Perceptions Relations Between The Us T:

Perceptions, Relations Between the United States and the Soviet Union United States. Congress. Senate. Committee on Foreign Relations, 1978 79 concise essays on fifteen topics designed to explore Soviet interests attitudes objectives and capabilities and U S policy responses *Image, Perception, and the Making of U.S.-China Relations* Hongshan Li, 1998-06-25 *Image Perception and the Making of U S China Relations* examines major events in the history of the relationship between the U S and China to show the development and effects of national images and perceptions These essays expose the effects of ideology as represented through foreign policy and the actions of leaders as well as the role of the media and governments in shaping public opinion and attitudes They show the evolution of the influential forces from the nineteenth century through the twentieth century In each country a small group of people has always controlled these forces by manipulating the power of the media and governments The nature of this situation changed national perceptions as power often moved from one small group to another As a result of manipulating the images and perceptions of each country these biased and untrue views have inevitably led to conflict between the two countries **The Impact of International Television** Michael G. Elasmr, 2014-04-08 For several decades cultural imperialism has been the dominant paradigm for conceptualizing labeling predicting and explaining the effects of international television It has been used as an unchallenged premise for numerous essays on the topic of imported television influence despite the fact that the assumption of strong cultural influence is not necessarily reflected in the body of research that exists within this field of study In *The Impact of International Television A Paradigm Shift* editor Michael G Elasmr and his contributors challenge the dominant paradigm of cultural imperialism and offer an alternative paradigm with which to evaluate international or crossborder message influence In this volume Elasmr has collected original research from leading scholars working in the area of crossborder media influence and contributes his own meta analysis to examine what research findings actually show on the influences of crossborder messages The contributions included here illustrate points such as the contentions of cultural imperialism and the context in which its assumptions emerged and developed the complexities of the relationship between exposure to foreign television and its subsequent effects on local audience members the applicability of quantitative methods to a topic commonly tackled using argumentation critical theory and other qualitative approaches and the difficulty of achieving strong and homogenous effects In bringing together the work of independent researchers *The Impact of International Television A Paradigm Shift* bridges over 40 years of research efforts focused on imported television influence the results of which as a whole challenge the de facto strong and homogenous effects assumed by those who support the paradigm of cultural imperialism The volume sets a theory driven agenda of research and offers an alternative paradigm for the new generation of researchers interested in international media effects As such the volume is intended for scholars researchers and students in international and intercultural communication cross cultural communication mass communication media effects media and

society and related areas It will also be of great interest to academics in international relations cross cultural and social psychology intergroup and international relations international public opinion and peace studies

Perception and Knowledge Walter Hopp, 2011-04-07 This book offers a provocative clear and rigorously argued account of the nature of perception and its role in the production of knowledge Walter Hopp argues that perceptual experiences do not have conceptual content and that what makes them play a distinctive epistemic role is not the features which they share with beliefs but something that in fact sets them radically apart He explains that the reason giving relation between experiences and beliefs is what Edmund Husserl called fulfilment in which we find something to be as we think it to be His book covers a wide range of central topics in contemporary philosophy of mind epistemology and traditional phenomenology It is essential reading for contemporary analytic philosophers of mind and phenomenologists alike

Wittgenstein and Perception Michael Campbell, Michael O'Sullivan, 2015-02-11 Throughout his career Wittgenstein was preoccupied with issues in the philosophy of perception Despite this little attention has been paid to this aspect of Wittgenstein's work This volume redresses this lack by bringing together an international group of leading philosophers to focus on the impact of Wittgenstein's work on the philosophy of perception The ten specially commissioned chapters draw on the complete range of Wittgenstein's writings from his earliest to latest extant works and combine both exegetical approaches with engagements with contemporary philosophy of mind Topics covered include perception and judgement in the *Tractatus* aspect perception the putative intentionality of perception representationalism The book also includes an overview which summarises the evolution of Wittgenstein's views on perception throughout his life With an outstanding array of contributors Wittgenstein and Perception is essential reading for students and scholars of Wittgenstein's work as well as those working in philosophy of mind and philosophy of perception Contributors Yasuhiro Arahata Michael Campbell William Child Daniel Hutto Michael O'Sullivan Marie McGinn Michel terHark Charles Travis and Jos Zalabardo

Possibilities of Perception Jennifer Church, 2013-07-25 The epistemology and the phenomenology of perception are closely related insofar as both depend on experiences of self-evident objectivity experiences in which the objectivity of a state of affairs is evident from within our experience of that state of affairs Jennifer Church offers a distinctive account of perception showing how imagining alternative perspectives and alternative possibilities plays a key role in creating and validating experiences of self-evident objectivity Offered first as an

account of what it takes to perceive ordinary objects such as birds and trees the account is then extended to show how it is also possible to perceive such things as causes reasons mental states distant galaxies molecular arrangements mathematical relations and interpersonal obligations A chapter is devoted to the phenomenology and epistemology of moral perception including the perception of persons as such and a chapter is devoted to the peculiarities of aesthetic perception including the perception of artworks as such In all of these cases Church argues perception can be literal not merely figurative or metaphorical and substantive not merely formal or deflationary Her account helps to explain the advantages of perceptual versus non perceptual knowledge It also helps to make sense of some historical discussions of the role of the imagination in acquiring and validating knowledge in relation to Plato s cave Descartes explanation of rational intuition and Kant s arguments concerning objectivity causality and the Categorical Imperative

Hume's Scepticism and the Science of Human Nature Paul Stanistreet,2017-07-05 This book explores the relationship between Hume s sceptical philosophy and his Newtonian ambition of founding a science of human nature Assessing both received and new readings of Hume s philosophy Stanistreet offers a line of interpretation which he argues makes sense of many of the apparent conflicts and paradoxes in Hume s work and describes how well known controversies concerning Hume s thinking about causation induction and the external world can be resolved Offering important new contributions to Hume scholarship this book also surveys and assesses the new research responsible for the recent sea change in thinking about Hume It offers an accessible overview of these developments while suggesting significant revisions to current readings of Hume s philosophy

Motivation and the Primacy of Perception Peter Antich,2021-02-01 Merleau Ponty s phenomenological notion of motivation advances a compelling alternative to the empiricist and rationalist assumptions that underpin modern epistemology Arguing that knowledge is ultimately founded in perceptual experience Peter Antich interprets and defends Merleau Ponty s thinking on motivation as the key to establishing a new form of epistemic grounding Upending the classical dichotomy between reason and natural causality justification and explanation Antich shows how this epistemic ground enables Merleau Ponty to offer a radically new account of knowledge and its relation to perception In so doing Antich demonstrates how and why Merleau Ponty remains a vital resource for today s epistemologists
