plains NCEP from 600 to 900 CE It discusses long term causal processes leading to the formation of state at the fringes of the Merovingian and Frankish Kingdoms the Carolingian and the Holy Roman Empire the Scandinavian Kingdoms the Czech Kingdom and the Kingdom of Rus The central problem addressed is how to account for and explain the transition from noncomplex to supra tribal polities between 600 and 900 CE The examined evidence shows that a very basic community level management of common pool resources seems a successful strategy to manage short term risk and may lead to sustainable higher level political organization In conclusion it present a models of social dynamics of the NCEP 600 900 CE that suggests that the state formation process was an outcome of spontaneous processes and deterministic factors occurring within a period of approximately 400 years of which the last two hundred years 800 900 CE were the most critical In a broader context the point discussed is that decisions with short term goals have long term consequences The Making of Urban Europe, 1000-1994 Paul M. HOHENBERG,Lynn Hollen Lees,Paul M Hohenberg,2009-06-30 Europe became a land of cities during the last millennium The story told in this book begins with North Sea and Mediterranean traders sailing away from Dorestad and Amalfi and with warrior kings building castles to fortify their conquests It tells of the dynamism of textile towns in Flanders and Ireland While London and Hamburg flourished by reaching out to the world and once vibrant Spanish cities slid into somnolence a Russian urban network slowly grew to rival that of the West Later as the tide of industrialization swept over Europe the most intense urban striving and then settled back into the merchant cities and baroque capitals of an earlier era

By tracing the large scale processes of social economic and political change within cities as well as the evolving relationships between town and country and between city and city the authors present an original synthesis of European urbanization within a global context They divide their study into three time periods making the early modern era much more than a mere transition from preindustrial to industrial economies Through both general analyses and incisive case studies Hohenberg and Lees show how cities originated and what conditioned their early development and later growth How did urban activity respond to demographic and technological changes Did the social consequences of urban life begin degradation or inspire integration and cultural renewal New analytical tools suggested by a systems view of urban relations yield a vivid dual picture of cities both as elements in a regional and national hierarchy of central places and also as junctions in a transnational network for the exchange of goods information and influence A lucid text is supplemented by numerous maps illustrations figures and tables and by substantial bibliography Both a general and a scholarly audience will find this book engrossing reading
